Our success is dependent on our management team whose loss could seriously impair the ability to continue to manage and expand business efficiently. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Key Managerial Personnel and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to expand our business.

Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

- 3. Our Company doesn't own the premises where its registered and corporate office is situated and leave & license agreement have been executed for the same. Any termination or dispute in relation to these lease/ rental agreement may have an adverse effect on our business operations and results thereof.***

Our Registered and Corporate office is situated at 3rd Floor, Office -301 Sumukh Super Compound, Vasta Devadi Road, Surat - 395004, Gujarat is on leased/ rented premises which we have been taken for 11 months on lease beginning from December 01, 2017 owned by Mr. Gautam P Sheth, who is one of the Promoters of our Company. Our business operations are also conducted from the said premises. As per the leave & license agreement the lease is for a period of 11 months and any non compliance by us in relation to any term of lease may result in the termination of the leave & license agreement and consequently we have to vacate the said premises. We also cannot assure you that lessor will not terminate the leave & license agreement, which would require us to locate to another premise and may have an adverse effect on our conducting our business operations.

- 4. The company has not registered any of its Trade Mark. The company in future may register it depending on the future requirements. Any delay in making an application and/or granting registration or in obtaining registration could result in loss of brand equity and the company's right to use the said brand.***

The company is required to make an application to the Trade Mark Registry, Gujarat to register its brands-“ company name-“Gautam Gems” and logo “  ”. For further details please refer to the chapter titled ‘Government and Other Approvals’ beginning on page no.141 of the Draft Prospectus.

- 5. The non-availability or high cost of quality diamonds may have an adverse effect on our business, results of operations, financial condition and prospects.***

The procurement of diamonds in time as well as the authenticity, quality and the price, at which we procure, play an important role in the successful operations of our business. Diamond is the only product that we trade in and is primarily sourced from the domestic market and from reputed suppliers. We typically place our purchase orders for diamonds on a spot basis with limited number of diamond suppliers. However, we and have not entered into any long-term contracts with them. Further, we purchase diamonds on a fixed payment basis; i.e. the price and the credit period is fixed at the time of purchase. Should any of our suppliers cease to be able or willing to continue supplying us with diamonds on terms that are acceptable to us, we may have to find other suppliers. There can be no assurance that such other suppliers will be able to meet our needs or be as reliable or provide diamonds of the same quality at the same prices as our current suppliers. Any disruption of supplies from our current diamond suppliers or a failure to adequately replace them may materially and adversely affect our business, results of operations, financial condition and prospects.

Additional, in the recent years, there has been a significant increase in the cost of rough and polished diamonds, which has resulted in an increase in our operational cost. We cannot assure you that we will be able to procure quality rough and polished diamonds at competitive prices or at all. In addition, if for any reason, our primary suppliers of rough and polished diamonds should curtail or discontinue their delivery to us, in the quantities we need and at prices that are competitive, our ability to meet our material requirements for our operations could be impaired, our delivery schedules could be disrupted and our business and reputation may be adversely affected. Further, any rise in rough and polished diamond prices may cause customers to delay their purchases, thereby adversely affecting our business, operations and financial condition.

6. *Diamond being the only product sold by us; any fluctuation in price of diamonds could adversely impact our revenue.*

Our Company is into the trading business of diamonds. Hence, diamond is the only product sold by our company. Prices of diamonds are volatile in nature, although, there has been an increased investment demand for diamonds globally. Fluctuations in diamond prices may affect consumer demand as well as operating costs of our Company. Continuous and significant increase in the prices of diamond or a negative outlook on future diamond prices could, in the short term, result in reduced income as the sales volumes may be adversely affected or may also reduce during such periods. Any such fluctuation in the price of diamond may materially and adversely affect our revenue from operations and profitability.

7. *Any change in our consumer's likes, preferences or a change in their perception regarding the quality of our products may negatively affect the image and our reputation and in turn affect our revenues and profitability.*

The industry in which we operate is highly competitive and where goodwill and reputation are of huge significance. Although we have been in the business of trading rough and polished diamonds, any change in consumer's likes, preferences or a change in their demands regarding the quality and authenticity of our products, may negatively affect the image and reputation of our products and consequently that our Company. Further, such incidences may expose our Company to liabilities and claims, adversely affect our reputation, growth and profitability.

8. *We have not entered into any long-term contracts with any of our customers and orders are not backed-up by a letter of credit facility.*

We do not have any long-term contracts with our customers and any change in the buying pattern of the customers could adversely affect the business of our Company. Although we have satisfactory business relations with our customers and have received continued business from them in the past, there is no certainty that the same will continue in the years to come and may affect our profitability.

9. *The success of our Company mainly depends upon the quality of diamonds sell to our customer and our ability to retain the present number of customers and attract newer customers. Any failure in retaining or attracting customers on year on year basis and any decline in quality of our diamonds will impact the business and the revenues earned by the Company.*

Since, rough and polished diamonds are the only products we sell to our customers, the quality and authenticity of rough and polished diamonds delivered, the ability to timely procure them at the competitive price, would assist the company in earning trust, goodwill, popularity and visibility amongst its customers. In case the Company fails to maintain and enhance its current market position, the quality and authenticity of rough and polished diamonds sold and the failure to attract current and newer customers; the revenues earned by the company may be affected.

10. *Significant sales during the festive season and other significant seasons is experienced by our Company. In case, we are unable to cope up with our service during this time, then our revenues and profitability will be affected and have a negative effect on our image and brand.*

The sales volume for our business completely depends on the consumer demand. Polished and rough diamonds are generally in significantly high demand during the festival seasons and other significant occasions like Diwali, New Year, Christmas, Valentine's Day and during wedding seasons which occurs in the third and

fourth quarter of the fiscal year. Any significant shortfall in sales during this period, would affect our profitability and we would experience adverse effect on our results of operations. While we may stock our products during this period, our fixed costs such as lease rentals, employee salaries, and logistics-related expenses, which form a significant portion of operating costs, are relatively constant throughout the year. Consequently, lower than expected net sales during the third or fourth quarters of the fiscal year or more pronounced seasonal variations in sales in the future could have a disproportionate impact on our operating results for the fiscal year, or could strain our resources and impair our cash flows. Any slowdown in demand for polished and rough diamonds during the peak seasons or failure by us to accurately anticipate and prepare for such seasonal fluctuations could have a material adverse effect on our business, financial condition and results of operations.

Further, we have limited ability to compensate for shortfalls in our sales or income during such periods by introducing changes in operations and strategies for rest of the year, or to recover from any extensive disruption; for example due to sudden adverse changes in consumer confidence, global pricing of polished and rough diamonds or lower disposable income, etc. As a result of the above, our half yearly financial results may not be comparable or a meaningful indicator of our futuristic performance. Any analysis of our financial results on a quarter-on-quarter basis may be perceived as negative indicator of our growth, which may adversely impact market price of our Equity Shares.

11. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

The diamond trading sector is highly fragmented and competitive. Our Company would not only compete with organized players but also a high percentage of unorganized players at local, national and international levels. Some of them may offer better quality diamonds at competitive prices and may be capable of providing more personalized services to each client due to the smaller number of orders placed with them. Further, these unorganized player offer their services at highly competitive prices having well established presence in their local markets. Aggressive discounting by competitors, including liquidating excess inventory, may also adversely impact our performance in the short term. This is particularly the case for easily comparable prices for rough and polished diamonds, for similar quality diamonds sold through wholesaler, retailers and other traders.

In addition, there are minimal entry barriers in this sector and hence the may also face competition from new entrants. Some of our employees, who have disassociate themselves from the Company, may also compete with our Company.

12. We may fail to attract and retain qualified designers and craftsmen as competition for skilled personnel is intense.

The industry in which we operate is labour intensive and our success depends in large part upon our ability to attract, hire, train and retain qualified designers and craftsmen. While we believe we have a satisfactory working relationship with our labourers and employees, we remain subject to the risk of labour disputes and adverse employee relationships. These potential disputes and adverse relations could result in work stoppages or other events that could disrupt our business operations or the development of our projects, which could have a material adverse effect on our business, financial condition or results of operations.

Further, there is significant competition for professionals in India with skills necessary to perform the services. Increased competition for these professionals could have an adverse effect on us. High attrition rates among designers and craftsmen could result in a loss of domain and process knowledge, which could result in poor products. A significant increase in the turnover rate would increase our recruiting and training costs and decrease our operating efficiency, productivity and profit margins and could lead to a decline in demand for our products.

13. Ineffective execution of marketing programs and reduced marketing expenditure could have an adverse effect on our sales.

Being a trader in the diamond industry, our primary factors in determining retailers buying decisions in the wholesale business includes customer confidence, price points for our products, timely delivery of our products, designs together with the level and quality of customer service. The ability to differentiate our products from competitors by its branding, marketing and advertising programs is an important factor in attracting retailers and consumers. As a result, from time to time we will be undertaking brand building exercise and marketing programs to enhance our brand visibility. If these programs are ineffectively executed or the level of support for them is reduced, it could affect our ability to attract customers. Further, we cannot assure you that we will be able to accurately estimate our marketing expenditure for wholesale and or retail operations. In case our marketing expenses are lesser than market standards, our marketing programs may be perceived ineffective. However, if our marketing expenses are higher than the market standards, it may adversely affect our income and results of operations.

14. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

Our results of operations are dependent on our ability to effectively manage our inventory. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of merchandise or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or purchase, we may be required to recycle our inventory, which would have an adverse impact on our income and cash flows.

15. Negative Publicity with respect to our products or the industry in which we operate could adversely affect our business, financial condition and results of operations.

Our business is dependent on the trust that our customers have in the quality and authenticity of the rough and polished diamonds we sell to them. Any negative publicity regarding our products, our Company, or Gems and Jewellery industry generally could adversely affect our reputation and our results of operations. Customer preferences could be affected by a variety of issues including non-acceptance of diamonds from specific regions and a decrease in the perceived value and customer satisfaction of the rough and polished diamonds compared to its price.

16. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

Our results of operations are dependent on our ability to effectively manage our inventory. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of merchandise or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or purchase, we may be required to recycle our inventory, which would have an adverse impact on our income and cash flows.

17. Significant portion of our sales is dependent on few of our seller. A loss of one or more such significant seller or a reduction in their sales, could adversely affect our financial condition thereby reducing our reducing revenues.

We are extensively dependent on a limited number of sellers for a significant portion of our income. During the period ended on 30th November, 2017, our top 10 contributed around 90 % of our total revenue. The loss of one or more of these significant sellers or a reduction in the amount of business we obtain from them could have an adverse effect on our financial condition and result in reduction of our income. We cannot assure you that we will be able to maintain historic levels of business from our significant sellers or that we will be able to significantly reduce seller's concentration in the future. Furthermore, major events affecting our customers, such as bankruptcy, change of management, change in their country's policy and business framework, mergers and acquisitions, etc. could adversely impact our business. If any of our major customers becomes bankrupt or insolvent, we may lose some or all of our business from that customer and our receivable from that customer would increase and may have to be written off, adversely impacting our income and financial condition.

18. If we are unable to collect our receivables from our clients, our results of operations and cash flows could be adversely affected.

As of eight month ending November 30, 2017, we had trade receivables of ₹587.29 Lakhs which were outstanding for a period less than six months. Our business depends on our ability to successfully obtain payment from our customer(s) for our products sold to them.

We typically bill and collect on relatively short cycles and maintain provisions against receivables and unbilled services. Actual losses on client balances could differ from those that we currently anticipate and as a result we might need to adjust our provisions. Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our clients, and as a result could cause clients to delay payments to us, request modifications to their payment arrangements that could increase our receivables balance or working capital requirements, or default on their payment obligations to us.

Recovery of our receivables and timely collection of client balances also depends on our ability to complete our contractual commitments and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected.

19. Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.

Our Company requires several statutory and regulatory permits, licenses and approvals to operate the business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/ licenses/ approvals. Failure by our Company to renew, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business. For details please refer to Chapter titled "Government and Other Statutory Approvals" beginning on page no.141 of the Draft Prospectus.

20. Our Company has not taken any insurance coverage which may protect us against certain operating hazards and from all losses and this may have an adverse impact on the financial conditions of the business.

Our Company has not taken any insurance cover at present. Hence, we may not be able to protect ourselves from any damage or loss suffered by us. To the extent that we suffer any loss or damage, the operational results of the company could be adversely affected. The company does not maintain a directors and officers liability insurance policy for the directors or key managerial personnel of the Company. For details of our insurance cover, please see section "Insurance Policies" on page no. 81.

21. Our Company has availed unsecured loan from our Promoter Group which is repayable on demand and at any time. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.

As per the restated audited financial statement, as on for eight month ending on November, 2017 our Company has availed total sum of ₹ 321.08 Lakhs as unsecured loan which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section "Financial Indebtness" beginning on page no. 132 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

22. We have entered into certain related party transactions and may continue to do so.

We have entered into related party transactions with our Promoters, its group members/ entities, Directors and other associates. While we believe that all such transactions have been conducted on the arms length basis,

however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Draft Prospectus and, also see the section “Related Party Transactions” beginning on page no. 130 of this Draft Prospectus.

23. *Our Group Entities, M/s Gautam Gems, proprietary firm operates in the similar line of business as us, which may lead to competition with such Group Entities.*

Our Group Entities, M/s Gautam Gems, proprietary firm is involved in line of business that may potentially compete with our Company or is authorized to carry out business, similar to that of our Company. We may hence have to compete with our Group Entities for business, which may impact our business, financial condition and results of operations. The interests of our Promoters or Promoter Groups may also conflict in material aspects with our interests or the interests of our shareholders. For further details, please refer “Our Group Entities” beginning on page no. 111 of this Draft Prospectus. Further, our Promoters may become involved in ventures that may potentially compete with our Company. The interests of our Promoters or Promoter Groups may conflict with the interests of our other Shareholders and our Promoters may, for business considerations or otherwise, cause our Company to take actions, or refrain from taking actions, in order to benefit themselves instead of our Company's interests or the interests of its other Shareholders and which may be harmful to our Company's interests or the interests of our other Shareholders, which may impact our business, financial condition and results of operations.

We have not entered into any non-compete agreement with our Promoters and/or Promoter Groups and/or our Group Entities. We cannot assure you that our Promoters and/or our Group Entities and/or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

24. *Conflicts of interest may arise out of common business object shared by our company, our Promoters and various members of our Promoters Group.*

Our Company has acquired the assets and stocks of the Proprietary Firm of our promoter, M/s Gautam Gems, in order to corporatize the business. M/s Gautam Gems has been run by our promoter Mr. Gautam P Sheth since its incorporation. Our company and the promoter has entered into a Asset Transfer Agreement on September 01, 2017 to transfer the assets and stocks of the M/s Gautam Gems to the company on mutually agreed terms. Upon such transfer, our company shall allot equity shares to the M/s Gautam Gems. Our Promoter- Mr. Gautam P Sheth, has interests in M/s Gautam Gems- Proprietary Firm that may compete with us.

As a result, conflicts of interest may arise in allocating or addressing business opportunities and strategies among our Company and our Promoter- Mr. Gautam P Sheth and M/s Gautam Gems- Proprietary Firm in circumstances where our interests may differ from theirs. There can be no assurance that our Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. For further details, please refer to sections titled “*Management's Discussion and Analysis of Financial Conditions and Results of Operations*” beginning on page no. 133 respectively of this Draft Prospectus.

25. *Delays or defaults in client payments could result in reduction of profits.*

The Company regularly commits resources to slew of projects prior to receiving advances or other payments from clients in amounts sufficient to cover expenditures on projects as it has incurred. It may be subject to working capital shortages due to delays or defaults in client payments. If clients default in their payments on a project to which the Company has devoted significant resources or if a project in which it has invested significant resources is delayed, cancelled or does not proceed to completion, it could have an adverse effect on the Company's business, financial condition and results of operations.

26. *Our Company may require additional capital resources to achieve our expansion plans.*

The rate of our expansion will depend to an extent on the availability of adequate debt and equity capital. Further, the actual expenditure incurred may be higher than current estimates owing to but not limited to,

implementation delays or cost overruns. We may, therefore, primarily try to meet such cost overruns through our internal generations and in case if the same is not adequate, we may have to raise additional funds by way of additional term debt from banks/ financial institutions and unsecured loans, which may have an adverse effect on our business and results of operations.

27. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

28. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed expansion, as detailed in the section titled "Objects of the Issue" is to be largely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

29. *The Company has not appointed any independent agency for the appraisal of the proposed Project.*

The Project, for which we intend to use our Issue proceeds as mentioned in the objects of the Issue, has not been appraised by any bank or financial institution. The total cost of Project is our own estimates based on current conditions and are subject to changes in external circumstances or costs. Our estimates for total cost of Project has been based on various quotations received by us from different suppliers and our internal estimates and which may exceed which may require us to reschedule our Project

30. *Our Board of Directors and management may change our operating policies and strategies without prior notice or shareholder approval.*

Our Board of Directors and management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder approval. We cannot predict the effect that any changes to our current operating policies or strategies would have on our business, operating results and the price of our Equity Shares.

31. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2009, as amended from time to time, appointment of monitoring agency is required only for Issue size above Rs. 50,000 Lacs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

32. *We propose to utilize the Net Proceeds for purposes identified in the section titled "Objects of the Issue" in this Draft Prospectus. Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.*

We propose to utilize the Net Proceeds for purposes identified in the section titled "*Objects of the Issue*" beginning on page no. 56 of this Draft Prospectus. The manner deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholder's approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholder's approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholder's approval may adversely affect our business or operations. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations, 2009, as amended from time to time. If our Shareholder's exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

- 33. Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.***

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 61.74% of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "Capital Structure" and "Our Promoter, Promoter Group and Group Companies", beginning on page no. 45, 108 and 111 respectively, of this Draft Prospectus.

- 34. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

- 35. We cannot assure you that we will pay dividend in future.***

We have not paid any dividends on our Equity Shares since inception and there can be no assurance that dividends will be paid in future. The declaration of dividends in the future will be recommended by our Board, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividend in the future. Further, we may be restricted by the terms of our debt financing from making dividend payments, in the event we default in any of the debt repayment installments.

- 36. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by

the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

37. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to "Statement of Tax Benefits" on page no.65 of this Draft Prospectus.

38. *We cannot assure you that our Equity Shares will be listed on the SME Platform of BSE in a timely manner or at all, which may restrict your ability to dispose of the Equity Shares.*

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of our Equity Shares issued. We have only applied to BSE Limited to use its name as the Stock Exchange in this Offer Document for listing our Equity Shares on the SME Platform of BSE Limited. Permission for listing of the Equity Shares will be granted only after the Equity Shares offered in this Issue have been allotted. Approval from BSE Limited will require all relevant documents authorizing the issuing of the Equity Shares to be submitted to it. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Further, certain procedural and regulatory requirements of SEBI and the Stock Exchanges are required to be completed before the Equity Shares are listed and trading commences. Trading in the Equity Shares is expected to commence within 6 Working Days from the Issue Closing Date. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose off your Equity Shares.

39. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Beeline Broking Limited is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled "General Information – Details of the Market Making Arrangement for this Issue" on page no. 42 of this Draft Prospectus.

- 40. *There may be restrictions on daily/monthly movements in the price of our Equity Shares, which can adversely affect shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point of time.***

Subsequent to listing, our Company may be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India, which does not allow transactions having crossed certain volatility limit in the price of its Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company's circuit breaker is set by the stock exchanges based on certain factors such as the historical volatility in the price and trading volume of the Equity Shares. The stock exchange is not required to inform us of the percentage limit of the circuit breaker from time to time and may change it without our knowledge. This circuit breaker, if imposed, would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, we cannot assure that the shareholders will be able to sell the Equity Shares at desired prices at any particular time.

EXTERNAL RISK FACTORS

- 41. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.***

The company is subject to various regulations and policies. For details see section titled "Key Industry Regulations" beginning on page no. 82 of this Draft Prospectus. The company's current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse affect on the business, financial condition and results of operations.

- 42. *Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.***

The revenues recorded and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. The final determination of the tax liabilities involves the interpretation of local tax laws as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

- 43. *The nationalized goods and services tax (GST) regimes proposed by the Government of India may have material impact on our operations.***

The Government of India has from July 01, 2017 has implemented the Goods and Service Tax a comprehensive national goods and service tax (GST) regime that combines taxes and levies by the Central and State Governments into a unified rate structure. The GST imposed on the diamond industry is 3.00 % as compare to the NIL from Gujarat VAT.

- 44. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

45. *Natural calamities and force majeure events may have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. These natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Further prolonged spells of deficient or abnormal rainfall or other natural calamities in the future could have a negative impact on the Indian economy, adversely affecting our business and the price of the Equity Shares.

46. *Terrorist attacks, civil unrests and other acts of violence in India and around the region could adversely affect the markets, resulting in loss of consumer confidence and adversely affect the business, results of operations, financial condition and cash flows.*

Terrorist attacks, civil unrests and other acts of violence or war in India and around the region may adversely affect worldwide financial markets and result in a loss of consumer confidence and ultimately adversely affect the business, results of operations, financial condition and cash flows. Political tensions could create a perception that an investment in Indian companies involves higher degrees of risk and on the business and price of the Equity Shares.

47. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.*

Certain events that are beyond the company's control such as earthquake, fire, floods and similar natural calamities may cause interruptions in the business operations. The operations and financial results and the market price and liquidity of the equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

48. *In future the company may depend on banks and financial institutions and other sources for meeting its short and medium term financial requirements.*

Any delay in the disbursement of funds from these bodies can act as a bottleneck to the project execution capabilities and thereby its results of operations. The company cannot assure that it will be able to do so on commercially reasonable terms. Any increase in interest expense may have a material adverse effect on its business prospects, financial condition and results of operations.

49. *Increases in interest rates may affect the results of operations.*

Currently, the company does not have any debt, but it cannot be assured that it will not incur indebtedness with a floating rate of interest in the future. As such, increases in interest rates may adversely affect the cost of future borrowings.

The company has not entered into any interest rate hedging or swaps transactions. It cannot be assured to the prospective investor that the company, if it does not enter into any interest rate hedging or swap transactions, will be able to do so on commercially reasonable terms, or that any of such agreements will protect the company fully against interest rate risk. Any increase in interest expense may have an adverse impact on its business, prospects, financial condition and results of operations.

SECTION IV – INTRODUCTION

SUMMARY OF INDUSTRY

The information in this section has not been independently verified by us, the Lead Manager or any of our or their respective affiliates or advisors. The information may not be consistent with other information compiled by third parties within or outside India. Industry sources and publications generally state that the information contained therein has been obtained from sources it believes to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured. Industry and government publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry and government sources and publications may also base their information on estimates, forecasts and assumptions which may prove to be incorrect. Accordingly, investment decisions should not be based on such information.

The Indian Gems and Jewellery (G&J) sector is one of the largest in the world, contributing around 29 per cent to the global jewellery consumption. The sector provides employment to over 2.5 million and is home to over 300,000 gems and jewellery players. The Gems and Jewellery sector plays a significant role in the Indian economy, contributing around 6-7 per cent of the country's GDP. One of the fastest growing sectors, it is extremely export oriented and labour intensive.

Based on its potential for growth and value addition, the Government of India has declared the Gems and Jewellery sector as a focus area for export promotion. The Government has recently undertaken various measures to promote investments and to upgrade technology and skills to promote 'Brand India' in the international market.

India is deemed to be the hub of the global jewellery market because of its low costs and availability of high-skilled labour. India is the world's largest cutting and polishing centre for diamonds, with the cutting and polishing industry being well supported by government policies. Moreover, India exports 75 per cent of the world's polished diamonds, as per statistics from the Gems and Jewellery Export Promotion Council (GJEPC). India's Gems and Jewellery sector has been contributing in a big way to the country's foreign exchange earnings (FEEs). The Government of India has viewed the sector as a thrust area for export promotion. The Indian government presently allows 100 per cent Foreign Direct Investment (FDI) in the sector through the automatic route.

Indians have always been connoisseurs of precious stones and ornaments. Trade secrets of the jewellery business have been handed down over generations, ensuring continuity of traditional craft. Thus, India is today the world's largest diamond cutting and polishing centre. India has been adding modern techniques to its traditional know how that are more in tune with global market trends.

Market size

The gems and jewellery market in India is home to more than 500,000 players, with the majority being small players.

India is one of the largest exporters of gems and jewellery and the industry is considered to play a vital role in the Indian economy as it contributes a major chunk to the total foreign reserves of the country. UAE, US, Russia, Singapore, Hong Kong, Latin America and China are the biggest importers of Indian jewellery. The demand for gold in India rose by 15 per cent year-on-year to reach 123.5 tonnes during January-March 2017, according to the World Gold Council (WGC). The Goods and Services Tax (GST) and monsoon will steer India's gold demand going forward.

The overall net exports of Gems & Jewellery during April 2017 stood at US\$ 3.2 billion, whereas exports of cut and polished diamonds stood at US\$ 1.75 billion. Exports of gold coins and medallions stood at US\$ 553.59 million and

silver jewellery export stood at US\$ 768.92 million during April 2017. India has become the second largest exporter of diamonds, gems and stones to China, as total exports grew by 28.48 per cent year-on-year to touch US\$ 2.48 billion in 2016, as stated by Mr Prakash Gupta, Consul General of India in Shanghai.

Global Gems & Jewellery Sector Overview:

The gems & jewellery market comprises the following segments:

- Diamond studded jewellery,

- Gold jewellery,
- Silver jewellery, and
- Precious and semi-precious gemstones and its jewellery

United States (US) and Japan primarily are markets for diamond studded jewellery, while China, India, Turkey and Middle East have traditionally displayed preference for gold jewellery, although the demand for diamond studded jewellery from these markets too have grown over the last decade.

The global gems and jewellery demand witnessed moderation in 2015 after exhibiting growth from 2012 to 2014. In 2015, global diamond studded jewellery demand was ~USD 79 billion after touching a high of ~USD 81 billion in 2014. The sluggishness in diamond studded jewellery demand continued even in 2016 with some improvement in the intermediate quarters of the year, but again dipped in Q1 2017. The year 2016 also saw a seven year low in global demand for gold jewellery. The global gold jewellery demand in 2016 was ~2040 tonnes compared with ~2400 tonnes in 2015, a drop of ~15% y-o-y.

Strong demand by middle-class buyers has spurred growth in the mainstream jewellery retail segment and it was the main contributor to an increase in US diamond jewellery sales over the last few years. High-end jewellery retailers did not see similar growth in demand from more affluent buyers.

US by far, is the largest market for diamond studded jewellery accounting for over 40% of the global market. Generally, higher real income levels in US translates into higher demand for personal consumption items such as diamond jewellery and watches. Also increase in net worth has had a positive effect in the past on personal spending pattern especially on luxury items like diamond jewellery and watches. With rise in housing prices in the US and rise in stocks markets, the household net worth has seen a positive traction in 2016 and Q1 2017. Further decline in unemployment rate means higher job security which should lead to rise in personal consumption of the middle class buyers in US. However, a shift in personal spending pattern of the current generation more towards experiences, such as travel and holidays as against high value possessions may have reduced the extent of positive correlation between rise in income levels and rise in net worth vis-à-vis increase in diamond jewellery demand. In Q1 2017, the consumer demand in US was lower than expected by the retailers and which weighed in on the overall global jewellery demand.

China continues to be an important jewellery market (for both gold jewellery and diamond studded jewellery) on back of its large population and rising middle class. Also the purchases from unaccounted money was another driving factor. Gold jewellery demand from China (including Hong Kong) constitutes ~37% of the total gold jewellery demand. However, the jewellery demand growth rates in near to medium term may see a slowdown on back of the anti-corruption measures taken by the government in China, which has resulted in lower spending coupled with decline in the GDP growth rate of the country. Further, stricter travel norms and tighter control over gambling had redirected tourists away from Hong Kong and Macau to Europe and Japan. This resulted in lower demand from the tourists and contraction in the Hong Kong and Macau market for diamond studded jewellery in 2015. The sluggishness in demand for diamond studded jewellery continued through 2016 and Q1 2017. Gold jewellery consumption also exhibited a decline in China from peak levels in 2013. China's gold jewellery consumption (as per World Gold Council data) exhibited a ~17% decline (in volume terms) in 2016 over 2015. In 2015 too, the demand (in volume terms) had been lower by ~6% over the previous year. Europe and Japan showed some improvement in demand for diamond studded jewellery in local currency terms in 2015; however the same slowed down from Europe after Brexit.

India is relatively smaller market for diamond studded jewellery with only ~7% market share. However it is a key market for gold jewellery and constitutes ~27% of the global gold jewellery market. While gold jewellery demand (in volume terms) from India saw an improvement by ~5% y-o-y in 2015, the same exhibited a decline by ~24% y-o-y in 2016. An initial rush for gold following the policy announcement came to a swift halt in the ensuing cash crunch post 27tabilization27.

Midstream segment includes producers and traders of cut & polished diamonds. India and China constitute ~90% of the combined midstream segment market share due to the low cost structures. The midstream segment is highly sensitive to price volatility and demand-supply balance of rough and polished diamonds as they can only exert limited pressure over both ends i.e., suppliers and retailers. India constitutes the major share in the midstream segment primarily on account of its cost leadership and relatively more developed diamond industry financing infrastructure, with various forms of export and import credit available. Net exports of polished diamonds from India grew at a CAGR of ~15% between 2009 & 2014 in USD terms. China's exports in this segment on the other hand grew at a CAGR of ~5% between 2009 & 2014. China occupies a solid second position in the midstream segment on back of cost efficiency and high specialization in particular stone size and shapes.

Midstream players earn the lowest operating margins in the value chain. The operating margins for midstream players had witnessed a decline in 2015 on back of higher rough prices in early part of the year corroborated with lower demand and thus lower realizations for polished diamonds. Given this scenario, midstream players were seen offloading their rough diamond inventories in late 2015 to improve their cash flows. With correction in rough diamond prices in the early part of 2016 and with restocking of rough diamond inventory at the relatively lower price levels, the operating margins saw some improvement in 2016. However with demand for polished diamonds staying sluggish, the profit margins would continue to remain under pressure in 2017. Further Indian midstream players would also see some impact on margins due to change in their inventory purchase patterns and inventory holding patterns in the current year in anticipation of the change in the indirect taxes on back of the Goods & Services Tax (GST), which was implemented in the country on July 1, 2017.

Further access to finance for this segment of the value chain remains a key challenge given the high working capital requirement levels on back of high inventory days, high receivable days, low profit margins and raw material price volatility. Also lack of corporatization and high level of group entity transactions for midstream firms have been a further deterrent for banks & financial institutions in extending credit to this segment of the value chain.

Diamond studded jewellery manufacturing is scattered across geographies with mid-to-low range jewellery being primarily manufactured in India and China, whereas high-end jewellery manufactured and sourced mostly from Europe. This segment of the value chain is less susceptible to changes in the rough diamond prices and hence the operating margins are largely stable in the range of ~3% to 5%.

Retail segment in the diamond studded jewellery sector is regional in nature with very few international brands such as Cartier and Tiffany & Co. Most others are national or regional such as Signet in US, Tanishq in India, Chow Tai Fook in China, etc. This end of the value chain has the second highest level of operating profit margins across the diamond value chain. (~10% - 12%).

Exports from India:

Cut and polish diamond export constituted ~53% of the total gems & jewellery exports in value terms in FY17. Rough diamond exports formed ~3% of the total export value. In FY17, the total value of diamond exports grew by ~15% to ~Rs.1640 billion. (In USD terms, however the y-o-y growth in FY17 was at ~12%) For the previous two years, the diamond exports in rupee terms had exhibited a drop of ~6% and drop of ~4% in FY16 and FY15, respectively. In terms of carats, the diamond export growth in FY17 was much lower at ~3%. In the previous two years the diamond export in carat terms had exhibited a drop of ~8% and drop of ~11% in FY16 and FY15, respectively. Hong Kong continued to be the largest export destination, followed by USA. Belgium and UAE were other important export destinations in FY17.

Imports into India:

The total value of diamond imports grew by ~17% to ~Rs.1300 billion. The growth came on back of increase in rough diamond prices, increase in polished diamond exports and restocking of the reduced diamond inventory levels by midstream players seen in the previous year. In the previous two years, the diamond imports in rupee terms had exhibited a drop of ~12% and a drop of ~7% in FY16 and FY15, respectively. In terms of carats, the diamond imports also grew at much lower rate of ~5%. While, Belgium continued to be the key sourcing hub for diamond imports, its share saw a significant decline in FY17. Belgium’s share decline from ~39% of the total value of diamond imports in FY16 to ~26% of the total value of diamond import in FY17. UAE and Russia were two other important sourcing hubs, with Russia gaining importance in terms of share in FY17 over the previous year. In light of the shift in source, India has recently signed a memorandum of understanding (MoU) with Russia to source data

on diamond trade between the two countries. In future, India plans to establish a special zone with tax benefits for diamond import and trading in Mumbai, in an effort to develop the city as a competitor to Antwerp and Dubai which are currently the top trading hubs for diamonds.

Investments/Developments

The Gems and Jewellery sector is witnessing changes in consumer preferences due to adoption of western lifestyle. Consumers are demanding new designs and varieties in jewellery, and branded jewellers are able to fulfil their changing demands better than the local 30tabilizati players. Moreover, increase in per capita income has led to an increase in sales of jewellery, as jewellery is a status symbol in India.

The cumulative Foreign Direct Investment (FDI) inflows in diamond and gold ornaments in the period April 2000 – March 2017 were US\$ 895.96 million, according to Department of Industrial Policy and Promotion (DIPP). Some of the key investments in this industry are listed below.

- The International Institute of Diamond Grading & Research (IIDGR) has invested US\$ 5 million for expanding its synthetic diamond testing facility in Surat.
- Kalyan Jewellers plans to invest Rs 500 crore (US\$ 75 million) to add 15 new showrooms in 2017, to add to their on-going expansion in Northern and Eastern regions of India as well as expansion in West Asia.
- London's ultra-luxury jeweller for the super-rich, Faberge, owned by the world's top emeralds and rubies-miner Gemfields Plc., has decided to enter India; Delhi and Mumbai, India's economic hotspots will be Faberge's beachhead in the country, where the jeweller will sell its products by select trunk shows for the uber-rich.

Government Initiatives

- In the Union Budget 2017-18, the Government of India, offered tax cuts for the middle class and other sections of society (5 per cent for the Rs 250,000-500,000 tax slab; which was 10 per cent initially). All these measures will drive consumption, which will be favourable to the gems and jewellery industry.
- The Government of India's proposal to cut corporate tax rates to 25 per cent for micro, small and medium enterprises (MSMEs) having annual turnover up to Rs 50 crore (US\$ 7.5 million) will benefit a large number of gems and jewellery exporters from MSME category.
- The Government of India's announcement on establishing gold spot exchange could help in India's participation in determining gold price in the international markets.
- The 31tabilization31 move is encouraging people to use plastic money, debit/ credit cards for buying jewellery. This is good for the industry in the long run and will create more transparency.

Road Ahead

In the coming years, growth in Gems and Jewellery sector would be largely contributed by the development of large retailers/brands. Established brands are guiding the 31tabiliza market and are opening opportunities to grow. Increasing penetration of 31tabiliza players provides variety in terms of products and designs. Also, the relaxation of restrictions of gold import is likely to provide a fillip to the industry. The improvement in availability along with the reintroduction of low cost gold metal loans and likely 31tabilization of gold prices at lower levels is expected to drive volume growth for jewellers over short to medium term. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry.

INDUSTRY OVERVIEW

The information in this section has not been independently verified by us, the Lead Manager or any of our or their respective affiliates or advisors. The information may not be consistent with other information compiled by third parties within or outside India. Industry sources and publications generally state that the information contained therein has been obtained from sources it believes to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured. Industry and government publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Accordingly, investment decisions should not be based on such information.

The Indian Gems and Jewellery (G&J) sector is one of the largest in the world, contributing around 29 per cent to the global jewellery consumption. The sector provides employment to over 2.5 million and is home to over 300,000 gems and jewellery players. The Gems and Jewellery sector plays a significant role in the Indian economy, contributing around 6-7 per cent of the country's GDP. One of the fastest growing sectors, it is extremely export oriented and labour intensive.

Based on its potential for growth and value addition, the Government of India has declared the Gems and Jewellery sector as a focus area for export promotion. The Government has recently undertaken various measures to promote investments and to upgrade technology and skills to promote 'Brand India' in the international market.

India is deemed to be the hub of the global jewellery market because of its low costs and availability of high-skilled labour. India is the world's largest cutting and polishing centre for diamonds, with the cutting and polishing industry being well supported by government policies. Moreover, India exports 75 per cent of the world's polished diamonds, as per statistics from the Gems and Jewellery Export promotion Council (GJEPC). India's Gems and Jewellery sector has been contributing in a big way to the country's foreign exchange earnings (FEEs). The Government of India has viewed the sector as a thrust area for export promotion. The Indian government presently allows 100 per cent Foreign Direct Investment (FDI) in the sector through the automatic route.

Indians have always been connoisseurs of precious stones and ornaments. Trade secrets of the jewellery business have been handed down over generations, ensuring continuity of traditional craft. Thus, India is today the world's largest diamond cutting and polishing centre. India has been adding modern techniques to its traditional know how that are more in tune with global market trends.

Market size

The gems and jewellery market in India is home to more than 500,000 players, with the majority being small players.

India is one of the largest exporters of gems and jewellery and the industry is considered to play a vital role in the Indian economy as it contributes a major chunk to the total foreign reserves of the country. UAE, US, Russia, Singapore, Hong Kong, Latin America and China are the biggest importers of Indian jewellery. The demand for gold in India rose by 15 per cent year-on-year to reach 123.5 tonnes during January-March 2017, according to the World Gold Council (WGC). The Goods and Services Tax (GST) and monsoon will steer India's gold demand going forward.

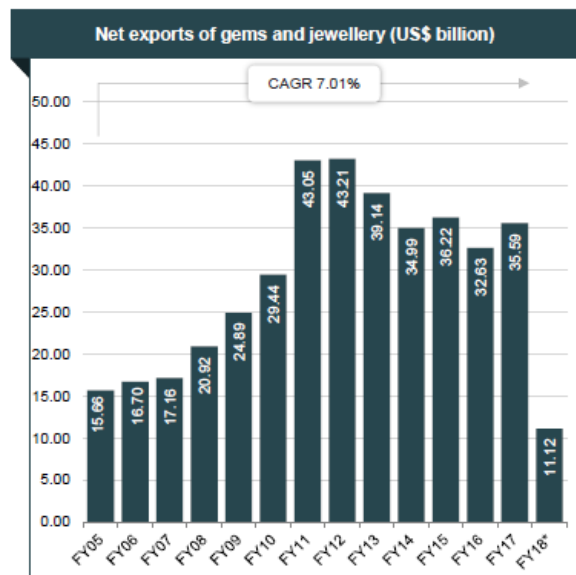

The overall net exports of Gems & Jewellery during April 2017 stood at US\$ 3.2 billion, whereas exports of cut and polished diamonds stood at US\$ 1.75 billion. Exports of gold coins and medallions stood at US\$ 553.59 million and silver jewellery export stood at US\$ 768.92 million during April 2017. India has become the second largest exporter of diamonds, gems and stones to China, as total exports grew by 28.48 per cent year-on-year to touch US\$ 2.48 billion in 2016, as stated by Mr Prakash Gupta, Consul General of India in Shanghai.

Global Gems & Jewellery Sector Overview:

The gems & jewellery market comprises the following segments:

- Diamond studded jewellery,
 - Gold jewellery,
 - Silver jewellery, and
 - Precious and semi-precious gemstones and its jewellery
- United States (US) and Japan primarily are markets for diamond studded jewellery, while China, India, Turkey and Middle East have traditionally displayed preference for gold jewellery, although the demand for diamond studded jewellery from these markets too have grown over the last decade.

The global gems and jewellery demand witnessed moderation in 2015 after exhibiting growth from 2012 to 2014. In 2015, global diamond studded jewellery demand was ~USD 79 billion after touching a high of ~USD 81 billion in 2014. The sluggishness in diamond studded jewellery demand continued even in 2016 with some improvement in the intermediate quarters of the year, but again dipped in Q1 2017. The year 2016 also saw a seven year low in global demand for gold jewellery. The global gold jewellery demand in 2016 was ~2040 tonnes compared with ~2400 tonnes in 2015, a drop of ~15% y-o-y.

Strong demand by middle-class buyers has spurred growth in the mainstream jewellery retail segment and it was the main contributor to an increase in US diamond jewellery sales over the last few years. High-end jewellery retailers did not see similar growth in demand from more affluent buyers.

US by far, is the largest market for diamond studded jewellery accounting for over 40% of the global market. Generally, higher real income levels in US translates into higher demand for personal consumption items such as diamond jewellery and watches. Also increase in net worth has had a positive effect in the past on personal spending pattern especially on luxury items like diamond jewellery and watches. With rise in housing prices in the US and rise in stocks markets, the household net worth has seen a positive traction in 2016 and Q1 2017. Further decline in unemployment rate means higher job security which should lead to rise in personal consumption of the middle class buyers in US. However, a shift in personal spending pattern of the current generation more towards experiences, such as travel and holidays as against high value possessions may have reduced the extent of positive correlation between rise in income levels and rise in net worth vis-à-vis increase in diamond jewellery demand. In Q1 2017, the consumer demand in US was lower than expected by the retailers and which weighed in on the overall global jewellery demand.

China continues to be an important jewellery market (for both gold jewellery and diamond studded jewellery) on back of its large population and rising middle class. Also the purchases from unaccounted money was another driving factor. Gold jewellery demand from China (including Hong Kong) constitutes ~37% of the total gold jewellery demand. However, the jewellery demand growth rates in near to medium term may see a slowdown on back of the anti-corruption measures taken by the government in China, which has resulted in lower spending coupled with decline in the GDP growth rate of the country. Further, stricter travel norms and tighter control over gambling had redirected tourists away from Hong Kong and Macau to Europe and Japan. This resulted in lower demand from the tourists and contraction in the Hong Kong and Macau market for diamond studded jewellery in 2015. The sluggishness in demand for diamond studded jewellery continued through 2016 and Q1 2017. Gold jewellery consumption also exhibited a decline in China from peak levels in 2013. China's gold jewellery consumption (as per World Gold Council data) exhibited a ~17% decline (in volume terms) in 2016 over 2015. In 2015 too, the demand (in volume terms) had been lower by ~6% over the previous year. Europe and Japan showed some improvement in demand for diamond studded jewellery in local currency terms in 2015; however the same slowed down from Europe after Brexit.

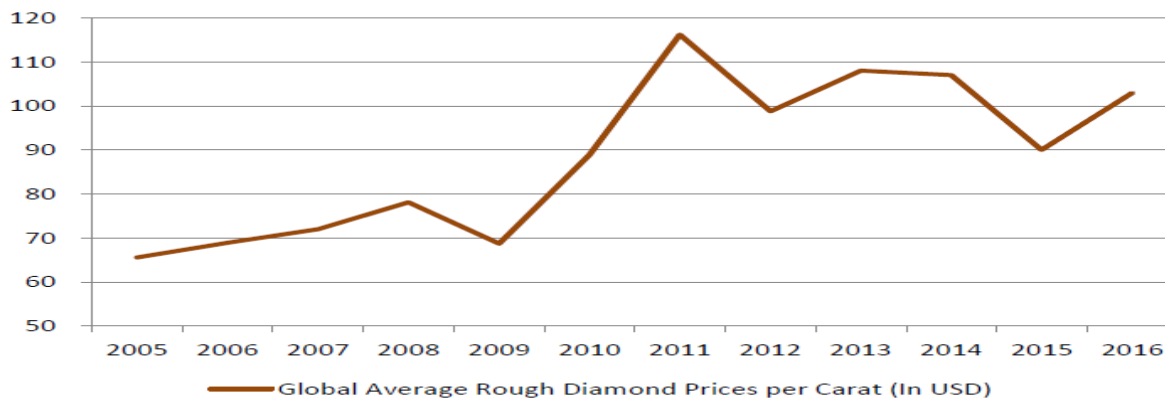

India is relatively smaller market for diamond studded jewellery with only ~7% market share. However it is a key market for gold jewellery and constitutes ~27% of the global gold jewellery market. While gold jewellery demand (in volume terms) from India saw an improvement by ~5% y-o-y in 2015, the same exhibited a decline by ~24% y-o-y in 2016. An initial rush for gold following the policy announcement came to a swift halt in the ensuing cash crunch post demonetisation.

Midstream segment includes producers and traders of cut & polished diamonds. India and China constitute ~90% of the combined midstream segment market share due to the low cost structures. The midstream segment is highly sensitive to price volatility and demand-supply balance of rough and polished diamonds as they can only exert limited pressure over both ends i.e., suppliers and retailers. India constitutes the major share in the midstream segment primarily on account of its cost leadership and relatively more developed diamond industry financing infrastructure, with various forms of export and import credit available. Net exports of polished diamonds from India grew at a CAGR of ~15% between 2009 & 2014 in USD terms. China's exports in this segment on the other hand grew at a CAGR of ~5% between 2009 & 2014. China occupies a solid second position in the midstream segment on back of cost efficiency and high specialization in particular stone size and shapes.

Midstream players earn the lowest operating margins in the value chain. The operating margins for midstream players had witnessed a decline in 2015 on back of higher rough prices in early part of the year corroborated with lower demand and thus lower realizations for polished diamonds. Given this scenario, midstream players were seen offloading their rough diamond inventories in late 2015 to improve their cash flows. With correction in rough diamond prices in the early part of 2016 and with restocking of rough diamond inventory at the relatively lower price levels, the operating margins saw some improvement in 2016. However with demand for polished diamonds staying sluggish, the profit margins would continue to remain under pressure in 2017. Further Indian midstream players would also see some impact on margins due to change in their inventory purchase patterns and inventory holding patterns in the current year in anticipation of the change in the indirect taxes on back of the Goods & Services Tax (GST), which was implemented in the country on July 1, 2017.

Further access to finance for this segment of the value chain remains a key challenge given the high working capital requirement levels on back of high inventory days, high receivable days, low profit margins and raw material price volatility. Also lack of corporatization and high level of group entity transactions for midstream firms have been a further deterrent for banks & financial institutions in extending credit to this segment of the value chain.

Diamond studded jewellery manufacturing is scattered across geographies with mid-to-low range jewellery being primarily manufactured in India and China, whereas high-end jewellery manufactured and sourced mostly from Europe. This segment of the value chain is less susceptible to changes in the rough diamond prices and hence the operating margins are largely stable in the range of ~3% to 5%.

Retail segment in the diamond studded jewellery sector is regional in nature with very few international brands such as Cartier and Tiffany & Co. Most others are national or regional such as Signet in US, Tanishq in India, Chow Tai Fook in China, etc. This end of the value chain has the second highest level of operating profit margins across the diamond value chain. (~10% - 12%).

Exports from India:

Cut and polish diamond export constituted ~53% of the total gems & jewellery exports in value terms in FY17. Rough diamond exports formed ~3% of the total export value. In FY17, the total value of diamond exports grew by ~15% to ~Rs.1640 billion. (In USD terms, however the y-o-y growth in FY17 was at ~12%) For the previous two years, the diamond exports in rupee terms had exhibited a drop of ~6% and drop of ~4% in FY16 and FY15, respectively. In terms of carats, the diamond export growth in FY17 was much lower at ~3%. In the previous two years the diamond export in carat terms had exhibited a drop of ~8% and drop of ~11% in FY16 and FY15, respectively. Hong Kong continued to be the largest export destination, followed by USA. Belgium and UAE were other important export destinations in FY17.

Imports into India:

The total value of diamond imports grew by ~17% to ~Rs.1300 billion. The growth came on back of increase in rough diamond prices, increase in polished diamond exports and restocking of the reduced diamond inventory levels by midstream players seen in the previous year. In the previous two years, the diamond imports in rupee terms had exhibited a drop of ~12% and a drop of ~7% in FY16 and FY15, respectively. In terms of carats, the diamond imports also grew at much lower rate of ~5%. While, Belgium continued to be the key sourcing hub for diamond imports, its share saw a significant decline in FY17. Belgium’s share decline from ~39% of the total value of diamond imports in FY16 to ~26% of the total value of diamond import in FY17. UAE and Russia were two other important sourcing hubs, with Russia gaining importance in terms of share in FY17 over the previous year. In light

of the shift in source, India has recently signed a memorandum of understanding (MoU) with Russia to source data on diamond trade between the two countries. In future, India plans to establish a special zone with tax benefits for diamond import and trading in Mumbai, in an effort to develop the city as a competitor to Antwerp and Dubai which are currently the top trading hubs for diamonds.

Investments/Developments

The Gems and Jewellery sector is witnessing changes in consumer preferences due to adoption of western lifestyle. Consumers are demanding new designs and varieties in jewellery, and branded jewellers are able to fulfil their changing demands better than the local unorganised players. Moreover, increase in per capita income has led to an increase in sales of jewellery, as jewellery is a status symbol in India.

The cumulative Foreign Direct Investment (FDI) inflows in diamond and gold ornaments in the period April 2000 - March 2017 were US\$ 895.96 million, according to Department of Industrial Policy and Promotion (DIPP). Some of the key investments in this industry are listed below.

- The International Institute of Diamond Grading & Research (IIDGR) has invested US\$ 5 million for expanding its synthetic diamond testing facility in Surat.
- Kalyan Jewellers plans to invest Rs 500 crore (US\$ 75 million) to add 15 new showrooms in 2017, to add to their on-going expansion in Northern and Eastern regions of India as well as expansion in West Asia.
- London's ultra-luxury jeweller for the super-rich, Faberge, owned by the world's top emeralds and rubies-miner Gemfields Plc., has decided to enter India; Delhi and Mumbai, India's economic hotspots will be Faberge's beachhead in the country, where the jeweller will sell its products by select trunk shows for the uber-rich.

Government Initiatives

- In the Union Budget 2017-18, the Government of India, offered tax cuts for the middle class and other sections of society (5 per cent for the Rs 250,000-500,000 tax slab; which was 10 per cent initially). All these measures will drive consumption, which will be favourable to the gems and jewellery industry.
- The Government of India's proposal to cut corporate tax rates to 25 per cent for micro, small and medium enterprises (MSMEs) having annual turnover up to Rs 50 crore (US\$ 7.5 million) will benefit a large number of gems and jewellery exporters from MSME category.
- The Government of India's announcement on establishing gold spot exchange could help in India's participation in determining gold price in the international markets.
- The demonetisation move is encouraging people to use plastic money, debit/ credit cards for buying jewellery. This is good for the industry in the long run and will create more transparency.

Road Ahead

In the coming years, growth in Gems and Jewellery sector would be largely contributed by the development of large retailers/brands. Established brands are guiding the organised market and are opening opportunities to grow. Increasing penetration of organised players provides variety in terms of products and designs. Also, the relaxation of restrictions of gold import is likely to provide a fillip to the industry. The improvement in availability along with the reintroduction of low cost gold metal loans and likely stabilisation of gold prices at lower levels is expected to drive volume growth for jewellers over short to medium term. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry.

MANUFACTURING PROCESS FOR OUR ROUGH AND POLISHED DIAMONDS

The process followed by for manufacturing process of our rough and polished diamonds is as below:-

PROCUREMENT OF ROUGH DIAMONDS:

The basis raw material procured by us is rough diamonds. The purchase of rough diamonds is based on the latest market trends and demand analyzed by our team. After carefully examining them in terms of cut, colour, clarity and carats, we execute the purchase orders.

ANALYSIS AND ASSORTMENT:

This is the initial stage of diamond manufacturing process. In this process expert checkers analyses the rough diamond and its characteristics are determined. These characteristics are based on Colour, Clarity, Carat, Cut (the 4 C's). After deciding 4 C's, it is given a grade, which represents overall quality of the rough diamond.

PLANNING AND MARKING:

Planning is a crucial step in diamond manufacturing. During this stage, the size and relative value of the cut stones that the rough diamonds will produce is determined. Rough diamonds need to be sorted on the basis of whether they are makeable or not, on the basis of colour, size etc. Non-make-able diamonds then need to be planned so as to reduce wastage and maximize yield.

CLEAVING OR SAWING:

Cleaving and sawing are the two different processes that come after the rough diamond is planned and marked. The rough diamond is analysed and sent to either cleaving or sawing department. A rough diamond needs to be broken into parts. This is done through either of the method, i.e. either through Cleaving or Sawing.

Cleaving is done manually with hammer, which split rough diamond into two or more parts. If the diamond needs sawing, then it is sent to sawing department. Laser technology is the latest and most advanced technology for sawing. Laser technology gives very accurate result. Planner rechecks the diamond after this process is complete. Once the planner decides where the diamond should be cut, the diamond is either manually cleaved or sawed. Sawing can be done with a diamond-coated rotary saw or a laser. Generally, small sized diamonds are signed manually. The rough diamonds which cannot be cleaved are sawed.

BRUTING:

Bruting forms the basic face-up outline of a round diamond to prepare it for faceting. During the bruting phase, the diamond being bruted is spun on a rotating lathe while another diamond is forced against it, gradually forming the rounded outline. Essentially, this gives shape to diamond in a way so that maximum yield can be taken.

POLISHING AND GRADING:

Polishing is the final step in the diamond manufacturing process. This step gives the diamond its brilliant sparkle that is the final look. The polisher is very careful at this process because a small mistake can result into quality loss of the diamond. In this process, the cut and polished diamond is boiled in a solution of hydrochloride and sulphuric acid to remove oil, diamond, powder and dirt. After completion of polishing, the smaller packets are put together in the original packet and sent for final inspection. During the entire process, strict quality control measures are taken and the diamond passes through a computerized network which keeps track of every single diamond. After completing the polishing, polish checker has to check every facets of the stone to finalise the excellent cut grade. From here, the polished diamonds goes to the grading department. Here the 4 C's of diamonds are decided and the appropriate grading is given to the diamonds. The graded parameters are noted down for each diamond.

Goods and Services Tax Act, 2017 (the “GST Act”)

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realize the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer. Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India - Arun Jaitley. This Act has been made applicable with effect from 1st July 2017.

With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus there will be a comprehensive and continuous mechanism of tax credits.

The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services.

India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax, therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

Value Added Tax (“VAT”) Act and Rules, 2008

The levy of Sales Tax within the state is governed by the Value Added Tax Act and Rules 2008 (—the VAT Act) of the respective states. The VAT Act has addressed the problem of Cascading effect (double taxation) that were being levied under the hitherto system of sales tax. Under the current regime of VAT the trader of goods has to pay the tax (VAT) only on the Value added on the goods sold. Hence, VAT is a multi-point levy on each of the entities in the supply chain with the facility of set-off of input tax—that is the tax paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. Only the value addition in the hands of each of the entities is subject to tax. Periodical returns are required to be filed with the VAT Department of the respective States by the company.

Gujarat Value Added Tax Act, 2003 (GVAT)

Gujarat Value Added Tax, 2003 (GVAT Act) is made effective in the state of Gujarat from 1st April, 2006. On its implementation following Acts are repealed.

- The Gujarat Sales Tax Act, 1969,
- The Bombay Sales of Motor Spirit Taxation Act, 1958,
- The Purchase Tax on Sugarcane Act, 1989.

However, provisions relating to pending assessment, appeals, recovery etc., under the above Acts will survive. The basic requirement of charging tax under GVAT Act is that where any sale in the course of business is affected, in the State of Gujarat, VAT is payable under GVAT Act. Transactions made in the course of business only are covered under the GVAT Act.

The Central Excise Act, 1944

The Central Excise Act, 1944 (Central Excise Act) consolidates and amends the law relating to Central Duties of Excise on goods manufactured or produced in India. Excisable goods under the Act means goods specified in the Schedule to the Central Excise Tariff Act, 1985 as being subject to duty of excise. Factory means any premises, including the precincts thereof, wherein or in any part of which excisable goods are manufactured, or wherein or in any part of which any manufacturing process connected with the production of these goods being carried on or is ordinarily carried out. Under the Act a duty of excise is levied on all excisable goods, which are produced or manufactured in India as and at the rates, set forth in the First Schedule to the Central Excise Tariff Act, 1985.

INTELLECTUAL PROPERTY RIGHTS LEGISLATIONS

The laws relating to intellectual property will also apply to the Company.

The Trade Marks Act, 1999

The Trade Marks Act, 1999 (“Trademark Act”) governs the statutory protection of trademarks in India. In India, trademarks enjoy protection under both statutory and common law. Indian trademarks law permits the registration of trademarks for goods and services. Certification trademarks and collective marks are also registrable under the Trade Mark Act. An application for trademark registration may be made by any person claiming to be the proprietor of a trademark and can be made on the basis of either current use or intention to use a trademark in the future. The registration of certain types of trademarks is absolutely prohibited, including trademarks that are not distinctive and which indicate the kind or quality of the goods.

Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for 10 years unless cancelled. If not renewed after 10 years, the mark lapses and the registration for such mark has to be obtained afresh.

While both registered and unregistered trademarks are protected under Indian law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. Registered trademarks may be protected by means of an action for infringement, whereas unregistered trademarks may only be protected by means of the common law remedy of passing off. In case of the latter, the plaintiff must, prior to proving passing off, first prove that he is the owner of the trademark concerned. In contrast, the owner of a registered trademark is prima facie regarded as the owner of the mark by virtue of the registration obtained.

The Patents Act, 1970

The Patents Act, 1970 (‘Patents Act’) is the primary legislation governing patent protection in India. In addition to broadly requiring that an invention satisfy the requirements of novelty, utility and non obviousness in order for it to avail patent protection, the Patents Act further provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. The term of a patent granted under the

Patents Act is for a period of twenty years from the date of filing of application for the patent. The Patents Act deems that computer programs per se are not ‘inventions’ and are therefore, not entitled to patent protection. This position was diluted by The Patents Amendment Ordinance, 2004, which included as patentable subject matter:

1. Technical applications of computer programs to industry; and
2. Combinations of computer programs with the hardware.

However, the Patents Amendment Act, 2005, does not include this specific amendment and consequently, the Patents Act, as it currently stands, disentitles computer programs per se from patent, may disentitle the said invention to patent protection on grounds of lack of novelty. Under the Patents Act, an invention will be regarded as having ceased to be novel (and hence not patentable), inter alia, by the existence of:

1. Any earlier patent on such invention in any country;
2. Prior publication of information relating to such invention;
3. An earlier product showing the same invention; or
4. A prior disclosure or use of the invention that is sought to be patented.

Following its amendment by the Patents Amendment Act, 2005, the Patents Act permits opposition to grant of a patent to be made, both pre-grant and post-grant. The grounds for such patent opposition proceedings, inter alia, include lack of novelty, inventiveness and industrial applicability, non-disclosure or incorrect mention of source and geographical origin of biological material used in the invention and anticipation of invention by knowledge (oral or otherwise) available within any local or indigenous community in India or elsewhere. The Patents Act also prohibits any person resident in India from applying for patent for an invention outside India without making an application for the invention in India. Following a patent application in India, a resident must wait for six weeks prior to making a foreign application or may obtain the written permission of the Controller of Patents to make foreign applications prior to this six week period. The Controller of Patents is required to obtain the prior consent of the Central Government before granting any such permission in respect of inventions relevant for defense purpose or atomic energy. This prohibition on foreign applications does not apply, however, to an invention for which a patent application has first been filed in a country outside India by a person resident outside India.

The Designs Act, 2000

Designs are protected in India under the Designs Act, 2000 (“**Design Act**”) read with the Design Rules, 2011, as amended from time to time. A design means the features of shape, configuration, pattern, ornament or composition of lines or colours applied to any article whether two dimensional or three dimensional or in both forms, by any industrial process or means, whether manual, mechanical or chemical, separate or combined, provided that the design is new or original, distinguishable from known designs, must be applicable on an article such as paper and be appealing to the eye, not containing any scandalous or obscene matter, is not merely a mechanical contrivance and is not contrary to public order or morality. India has adopted the Locarno Classification of industrial designs. Any design that is registered is valid for a period of ten years which is extendable for another five years from the date of expiration of the original registration.

Copyright Act, 1957

The Copyright Act, 1957 (“**Copyright Act**”) protects original literary, dramatic, musical and artistic works, Cinematographic films and sound recordings from unauthorized use of such works. Unlike the case with patents, copyright protects the expressions and not the ideas. There is no copyright in an idea. The object of copyright law is to encourage authors, artists and composers to create original works by rewarding them with exclusive right for a fixed period to reproduce the works for commercial exploitation. Copyrights subsist in following class of works:

- a) Original literary, musical, dramatic and artistic works
- b) Cinematograph films
- c) Sound recordings

Under the copyright law the creator of the original expression in a work is its author who is vested with a set of exclusive rights with respect to the use and exploitation of the work. The author is also the owner of the copyright, unless there is a written agreement by which the author assigns the copyright to another person or entity, such as a publisher, where work is done under a ‘work for hire’ agreement, the copyright vests with the hirer, i.e., the person providing the work. The owner of copyright in a work can assign or license his copyright to any person, such as

publisher, under a written agreement. Copyright subsists in a work since the time it comes into being. Therefore, registration of copyright neither creates any rights nor precludes enforcement of the existing ones. However, owing to its evidentiary value, a registered copyright is easier to establish in the court of law. The term of copyright varies across different types of works. In the case of broadcasts, the Act grants “broadcast reproduction rights” to broadcasting organizations which subsist for 25 years.

SECTION XI - RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act or any state securities laws in the United States and, unless so registered, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and in accordance with any applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications made by them does not exceed the applicable limits or in any way lead to violation of laws or regulations applicable to them.
