SECTION III – SUMMARY OF THE ISSUE DOCUMENT

Overview of the Industry

Overview of the Specialty Chemical Industry:

The chemicals industry can be classified based on various parameters such as value addition (basic/specialty), end-use (water treatment/construction/agrochemicals), process (batch/continuous), etc. If we focus on value addition, the chemicals industry can be classified into two broad segments -basic and specialty.

Basic chemicals are generally high-volume and low-value products that are sold to other industries for further processing. Typically, basic chemicals are more likely to be manufactured in continuous process plants and there is no major product differentiation among several manufacturers. Sales of basic chemicals are primarily driven by price.

On the other hand, specialty chemicals are low-volume and high-value products sold on the basis of their quality or utility, rather than composition. Thus, they may be used primarily as additives or to provide a specific attribute to the end product.

Specialty chemicals are more likely to be prepared and processed in batches. The focus is on value addition to the end-product and the properties or technical specifications of the chemical. Specialty chemicals are an important group, but classifying a particular chemical as 'basic' or 'specialty' has been somewhat contentious.

Source: <https://www.jmfl.com/docs/default-source/default-document-library/indian-specialty-chemicals---growth-catalysts.pdf?sfvrsn=0>

Specialty Chemicals are a group of “relatively high value low volume chemicals, known for its end use performance enhancing applications”. They are recognized for “what they do” rather than “what they are” as in the case of Basic Chemicals. They provide “solutions “to customer applications, are knowledge based and known to deliver much more returns as compared to Basic chemicals. The critical success in this industry depends upon understanding customer’s needs and product/application development to meet the same at a favorable price-performance ratio.

Specialty chemicals are mainly used to add value to the finished product, they are primarily sold on a B2B basis. Specialty chemicals can be further divided into various sub-segments on the basis of end-use and application. In this report, we have classified specialty chemicals into ten sub-segments. These sub-segments are **1) Agrochemicals, 2) Colourants, 3) Construction chemicals, 4) Flavours & Fragrances, 5) Paints & Coatings, 6) Personal care, 7) Polymer additives, 8) Surfactants, 9) Textile chemicals and 10) Water treatment chemicals.**

An overview of the global specialty chemicals industry

Globally, the chemical industry recorded sales of c.USD 4.3trn in FY15, of which specialty chemicals (including agrochemicals) recorded sales of c.USD 829bn (or c.20% of the global chemical industry sales). Industry estimates indicate that the chemical industry could record a CAGR of c.5.4% to reach c.USD 5.6trn by end- FY20, while specialty chemicals could grow at a slightly faster rate, recording c.5.8% CAGR to reach USD 1.1trn by end -FY20.

Asia-Pacific had the highest market share of around 42% of global specialty chemicals market in 2017. The electronics market of Asia-Pacific has experienced a surge in the recent past with innovations and advanced technology implementations, driving the specialty chemicals market in the region. The major sealants manufacturing companies have their manufacturing plants in China, which accounts for 59% of the Asia-Pacific region. All the above factors, when added up with high development in manufacturing and construction industry, helps the Asia-Pacific region to dominate the market, as these are major consumers of specialty chemicals.

An overview of the Indian specialty chemicals industry

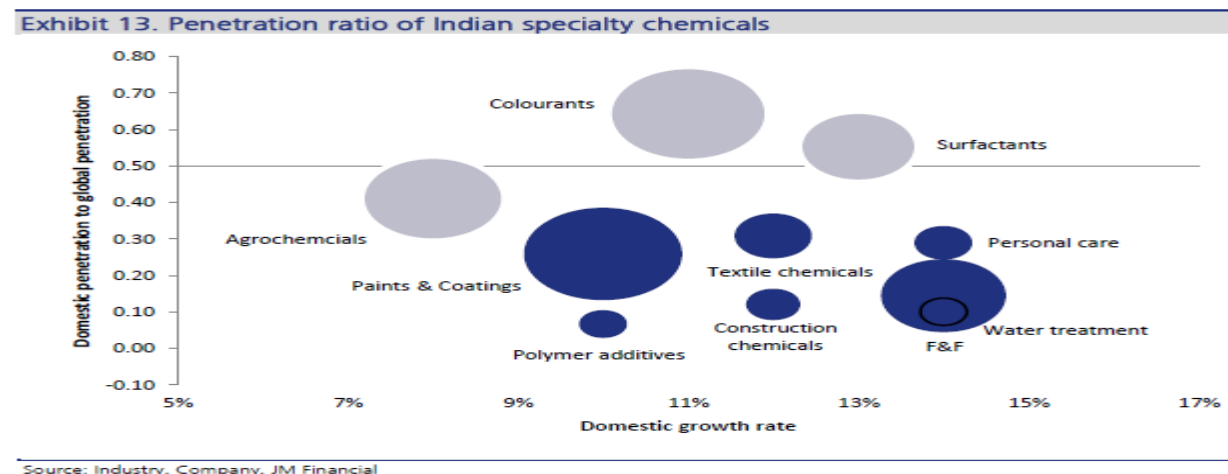

In FY15, Indian chemical industry’s revenue was c.USD 147bn, implying a less-than-4% share of the global chemical industry (c. USD 4.3trn). This is despite strong CAGR of c.13% during FY10-FY15. The Indian specialty chemicals industry at c.USD 28bn (Exhibit 4) accounted for c.3.4% of the global specialty chemicals industry and c.20% of the Indian chemical industry in FY15. The Indian specialty chemicals industry reported annual growth of 14% during FY10-FY15 implying that growth in specialty chemicals was slightly stronger than growth in the overall chemicals industry.

According to TSMG-FICCI, specialty chemicals industry could grow c.13% per annum during FY15-FY20 (on the back of increasing consumption and high growth in end-use industries), leading to a market size of c.USD 52bn by 2020. If India's specialty chemicals industry grows at 13% as estimated above, against the global growth rate of c.6%, India's share in the specialty chemicals global market could increase to c.5% by end-FY20 from c.3.4% in FY15.

Among specialty chemicals sub-segments, water treatment, polymer additives, flavours & fragrances and construction chemicals have a lower penetration ratio (<0.15). With increased focus on improving the quality of construction, per capita consumption of specialty chemicals in India could grow faster than the industry rate. Thus, a rapidly expanding end-use industry, coupled with low penetration, would help specialty chemicals grow faster than the end-use industry.

7. ***The company has registered for various Trade Marks. However, the same is under objection, abandoned or opposed or in process. Any delay in removing the objection or granting registration could result in loss of brand equity and the company's right to use the said brand.***

Our Company had an application with the Trade Marks Registry for registering their 48 products including their company name and company logo. Out of these 48 products, as per the Trade Marks Registry, 9 products have been registered, 14 products have been accepted and advertised by the company, 4 products have been abandoned, 1 products have been opposed and 20 products including the company's name and logo are under objection. Further, most of the products are either registered under the name of Mr. Hemal V. Mehta or Sachin V. For further details on Intellectual Property Rights, please refer chapter titled '***Government and Other Approvals***' beginning on page no. 225 of this Draft Prospectus.

While still the application is under process, if the same is not accepted or registration is not granted or the Promoters- Mr. Hemal V. Mehta and Sachin V. Mehta decide to withdraw their NOC in the future, then our company may lose the statutory protection available to it under the Trade Marks Act, 1999 for such trademarks, as otherwise available for registered trademarks in future could have a material adverse effect on our business, which in turn could adversely affect our results of operations.

8. ***We operate in overseas markets and may, in future, continue to access markets which are new tous. Our limited experience in facing entry barriers including stringent regulatory requirements in such markets, may adversely affect our business, financial conditions and results of operations.***

As on date of the Draft Prospectus, we have made 14 applications for registration of our formulations in the International Markets. However, as on the date of filing this Draft Prospectus, our company has yet to receive an approval of registration for the same. We cannot guarantee that we will obtain such approvals. If we fail to obtain such approvals, licenses, registrations and permissions, in a timely and cost efficient manner or at all, our business, prospects, results of operations and financial condition could be adversely affected. In addition, if we fail to comply with applicable statutory or regulatory requirements, there could be a delay in the submission or grant of approval for marketing new products. Moreover, if we fail to comply with the conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products. We may also be required to defend our applications in a legal proceeding or otherwise, which may lead to an increase in time or costs for obtaining such approvals.

9. ***We have not entered into any long-term contracts with any of our suppliers and / or customers and orders are not backed-up by a letter of credit facility.***

We do not have any long-term contracts with our suppliers and / or customers and any change in the selling or buying pattern of the suppliers and/ or customers could adversely affect the business of our Company. Although we have satisfactory business relations with our suppliers and / or customers and have received continued business from them in the past, there is no certainty that the same will continue in the years to come and may affect our profitability.

10. ***We have not entered into any long-term agreements with our suppliers with whom we deal on Principal to Principal basis and accordingly may face disruptions in supply from our current suppliers.***

We procure our Pharma formulations products from 15 manufacturers located in the domestic markets. Though we prefer to deal with a fixed set of suppliers with whom we have cordial relationships, however, we have not entered into any fixed supply agreement or MoU or any other arrangement with any of our suppliers. We typically transact on an invoice basis for each order. These suppliers have accorded their trust and service based on our long operating history in the industry, our credit worthiness, and our goodwill. However, in the absence of written agreements, our suppliers are not bound to supply goods to us and can withdraw their commitments from us at any time. There can be no assurance that there will not be a significant disruption in the supply of products from current sources, or, in the event of a disruption, that we would be able to locate alternative

suppliers of the products of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices.

Further, our units are situated in varied locations in Maharashtra and Gujarat and many of our suppliers are able to provide us products at competitive rates due to our unit's proximity and savings of freight. In case any of these suppliers discontinue their relationship with us, we may have to procure the products from other locations leading to additional costs on transportation. Also, we cannot assure that our product supply will not face disruption due to increased lead time for supply of products leading to either disruption in our operational activity or a complete stopping of the same. Certain products may be of a sensitive nature and their supply may be regulated by various government / regulatory authority. If we are unable to maintain our relationship with our current product suppliers it may prove difficult to obtain the same from other regulated players.

Any delay, interruption or increased cost in the supply of products thereof arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

11. The operations of our Company are subject to manufacturing risk and may be disrupted by failure in the facilities.

Our Company is subject to operating risks associated with manufacturing and contract manufacturing. Our Company has entered into contract manufacturing agreements with four pharmaceutical companies for manufacturing pharma formulation and generic pharma product- tablets, capsules, dry powder, dry injections powder, liquids, Injections & dry injections for our own brands. Our contract manufacturing agreements enter into contract manufacturing agreements for periods ranging from one to three years with the manufacturer of Pharma products. For details, please refer to the chapter titles "***Business Overview***" beginning on page no. 118 of this Draft Prospectus.

Further, our Promoters are first generation entrepreneurs who are entering venturing into the manufacturing activities for first time and have not past experience in manufacturing activities. Due to no past experience, our company and manufacturing facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, earthquakes, other natural disasters and industrial accidents. They are also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. The occurrence of any of these aforesaid events may result in delay delivery our products and could have a material adverse effect on our business, financial condition and results of operations.

Further, since the contract manufacturing agreements are for a period of 1-3 years and any non-compliance by us in relation to any terms may result in the termination of the agreement and consequently we have to fend for any pharma manufacturer. We also cannot assure you that manufacturer will not terminate the agreement before its expiry period or may refuse to accept our orders or supply or manufacture our products or cause delay in accepting our orders, in supplying or in manufacturing our products, which would lead to either us sell low quality products or cancel orders or find alternatives solutions which not be as per our company policies and this may have an adverse effect on our conducting our business operations thereby affecting our source of revenues.

12. The Company is yet to place orders for 100% of the plant & machinery and equipments for some of our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of such plant & machinery and equipments may delay our implementation schedule and may also lead to increase in price of these plant & machineries and equipments, further affecting our revenue and profitability.

Although we have identified the type of plant and machineries and equipments required to be bought for our set up of our manufacturing unit at Wada, we are yet to place orders for 100% of the plant & machinery worth Rs. 493.40 Lakhs and equipments worth Rs. 131.60 Lakhs, as detailed in the "***Objects of the Issue***" beginning on page 80 of this Draft Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management's views of the desirability of current plans, change in supplier of equipments, among others, which may have an adverse effect

on our business and results of operations. Further, we cannot assure that we would be able to procure these plant and machinery, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun in the implementation of the Project, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled "Objects of the Issue" beginning on page 80 of this Draft Prospectus.

13. ***Delay in schedule of implementation of setting up the manufacturing facility, our corporate office and Distribution and Warehousing Centre's may subject our Company to risks related to time and cost overrun which may have a material adverse effect on our business, results of operations and financial condition.***

Our Company is currently proposing to set up a manufacturing facility at Wada. We also propose to set up our corporate office and distribution and warehouse centres. For further details regarding to our proposed setting up manufacturing facility, corporate office and distribution and warehouse centres, please refer the chapter titled "Objects of the Issue" on page no. 80 of this Draft Prospectus. We may face risks relating to the setting up of our the manufacturing facility and building of our corporate office and distribution and warehouse centres, complete the projects within our estimated budget, appointment of the contractors, failure of our contractors and suppliers to adhere to our specifications and timelines, and changes in the general economic and financial conditions in India. We have limited control over the timing and quality of services, equipment or other supplies from third party contractors and/or consultants appointed by us, and we may be required to incur additional unanticipated costs to remedy any defect or default in their services or products to ensure that the planned timelines are adhered to. Further as and when we complete our project work, our material requirements and costs as well as our staffing requirements and employee expenses may increase and we may face other challenges in extending our financial and other controls to our unit managing our consequent growth.

In the event that the risks and uncertainties discussed above or any other unanticipated risks, uncertainties, contingencies or other events or circumstances limit or delay our efforts to use the Net Proceeds to achieve the planned growth in our business, the use of the Net Proceeds for purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of your investment in our Equity Shares.

14. ***Any manufacturing or quality control problems may damage our reputation for high quality products and expose us to litigation or other liabilities, which could adversely affect our financial results.***

Pharmaceutical manufacturers are subject to significant regulatory scrutiny. Our manufacturing facilities at Baddi must manufacture products in accordance with Good Manufacturing Practices, state level food and drug administrations and other regulatory agencies, as applicable.

Furthermore, we are liable for the quality of our products for the entire duration of the shelf life of the product. We also manufacture products on behalf of certain third parties who then market such products under their own brand. After our products reach the market, certain developments could adversely affect demand for our products, including any contamination of our products by intermediaries, re-review of products that are already marketed, new scientific information, greater scrutiny in advertising and promotion, the discovery of previously unknown side effects or the recall or loss of approval of products that we manufacture, market or sell.

Disputes over non-conformity of our products with such quality standards or specifications are generally referred to independent government approved testing laboratories. If any such independent laboratory confirms that our products do not conform to the prescribed or agreed standards and specifications, we would bear the expenses of replacing and testing such products, which could adversely affect our business, results of operations and financial condition.

We also face the risk of loss resulting from, and the adverse publicity associated with, manufacturing or quality problems. Such adverse publicity harms the brand image of our Company and products. We may be subject to claims resulting from manufacturing defects or negligence in storage and handling of our products. Any loss of our reputation or brand image, for whatsoever reason may lead to a loss of existing business contracts and adversely affect our ability to enter into additional business contracts in the future. We currently carry no products liability insurance with respect to our manufactured products.

15. ***Any disruption in production at, or shutdown of our sole processing facility could adversely affect our business, results of operations and financial condition.***

We would be setting a manufacturing facilities which will be situated at Wada. We would be manufacturing various products in the form of tablets, capsules, oral syrups and liquids etc. Our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, and industrial accidents and similar events. Further, our manufacturing facility is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

16. We operate in the pharmaceutical industry which is a highly regulated sector and if we fail to comply with the regulations prescribed by the authorities of the jurisdictions in which we operate, our business, results of operations, cash flows and financial condition could be adversely affected.

Our operations of API, Intermediate and FDF manufacturing are operated in a highly regulated sector and are subject to extensive regulations and stringent quality standards. We are required to obtain specific registration from the Food and Drug Administration (FDA) for the sale and manufacture of the Active Pharmaceutical Ingredients / Bulk Drugs, Intermediate products and the Finished Dosage Formulations. The registration requires our Company to comply with all provisions of the various acts enforceable by the FDA, most of which are stringent and they may continue to be stricter in the future. The penalties for non-compliance with these regulations can vary from revocation or suspension of the registration to imposition of fines or confiscation of the products manufactured, stored or sold.

Further, we would be setting up a manufacturing unit in Wada, where a wide range of Formulations will be manufactured including Tablets, Capsules, Liquids, Orals etc. This facility is well equipped to manufacture variety of products and any new variety of Tablets, Capsules, Liquids, Orals etc may require additional approvals from the relevant authority. We cannot guarantee that we will obtain such approvals. Also, we may not be able to renew our existing FDA approval upon expiry of the same. Any delay or inability to obtain, renew the FDA approval may render our ability to carry on with our business activities. Further, we are subject to additional risks in relation to complying with a wide variety of local laws, including restrictions on the import and export of certain chemicals and ingredients. Additionally, regulatory and procedural requirements are subject to change and as a result, may, at times, be unclear or inconsistent. Consequently, there is an increased risk that we may inadvertently fail to comply with such regulations or procedures, which could lead to a variety of sanctions being imposed by the relevant authorities, as well as withholding or delay in receipt of regulatory approvals for the existing as well as proposed APIs. Further, any adverse change in the regulatory environment in the future may subject us to increased obligations and may adversely affect our business, cash flows and results of operations.

Further, API, Intermediate and FDF manufacturing requires to be manufactured in a prescribed quality as laid down by the FDA, GMP, FSSAI, ISO, any local and international laws and other applicable regulatory authorities. If our manufacturing process and products do not match with the regulations as laid down by the authorities, this may lead to cancellation or stoppage or delay in manufacturing or supplying our products. This may lead to increase in our expenditure and thereby reducing our revenues and margins or cancellation of orders or loss of suppliers and customers.

17. Changes in pricing policy of various brands and products by the original manufacturer may affect the pricing for the goods acquired by us for distribution as we may not be able to always absorb the same.

We enter into distribution agreements with various brands and sell them through different e-commerce platforms and through the offline network of traders and stockiests. These brand agreements have a specific pricing clause and our Company is required to price the goods to our customers in accordance with the set terms. However, the original manufacturers and / or vendors may change the pricing of their products due to conditions inherent to their operations, which may affect our ability to sell the goods. If the price is lowered by the original manufacturers / vendors, we may have to lower the price too, thus affecting our profitability and financial results. Further, we are not able to lower the price simultaneously; our customers may opt for our competitors who were able to absorb the price reduction. This may affect not only our current transaction, but

also our future relation with these customers, as they may prefer our competitors for all their future trades. Losing our customers could adversely affect our business operations and financial condition.

Further, in case of a price hike by the original manufacturers / vendors, we may not be able to successfully replicate the said hike, due to various reasons like earlier commitments given to our customers, deals signed before the price hike information was received and / or to stay ahead in the competitive market scenario. In any of the above cases, we stand to lose the opportunity to improve our margins and our profitability. Also, the original manufacturers / vendors may object to our selling the product at a lower cost, thus affecting their brand image. The vendors may terminate our supply agreement or may not be willing to renew the same upon expiration, both of which will adversely affect our ability to maintain the supply and also lose the brand as part of our product. If any of the above were to occur, it may affect our liquidity and our ability to finance planned product and geographical expansion and our business operations and financial condition will be negatively affected.

18. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

For our business operations, our results of operations are dependent on our ability to effectively manage our inventory. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of merchandise or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or purchase, we may be required to recycle our inventory, which would have an adverse impact on our income and cash flows.

19. *We are dependent upon key suppliers for supplying the products and any disruption in their supply could disrupt our business and adversely affect our financial results.*

For financial year ending March 31, 2018 and 2017, our major suppliers have accounted approximately 53.20 % and 60.11% of our total purchases/ cost of goods, respectively. Daril Impex Pvt Ltd, Tetrahedron Labs Pvt Ltd and Surmount Labs Pvt Ltd. are some of the suppliers who significantly towards our total product cost. We purchase our products from various suppliers on either pre-agreed rates or flexible rates linked to the prevailing market benchmark. However, we do not enter into any long term agreements with our suppliers and our arrangements with them are on short-term and spot basis. Hence, there is no assurance that in future also we will be able to source our products on timely basis and execute our orders on time or find alternative resources to source our products. Further, if we are unable to source our products at commercially acceptable prices, or at all, it may affect our ability to fulfill our supply commitments, or to fulfill them in an economical manner, which will have an adverse effect on our business, financial condition and results of operations.

20. *Termination or non-renewal of Distribution Agreements or any material modification to the existing terms under such agreements adverse to our interest will materially and adversely affect our ability to continue our business and operations and our future financial performance.*

Our Company is engaged in the business of distribution and trading of a variety of products in API, Intermediate and FDF. Our Company has partnered with 77 distributors/trade partners as on August 31, 2018 and have tied up with C&Fs (carrying & forwarding agents) at 5 States with two central warehouses at Bhiwandi in Mumbai and Baddi in Himachal Pradesh for marketing and distributing our products across India. Our Company generally enters into agreements with the distributors/trade partners for 5 years. The Distribution Agreements with various partners may be renewed, at the discretion of partners, for successive terms as mentioned in respective agreements.

Under the Agreements entered, the partners are entitled to unilaterally terminate such agreements by providing written notice. Additionally, under certain of the Agreements, certain of the partners also have the right to unilaterally terminate such agreements with immediate effect. In the event that our partners exercises their right to terminate these agreements whether on the occurrence of any such aforesaid events or otherwise, or, on expiry of the term of such agreements, or in the event the partners are unwilling to renew such agreements or imposes terms less favourable to us than existing terms, it may materially and adversely affect our ability to carry on our business operations and our future financial performance.

Many of the local brands with whom we partner, may not renew our agreement after the expiry period but continue the licensed business for the pre-decided territories on oral basis. Though we continue our business transactions on the basis of cordial relations, we cannot assure that they will not abruptly cease our supply and / or they will not engage other distributors who offer them better terms. Also, such vendors may claim penalty for non-renewal and revised terms at a later date which may hamper our relations with such vendors and also affect our business operations and financial performance.

In addition, our agreements may be on a non-exclusive basis and the partners are entitled to undertake the production, distribution or sale of the products and brand either themselves or appoint other third party franchisees for these territories and sub-territories licensed to us. Although, our partners have in the past renewed such agreements in our favour, and also granted distribution for additional territories and sub territories to us, there can be no assurance that in the future the partners will not terminate or discontinue our arrangements for cause, including any failure by us to meet performance standards or any breach by us of applicable terms and conditions under such agreements, or without cause, and undertake distribution activities directly or through other franchises in our licensed territories and sub territories.

- 23. We are involved in high volume – low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.***

Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results and financial conditions. Due to the nature and varied categories of the products we sell, we may not be able to charge higher margins for our products. Hence, our business model is heavily reliant on our ability to effectively increase sale of value business products and / or grow our turnover and manage our key processes including but not limited to order procurement, timely order execution, effectively delivery monitoring and continuous cost control of non-core activities. The distribution & trading industry is highly competitive, coupled with the large number of players and also the existence of unorganised players. Also, several national and international manufacturers and brand owners have set-up their own distribution arms in India. With the high level of competition, our results of operations are sensitive to, and may be materially and adversely affected by, competitive pricing, services offered, brand recognition and other factors. Competition may result in pricing pressure, reduced profit margin or a failure to increase our market share, any of which could substantially harm our business and results of our operations.

We compete directly against national and local distributors of a variety of products, who are traders with substantial market share as well as established vendors with a substantial stockist network as well as retailers and regional competitors in each of the region of our trade. Many of our competitors are established companies with strong brand recognition and a high number of product distribution agreements. However, the trading and distribution industry is fragmented in various regions of the country are still dominated by unorganized and local traders and stockists. In addition, if we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected.

- 32. The products that we commercialize may not perform as expected which could adversely affect our business, financial condition and results of operations.**

Our success depends significantly on our ability to commercialize new pharmaceutical products in India and across various markets around the world. Commercialization requires us to successfully develop, test, manufacture and obtain the required regulatory approvals for our products, while complying with applicable regulatory and safety standards. In order to develop a commercially viable product, we must demonstrate, through extensive trials that the products are safe and effective for use in humans. Our products currently under development, if and when fully developed and tested, may not perform as we expect, necessary regulatory approvals may not be obtained in a timely manner, if at all, and we may not be able to successfully and profitably produce and market such products.

Furthermore, even if we are successful in developing a new product, that product may become subject to litigation by third parties claiming our products infringe on their patents or may be seized in-transit by regulatory authorities for alleged infringement of intellectual property or may be otherwise unsuccessful in the market place due to the introduction of superior products by competitors. Moreover, it may take an extended period of time for our new products to gain market acceptance, if at all.

33. *The availability of counterfeit drugs, such as drugs passed off by others as our products, could adversely affect our goodwill and results of operations.*

Entities in India and abroad could pass off their own products as ours, including counterfeit or pirated products. For example, certain entities could imitate our brand name, packaging materials or attempt to create look-alike products. As a result, our market share could be reduced due to replacement of demand for our products and adversely affect our goodwill. We may also require to invest in our products to prevent counterfeit versions of our products from being distributed in the markets. Such measures include, monitoring products in the market and initiating actions against counterfeiters, each of which entails incurring significant costs at our end. The proliferation of counterfeit and pirated products, and the time and attention lost to defending claims and complaints about counterfeit products could have an adverse effect on our goodwill and our business, prospects, results of operations and financial condition could suffer.

34. *Our operations are subject to various employees, health and safety laws and regulations. Further, our business and prospects are contingent upon, among other things, receipt of all required health and safety permits, and our ability to comply with any conditions specified in such permits and registrations, on a continuous basis. Further, we are subject to various environmental laws and regulations relating to environmental protection in various locations in India. For example, the discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage may give rise to liabilities towards the government, especially the state pollution control boards and third parties, and may result in expenses to remedy any such discharge or emissions. Stricter laws and regulations, or stricter interpretation of existing laws and regulations may impose new liabilities or require additional investment in environmental protection equipment, either of which could adversely affect our business, financial condition or results of operation. Our failure to obtain required licenses or renew expired licenses or to otherwise comply with various regulatory requirements may have a material adverse effect on our financial conditions and results of operations.

Our products depend on recent inventions and developments as we manufacture and market the products as per the market trends. Any failure to maintain the quality standards may affect our business. Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customers' quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations. Also, rapid change in our customers' expectation on account of changes in technology or introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition. While, we believe that we have always introduced new products based on consumers need to cater to the growing demand of our customers and also endeavour regularly update our existing technology, our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

36. ***Price controls and other factors may prevent us from setting prices for our products at levels high enough to earn an adequate return on our investments in them.***

Though currently, we do not manufacture any formulations that attract the price controls imposed by governments and healthcare providers, we may in future come under the purview of the same. Price controls operate differently in different countries and can cause wide variations in prices between markets. Changes in the pricing environment that affects our products could have a significant impact on our expansion plans, projected revenues and operating profits. The existence of price controls can limit the revenues we earn from our future products and may have an adverse effect on our business and results of operations. In India, various products are subject to pricing regulations under the DPCO. Though none of our products are subject to the Drugs (Prices Control) Order, 2013 (“DPCO 2013”), but formulations that we may manufacture in the future as a result of our future expansion plans, may be subject to the provisions of DPCO 2013 as the number of scheduled drugs and the pricing mechanism for scheduled drugs has been amended. Under the DPCO 2013, the price of scheduled drugs is required to be based on the average market price charged by all companies which have a market share equal to or more than 1.0% of the total market turnover on the basis of moving annual turnover in the relevant drug. The prices of non-scheduled drugs are determined by market forces and primarily based on competitive factors and market penetration of the product and are capped at a maximum of 110.0% of their maximum retail price during the preceding 12 months. The relevant authorities under this regulation have the right to raise demands against us for alleged violations of pricing regulations due to charging of prices higher than those fixed or notified by the Government or otherwise. These demands can be raised even after the passage of a significant amount of time from the date of the alleged violation. There can be no assurance of the eventual impact of the DPCO 2013, and that the same will may materially and adversely affect our future business, expansion prospects, future results of operations and financial condition.

37. ***We are susceptible to product liability claims that may not be covered by insurance and may subject us to substantial expenditure thereby adversely affecting our reputation and if the claim is successful, could require us to pay substantial amounts.***

We face the risk of loss resulting from, and the adverse publicity associated with, product liability lawsuits, whether or not such claims are valid. We may be subject to claims resulting from our manufacturing defects or negligence in storage, packaging or handling which may lead to the deterioration of the APIs and/or FDFs. Even unsuccessful product liability claims would likely require us to incur substantial expenses on litigation, divert management’s time, adversely affect our goodwill and impair the marketability of our APIs and FDFs.

We are liable for the quality of the products we manufacture, for the duration of their shelf life. Disputes over non-conformity of the products with prescribed quality standards or specifications including storage specifications are generally referred to independent testing laboratories. If any independent laboratory confirms that the products do not conform to the prescribed or agreed standards and specifications, we may be required to bear the expenses of replacing and testing such products, which could adversely affect our business, results of operations, cash flows and financial condition. Any proved defect in our products could also result in withdrawal of our license for manufacturing, storing and selling the products. Further, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our Company, brand, or products or mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

Further, we do not have any insurance coverage for product liability and if we are to take the same, it may result in additional expense. From time to time, the pharmaceutical industry has experienced difficulty in obtaining desired product liability insurance coverage. The risk of product liability suits is also likely to increase as we venture into manufacture of other APIs and Formulations at our existing Units. If any product liability claim not covered by insurance were sustained against us, it could adversely affect our business, financial condition, results of operations and cash flows.

38. ***We have not entered into any non-disclosure or confidentiality agreements with our employees or other intermediaries.***

We operate in a highly competitive industry our ability to succeed depends largely on the ability and skill of the workers to create new and creative designs. Although, we have good terms with our employees, we cannot

assure that we will have continued relation with them. Although, we believe that our designs may not be compromised, we cannot assure the same as we have not entered any non-disclosure or other confidentiality agreements with them.

39. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

40. *Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.*

(Rs. in Lakhs)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. For further details please refer to the section titled “*Financial Statements*” and chapter titled “*Management's Discussion and Analysis of Financial Conditions and Results of Operations*” beginning on page no. 186 and page no. 209 respectively, of this Draft Prospectus.

41. *We have certain contingent liabilities that have not been provided for in our Company's financials which if materialised, could adversely affect our financial condition.*

Our contingent liabilities as per our Restated Financial Statements on September 30, 2018 is as under:

In the event any such contingencies mentioned above were to materialize or if our contingent liabilities were to increase in the future, our financial condition could be adversely affected. For further details, see the section entitled “Restated Financial Statements” on page no. 186 of this Draft Prospectus.

43. Our business is working capital intensive. If we are unable to generate sufficient cash flows to allow us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.

Our business is working capital intensive including fund requirement for payment for bulk purchases of various products across different brands and product verticals. Hence, major portion of our working capital is utilized towards debtors and inventory. The results of operations of our business are dependent on our ability to effectively manage our inventory (stock of traded goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers including small dealers, stockists & retailers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

We have a sanctioned limit for working capital of Rs. 1469.78 Lakhs from the existing bankers / financial institutions including unsecured loan from the Promoters, Directors and Relatives. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we

may not be able to maintain our Sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors and we may be forced to go for Corporate Debt Restructuring (CDR) which may result in adversely affecting our operations and future prospects.

44. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Our industry is continually changing due to technological advances and scientific discoveries characterised by high expenses incurred on R&D. These changes result in the frequent introduction of new products and significant price competition. To meet our customers' needs as well as keep pace with our competitors, we regularly update existing technology and acquire or develop new technology for our pharmaceutical manufacturing activities. If our pharmaceutical technologies, such as our branded generics, formulations and drug delivery systems become obsolete, and we are unable to effectively introduce new products, our business and results of operations could be adversely affected. Although we strive to keep our technology, facilities and machinery current with the latest international standards, the technologies, facilities and machinery we currently employ may become obsolete and we may not have the resources to adequately invest in R&D. The cost of implementing new technologies and upgrading our manufacturing facilities as well as R&D would require substantial new capital expenditures and/or write-downs of assets and could adversely affect our business, prospects, results of operations and financial condition.

45. *We are dependent on the success of our research and development and the failure to develop improved products/new drug delivery systems/process improvements could adversely affect our business.*

Our success depends on our ability to improve our existing products, develop new drug delivery systems, process improvements to give time, quality and cost efficiency. All our units, for APIs as well as FDFs, have in house Quality Control (QC) and Quality Analysis (QA) laboratories where the raw materials dispensed and the finished products manufactured are tested for various quality parameters laid down by FDA, GMP, WHO and various other governing bodies. We have employed well qualified technicians in our labs and also provide them with regular technology upgrades to keep them abreast with the latest technological change in products, drug delivery systems and process improvements. We cannot assure you that the investments made by us in QC / QA and R&D will yield satisfactory results in terms of improved products, or will yield any results at all. The development process for improving our existing products and developing new drug delivery systems is lengthy and costly. Despite investments in this area, our research and development efforts may not result in the discovery or successful development of the products. There can be no assurance that the improved product/new drug delivery system will be commercially successful. Further, if our competitors develop processes that may give them first mover advantage we may be unable to retain our customers, which shall adversely affect our revenues and profitability.

46. *We are required to incur substantial expenditure for our business operations and if we are not able to manage our financial requirements in the future, we may be required to obtain additional financing which may not be on terms commercially acceptable to us.*

We are required to incur substantial expenditure for conducting our business operations primarily in relation to making advance payments to our suppliers for the bulk quantities of lubricants and various base oils imported by us for our business. Also, substantial expenditure is incurred for certain regulatory and legal fees required for the trade with customers based in various parts of the country and other day to day miscellaneous expenses. The actual amount and timing of our future capital requirements may differ from estimated requirements as a result of, amongst other things, unforeseen delays in obtaining orders, confirmation of required products and brands from our suppliers, price fluctuations in various products and brands, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes in the States of our trade. If we are not able to manage our financial requirements from our internal accruals in the future, we may be required to seek additional debt or equity financing. Additional debt financing could increase our interest costs and require us to comply with various restrictive covenants that are generally part of such financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact the price of our Equity Share.

Our ability to obtain additional financing on favourable terms, if at all, will depend on a number of factors. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all which could adversely impact our planned capital expenditure and our business.

- 47. Our Company has availed unsecured loan from our Promoters, Promoter Group, Group Entities and/ or Directors which is repayable on demand and at any time. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.**

As per the restated audited financial statement, for the period ending September 30, 2018, our Company has availed total sum of Rs. 123.25 Lakhs as unsecured loan from Promoters, Promoter Group, Group Entities and/ or Directors which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the “**Annexure 31: Statement of Related Party Transaction**” and section “**Financial Indebtness**” beginning on page no. 206 and 186 respectively of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

- 48. We have not received No Objection Certificate from all the lenders of loans to our company.**

Our company has made an application with our existing bankers / financial institutions to obtain a “No Objection Certificate” (NOC) from them. However, we are yet to obtain the same from them.

- 49. Our Promoters have given personal guarantees in relation to certain debt facilities provided to our Company by our lenders. In event of default on the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoters/ Directors ability to manage the affairs of our Company and consequently this may impact our business, prospects, financial condition and results of operations.**

Some of the debt facilities provided to our Company by our lenders stipulate that the facility shall be secured by a personal guarantee of our Promoters. In event of default on the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoters/ Directors / Key Managerial Personnel(s) ability to manage the affairs of our Company and consequently this may impact our business, prospects, financial condition and results of operations. Further, in an event our Promoters withdraws or terminates his/their guarantee/s or security, the lenders for such facilities may ask for alternate guarantee/s or securities or for repayment of amounts outstanding under such facilities or even terminate such facilities. We may not be successful in procuring guarantee/s or collateral securities satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “**Statement of Financial Indebtedness**” beginning on page no. 219 of this Draft Prospectus.

- 50. We have entered into certain related party transactions and may continue to do so.**

We have entered into related party transactions with our Promoters, Promoter Group, Its Group Companies/ Entities, Directors and Other Associates. While we believe that all such transactions have been conducted on the arms length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Draft Prospectus and, also see the section “**Annexure 31: Statement of Related Party Transactions**” beginning on page no. 206 of this Draft Prospectus.

- 51. Our Group Entities operate in the similar line of business as us, which may lead to competition with such Group Entities.**

Our Group Entities, M/s Sudarshan Solvents Industries Limited, Sudarshan Pharma Industries Limited-Hongkong, M/s. Sachin Chemicals (Proprietary firm), M/s. Radhe (Proprietary firm) and M/s. Sudarshan Chempharm India LLP (Partnership Firm) are involved in same line of business that may potentially compete with our Company and/ or is authorized to carry out business, similar to that of our Company. We may hence have to compete with our Group Entities for business, which may impact our business, financial condition and results of operations. The interests of our Promoters or Promoter Groups may also conflict in material aspects

with our interests or the interests of our shareholders. For further details, please refer “Our Group Entities” beginning on page no. 178 of this Draft Prospectus. Further, our Promoters may become involved in ventures that may potentially compete with our Company. The interests of our Promoters or Promoter Groups may conflict with the interests of our other Shareholders and our Promoters may, for business considerations or otherwise, cause our Company to take actions, or refrain from taking actions, in order to benefit themselves instead of our Company's interests or the interests of its other Shareholders and which may be harmful to our Company's interests or the interests of our other Shareholders, which may impact our business, financial condition and results of operations.

We have not entered into any non-compete agreement with our Promoters and/or Promoter Groups and/or our Group Entities. We cannot assure you that our Promoters and/or our Group Entities and/or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

52. We have recently incorporated a Company in Hongkong as our Group Company. However, we do not have any prior experience in successfully operating an international Group Company and the same may not provide us the desired business leverage which would in turn affect our operations and financial conditions.

Our Company is predominantly a trading & distribution Company based in India. We currently export our products through a local third party located in International Market. However, we do not have any direct exports and we continue to evaluate options for building our business sources in international markets.

With this aim, we have recently incorporated a Group Company in Hong Kong under the name of Sudarshan Pharma Industries Limited (SPIL-HK). SPIL-HK has been set-up for the business of trading and distribution of various Chemicals, API's & Drug Intermediates. We believe that a Group Company in Hong Kong would be beneficial in liaising with various suppliers and customers and also aid us in building relations, not only in the Far East but also in other Asian and European countries. However, we do not have any experience in successfully setting up an international group company. If we are not able to successfully operate this group company, it may lead to sunk investment including various expenses incurred for incorporating the same. Successfully establishing and running an international group company will require us to:

- Adequately analyze key risks and other metrics prior to incorporating the group company or commencing operations therein;
- Develop a well trained operations team with relevant systems and processes to handle the unit;
- React effectively to any local Government regulation which prohibits import, export or trade or other such externality which would be having a major impact on our operations;
- Comply with various regulations existing in the region / country pertaining to various regulatory authorities.

Hence, the inability to run successful operations in this new wholly owned subsidiary could adversely affect our ability to achieve our sales and key execution targets and hence adversely impact our future consolidated and standalone results of operations and financial conditions.

53. Orders placed by customers may be delayed, modified, cancelled or not fully paid for, which may have an adverse effect on our business, financial condition and thereby on our results of operations.

We may encounter predicaments in executing the orders placed by our customer or executing it on a timely basis. Moreover, there are factors which may be beyond our control or in the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, which may result in the postponement of executing or delivering of the necessary product(s) or cause its cancellation. Further, even though we execute orders as placed by our customers, the order could be cancelled or there could be any changes in delivery of the products. Accordingly, it is difficult to predict with certainty if, when and to what extent the delivery of the orders placed will be made. Failure to deliver our orders on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our revenue, cost of operation and thereby our business functioning.

54. Delays or defaults in client payments could result in reduction of profits.

If clients default in their payments to which the Company has devoted significant resources or in which it has invested significant resources is delayed, cancelled or does not proceed to completion, it could have an adverse effect on the Company's business, financial condition and results of operations.

55. *Our Company may require additional capital resources to achieve our expansion plans.*

The rate of our expansion will depend to an extent on the availability of adequate debt and equity capital. Further, the actual expenditure incurred may be higher than current estimates owing to but not limited to, implementation delays or cost overruns. We may, therefore, primarily try to meet such cost overruns through our internal generations and in case if the same is not adequate, we may have to raise additional funds by way of additional term debt from banks/ financial institutions and unsecured loans, which may have an adverse effect on our business and results of operations.

56. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

57. *We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.*

We have recently started exporting our products in some countries and receive sale proceeds against such export sales in foreign currency. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our Company to the extent of cost of sales in foreign currency terms. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

58. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed expansion, as detailed in the section titled "Objects of the Issue" is to be mainly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun, or cost overrun may adversely affect our growth plans and profitability.

59. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

60. *The Company has not appointed any independent agency for the appraisal of the proposed Project.*

The Project, for which we intend to use our Issue proceeds as mentioned in the objects of the Issue, has not been appraised by any bank or financial institution. The total cost of Project is our own estimates based on current conditions and are subject to changes in external circumstances or costs. Our estimates for total cost of Project has been based on various quotations received by us from different suppliers and our internal estimates and which may exceed which may require us to reschedule our Project

61. *Our Board of Directors and management may change our operating policies and strategies without prior notice or shareholder approval.*

Our Board of Directors and management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder approval. We cannot predict the effect that any changes to our current operating policies or strategies would have on our business, operating results and the price of our Equity Shares.

62. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding in our Company.*

Our Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding in our Company. For further information, see “*Capital Structure*” and “*Our Management*” on page nos. 65 and 155, respectively, of this Draft Prospectus.

63. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakhs. Since this Issue Size is less than Rs. 10,000 Lakhs, our Company has not appointed any monitoring agency for this Issue. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

64. *We propose to utilize the Net Proceeds for purposes identified in the section titled “Objects of the Issue” in this Draft Prospectus. Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval.*

We propose to utilize the Net Proceeds for purposes identified in the section titled “*Objects of the Issue*” beginning on page no. 80 of this Draft Prospectus. The manner deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholder’s approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholder’s approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholder’s approval may adversely affect our business or operations. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations, 2018, as amended from time to time. If our Shareholder’s exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

- 65. *Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.***

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 61.78% of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "*Capital Structure*" and "*Our Promoter, Promoter Group and Group Companies*", beginning on page no. 65, 171 and 178 respectively, of this Draft Prospectus.

- 66. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

- 67. *Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

- 68. *We cannot assure you that we will pay dividend in future.***

We have not paid any dividends on our Equity Shares since inception and there can be no assurance that dividends will be paid in future. The declaration of dividends in the future will be recommended by our Board, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividend in the future. Further, we may be restricted by the terms of our debt financing from making dividend payments, in the event we default in any of the debt repayment installments.

- 69. *Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short-term capital gains tax in India.

Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to "Statement of Tax Benefits" on page no. 94 of this Draft Prospectus.

70. *We cannot assure you that our Equity Shares will be listed on the SME Platform of NSE-NSE EMERGE in a timely manner or at all, which may restrict your ability to dispose of the Equity Shares.*

In terms of Chapter IX of the SEBI (ICDR) Regulations, 2018, as amended from time to time, we are not required to obtain any in-principle approval from SEBI for listing of our Equity Shares. We have only applied to NSE to use its name as the Stock Exchange in this Offer Document for listing our Equity Shares on the SME Platform of NSE-NSE EMERGE. Permission for listing of the Equity Shares will be granted only after the Equity Shares offered in this Issue have been allotted. Approval from NSE will require all relevant documents authorizing the issuing of the Equity Shares to be submitted to it. There could be a failure or delay in listing the Equity Shares on the SME Platform of NSE-NSE EMERGE. Further, certain procedural and regulatory requirements of SEBI and the Stock Exchanges are required to be completed before the Equity Shares are listed and trading commences. Trading in the Equity Shares is expected to commence within 6 Working Days from the Issue Closing Date. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose off your Equity Shares.

71. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Safal Capital (India) Limited is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled "General Information – Details of the Market Making Arrangement for this Issue" on page no. 61 of this Draft Prospectus.

72. *There may be restrictions on daily/monthly movements in the price of our Equity Shares, which can adversely affect shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point of time.*

Subsequent to listing, our Company may be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India, which does not allow transactions having crossed certain volatility limit in the price of its Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company's circuit breaker is set by the stock exchanges based on certain factors such as the historical volatility in the price and trading volume of the Equity Shares. The stock exchange is not required to inform us of the percentage limit of the circuit breaker from time to time and may change it without our knowledge. This circuit breaker, if imposed, would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, we cannot assure that the shareholders will be able to sell the Equity Shares at desired prices at any particular time.

EXTERNAL RISK FACTORS

73. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

The company is subject to various regulations and policies. For details see section titled “**Key Industry Regulations**” beginning on page no. 138 of this Draft Prospectus. The company’s current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse effect on the business, financial condition and results of operations.

74. Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.

The revenues recorded, and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. The final determination of the tax liabilities involves the interpretation of local tax laws as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditures incurred. Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

75. The nationalized Goods and Services Tax (GST) regimes proposed by the Government of India may have material impact on our operations.

The Government of India has proposed a comprehensive national goods and service tax (GST) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. Given the limited liability of information in the public domain covering the GST we are unable to provide/ measure the impact this tax regime may have on our operations.

76. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors’ assessments of our Company’s financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see “**Presentation of Financial, Industry and Market Data**” on page no. 10 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial

statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

77. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

78. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

79. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

80. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

81. Natural calamities and force majeure events may have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. These natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Further prolonged spells of deficient or abnormal rainfall or other natural calamities in the future could have a negative impact on the Indian economy, adversely affecting our business and the price of the Equity Shares.

82. Terrorist attacks, civil unrests and other acts of violence in India and around the region could adversely affect the markets, resulting in loss of consumer confidence and adversely affect the business, results of operations, financial condition and cash flows.

Terrorist attacks, civil unrests and other acts of violence or war in India and around the region may adversely affect worldwide financial markets and result in a loss of consumer confidence and ultimately adversely affect the business, results of operations, financial condition and cash flows. Political tensions could create a perception that an investment in Indian companies involves higher degrees of risk and on the business and price of the Equity Shares.

83. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond the company's control such as earthquake, fire, floods and similar natural calamities may cause interruptions in the business operations. The operations and financial results and the market price and liquidity of the equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

84. In future the company may depend on banks and financial institutions and other sources for meeting its short and medium term financial requirements.

Any delay in the disbursement of funds from these bodies can act as a bottleneck to the project execution capabilities and thereby its results of operations. The company cannot assure that it will be able to do so on commercially reasonable terms. Any increase in interest expense may have a material adverse effect on its business prospects, financial condition and results of operations.

85. Increases in interest rates may affect the results of operations.

Currently, the company does not have any debt, but it cannot be assured that it will not incur indebtedness with a floating rate of interest in the future. As such, increases in interest rates may adversely affect the cost of future borrowings.

The company has not entered into any interest rate hedging or swaps transactions. It cannot be assured to the prospective investor that the company, if it does not enter into any interest rate hedging or swap transactions, will be able to do so on commercially reasonable terms, or that any of such agreements will protect the company fully against interest rate risk. Any increase in interest expense may have an adverse impact on its business, prospects, financial condition and results of operations.

The chemicals industry can be classified based on various parameters such as value addition (basic/specialty), end-use (water treatment/construction/agrochemicals), process (batch/continuous), etc. If we focus on value addition, the chemicals industry can be classified into two broad segments -basic and specialty.

Basic chemicals are generally high-volume and low-value products that are sold to other industries for further processing. Typically, basic chemicals are more likely to be manufactured in continuous process plants and there is no major product differentiation among several manufacturers. Sales of basic chemicals are primarily driven by price.

On the other hand, specialty chemicals are low-volume and high-value products sold on the basis of their quality or utility, rather than composition. Thus, they may be used primarily as additives or to provide a specific attribute to the end product.

Specialty chemicals are more likely to be prepared and processed in batches. The focus is on value addition to the end-product and the properties or technical specifications of the chemical. Specialty chemicals are an important group, but classifying a particular chemical as ‘basic’ or ‘specialty’ has been somewhat contentious.

Specialty Chemicals are a group of “relatively high value low volume chemicals, known for its end use performance enhancing applications”. They are recognized for “what they do” rather than “what they are” as in the case of Basic Chemicals. They provide “solutions “to customer applications, are knowledge based and known to deliver much more returns as compared to Basic chemicals. The critical success in this industry depends upon understanding customer’s needs and product/application development to meet the same at a favorable price-performance ratio.

Specialty chemicals are mainly used to add value to the finished product, they are primarily sold on a B2B basis. Specialty chemicals can be further divided into various sub-segments on the basis of end-use and application. In this report, we have classified specialty chemicals into ten sub-segments. These sub-segments are **1) Agrochemicals, 2) Colourants, 3) Construction chemicals, 4) Flavours & Fragrances, 5) Paints & Coatings, 6) Personal care, 7) Polymer additives, 8) Surfactants, 9) Textile chemicals and 10) Water treatment chemicals.**

An overview of the global specialty chemicals industry

Globally, the chemical industry recorded sales of c.USD 4.3trn in FY15, of which specialty chemicals (including agrochemicals) recorded sales of c.USD 829bn (or c.20% of the global chemical industry sales). Industry estimates indicate that the chemical industry could record a CAGR of c.5.4% to reach c.USD 5.6trn by end- FY20, while specialty chemicals could grow at a slightly faster rate, recording c.5.8% CAGR to reach USD 1.1trn by end -FY20.

Asia-Pacific had the highest market share of around 42% of global specialty chemicals market in 2017. The electronics market of Asia-Pacific has experienced a surge in the recent past with innovations and advanced technology implementations, driving the specialty chemicals market in the region. The major sealants manufacturing companies have their manufacturing plants in China, which accounts for 59% of the Asia-Pacific region. All the above factors, when added up with high development in manufacturing and construction industry, helps the Asia-Pacific region to dominate the market, as these are major consumers of specialty chemicals.

An overview of the Indian specialty chemicals industry

In FY15, Indian chemical industry's revenue was c.USD 147bn, implying a less-than-4% share of the global chemical industry (c. USD 4.3trn). This is despite strong CAGR of c.13% during FY10-FY15. The Indian specialty chemicals industry at c.USD 28bn (Exhibit 4) accounted for c.3.4% of the global specialty chemicals industry and c.20% of the Indian chemical industry in FY15. The Indian specialty chemicals industry reported annual growth of 14% during FY10-FY15 implying that growth in specialty chemicals was slightly stronger than growth in the overall chemicals industry.

According to TSMG-FICCI, specialty chemicals industry could grow c.13% per annum during FY15-FY20 (on the back of increasing consumption and high growth in end-use industries), leading to a market size of c.USD 52bn by 2020. If India's specialty chemicals industry grows at 13% as estimated above, against the global growth rate of c.6%, India's share in the specialty chemicals global market could increase to c.5% by end-FY20 from c.3.4% in FY15.

Among specialty chemicals sub-segments, water treatment, polymer additives, flavours & fragrances and construction chemicals have a lower penetration ratio (<0.15). With increased focus on improving the quality of construction, per capita consumption of specialty chemicals in India could grow faster than the industry rate. Thus, a rapidly expanding end-use industry, coupled with low penetration, would help specialty chemicals grow faster than the end-use industry.

Growth drivers for the specialty chemicals industry

- 1) Domestic availability of raw material at competitive prices,
- 2) Strong demand growth in the consumer industry and a domestic industry that supports 'premiumisation' of products,

- 3) Competitive cost of manufacturing,
- 4) Investment in R&D and
- 5) An ecosystem to support industry and innovation.

The Indian specialty chemicals market is smaller than global peers' in most of the subsegments. However, in some sub-segments (such as agrochemicals, colourants, paints & coatings) India accounts of 5%-10% of the respective global market sizes. India is also one of the largest exporting countries for agrochemicals and colourants, and has significantly boosted its market share over the years. Exhibit 33 illustrates the expected growth rate comparison of the domestic vs. global specialty chemicals segments.

Source: Global Market Insights, Industry, JM Financial, Company

Exhibit 34 indicates the major drivers that would boost growth rates in the specialty chemicals segment. Apart from the key drivers mentioned above, other notable factors common to most of the segments are increasing urbanisation, increasing per capita income, growing middle class population (NCAER projected 267 million mid-income population in 2016 vs. 50 million in 2005), lower penetration ratio, increasing consumerism and premiumisation. However, there are other specific factors driving these segments. For instance, agrochemicals' growth rate will also be affected by volatile weather (including the El Nino phenomenon and prolonged weak rainfall) as well as low agri-commodity prices.

More End Use demand: With increased GDP, Indian middle class household is expected to grow to 148 million by 2030 from 31 million in year 2008. Urban population is expected to increase by 275 million people by 2030, leading to a consumption led double digit growth in key market. Need for better performance products, supported by service will be the key factor. (e.g.: Clean municipal water, construction chemicals increased use).

End User Industry growth drivers:

Sector	Demand Driver
Paints & Coatings	Increasing urbanization, middle income households increasing, High replacement demand Increased per capita income
Textile	Increased Indian Export, Increased urbanization and higher disposal income
Construction	Current expenditure on admixtures in India is 50% of China and 25% of cost in USA
Home care	Penetrated category leading to moderate growth

Increased Intensity of consumption:

Compared to countries like USA or China, the current penetration of specialty chemicals is low (e.g. construction chemicals) With an increased focus, improved products and customer awareness, the use of specialty chemicals will increase (e.g. Construction Chemicals, Pesticides use in India)

Improved Consumption Standards:

Consumption standards are policies implemented by the government to prompt the safe use of products. These standards are necessary for both improving society's standard of living and enhancing consumer safety. With the developing economy, India has started to regulate products more stringently, strengthen consumption standards, which in turn is leading to increased consumption of specialty chemicals (e.g. solvent based paints vs. water based paints)

INR depreciation:

As compared to Chinese RMB (appreciated steadily in last 5 years), INR, on the other hand has depreciated by nearly 22%. This is beneficial to companies wanting to shift/start production in India.

IPR Protection:

Although, the IPR protection is still in its infancy, it's much stronger than many countries (e.g. China). International Property Rights index, India ranks 55 of 130 countries compared to China which ranks at 59. In legal terms also, India ranks 71 against China at 77. This makes it a better for R&D intensive, early technology lifecycle production.

Indian Specialty Chemical Industry sub –segment:

Sub Segment	Growth Driver	User Industry
Paints and Coatings	Has grown at 1.5-2X GDP growth rate with CAGR of 13.5% in last five years and is likely to maintain over 15%	Construction, Automotive
Specialty Polymers	Growth in plastic demands resulting from increased usage in packaging, construction and automotive	Packaging, Automotive
Construction Chemicals	Current expenditure on admixtures is very low in India as compared to other countries	Infrastructure, Real estate
Paper Chemicals	Paper industry is expected to grow at 8-10% on growing demand	Printing, Packaging
Textile Chemicals	Industry has benefited from currency depreciation and has strong growth potential	Apparel, Technical Textile
Water Chemicals	Growing urbanization has led to higher needs for water purification and treatment	Industrial water, Municipal water
Cosmetic chemical	Personal care is getting extremely sophisticated and increasing awareness and evolving consumer driven growth	Bath, Shower, Hair Care
Flavors & Fragrances	India is lagging behind but rapidly catching up	Food Processing, Personal Care
Agro Chemicals	Strong growth in CRAMS and domestic agrochemical industry as pesticide consumption is low in India	Agriculture, Exports
Home Care Surfactants	Growth is primarily driven by increased consumption	Laundry Care, Dishwashing
Colorants	Exports from India is about 80% of total consumption	Textile, Exports

The chart below has a few stringent standards which Indian have started to implement:

Industry	Potential Customer Standards in India	Comparable standards in other countries
Automotive	- Implementation on stricter emission norms - Fuel efficiency standards to improve fuel economy of vehicles	- EU has specified CO2 emission norms for cars - US CAFE standards specify minimum fuel efficiency
Construction	- Mandating energy conservation and building code guidelines - Banning mixing and production of concrete at site in urban areas	- Germany's EnEV is one of the most stringent energy conservation code - China has banned concrete site mixing in 240 cities
Water Treatment	- Re-usability norms for all types of waste Water - Shifting to pollution load –based norms from concentration –based norms	- Industries are incentivized to use Singapore's NEWater (recycled water) - US EPA sets effluent emission guidelines for each industry
Paints and Coatings	- Tighter emission norms for VOC - Mandatory use of lead free pigments	- USA has set 250gpl as limit for VOC in paints - USA has a norm of maximum 90ppm of lead in paint
Flavors and Fragrances	- Moving from negative list to positive list - Mandating the usage norms by IFRA (International Fragrance Association)	- EU has "E numbers" for food additives that has been assessed for use (Positive list) - Majority of developed world follows the IFRA guidelines

Key Industries driving the growth of Specialty Chemicals:

Automotive Sector:

Indian focus of small cars is changing to midlevel cars, thereby increasing demands. Current production of automotive is growing on the average at 9-10%. The need for components, using such coatings is also increasing (current production of approx. 2million cars, 3million 2/3 wheeler, 0.3million LCV/HCV and unknown number of bicycles).

Most of global majors are present in India, therefore, related TIER I and II vendors. These companies follow norms of rest of the world, making it mandatory for others to follow. Automotive Component export is a major segment of user industry, using specialty chemicals to meet the production standards of rest of the world. International community is looking at India as a manufacturing base for reasons of manufacturing economy, knowledge of common language (English), multi directional technically skilled manpower.

Construction Chemicals:

Construction industry is growing at approx.16% annually, to be recognized as an industry worth US\$ 100bn by end of XII five year plan. Specialty chemicals account for only 0.4% of total construction spends as compared to a possible 1%, which is the norm in developed economies (paints, coating material, reinforcing fibers, admixtures and others). The key factor is, to have/developing products and adopting advanced coating, ceiling and reinforcing material like polyurethane base coating, silicon and polymer based re enforcing material.

Water Chemicals:

The demand for water is growing, thereby putting pressure on availability of water for irrigation, drinking and industrial use. Chemicals for conserving this resource seem to be on priority list. Recycling/conservation of water has become a must. Water treatment chemicals for reducing in-process industrial applications, to reduce BOD /COD, disinfecting water for potable purpose offers potential beyond doubts.

Textile Chemicals:

With the growth of demand, in both domestic and export market for textiles, the chemicals like dyes and pigments offer never reducing requirements.

Personal Care:

With growing affluence, Indians are able to spend more on hygiene and personal care products. Increasing demand for wide range of cosmetic chemicals, health care products and well as hygiene products using specialty chemicals , polymers and oleo chemicals. This segment’s growth is expected to surpass the growth of other segments.

Valuation of specialty chemical segment:

The nature of specialty chemical industry is very complex and therefore, while valuation, this must be considered. This industry provides stable margins in stark contrast to basic chemical industry. Specialty chemicals do not go through the stringent regulatory approvals, as in case of pharma, agrochemicals or food industry but supplies critical material used in these industries. These small volume/high value products contribute a small percentage to the total cost, enjoying a high level of client’s stickiness.

The sector is poised for a strong growth to both, top and bottom line, there by offering reentry opportunity.

Comparative Industry Valuation:

Parameters	Pharma	Agrochemical	Organic Chemical	Inorganic Chemical	Color Alkali	Dyes & Pigments	Specialty Chemicals
Entry Barriers	Very Strong	Very strong	Weak	Weak	Weak	Weak	Very strong
Regulatory Approvals	High	High	Low	Low	Low	Low	Low

Indian Government’s measures to improve competitiveness:

- Industrial Licensing has been done with in most sectors, except for a very small list of hazardous chemicals
- Approval is granted for FDI up to 100% in chemical sector

- Government is continuously reducing the list of reserved chemical items for production in small scale sector, there by assisting greater investments in technology up gradation and modernization.
- Policies have been initiated to set up integrated Petroleum, Chemicals and Petroleum Investment Regions (PCPIR). PCPIR will be an investment region, spread over 250 sq. km for manufacturing of domestic and export oriented products of petroleum, chemicals and petrochemicals.
- These initiatives are expected to attract large investments, both domestic and foreign, with requisite improvements in infrastructure and competition.

Strengths and Opportunities:

This segment has immense potential for growth, driven by growing end user industry. Technology & Innovation will play a major role in growth. India has a large pool of English speaking technical man – power as well as scientists and researchers.

Risks and Concerns:

Currency Appreciations: Significant appreciation in Indian Currency could impact growth as competitive advantages vis a vis China could decline, thereby possibly slowing down the shift of base. Some products, prices at IPP, could also have an impact on significant currency appreciation.

Slow Down in User Industry Growth: Slowdown in growth on user industry such as paints and coatings, specialty polymers, construction chemicals etc. could impact the overall growth for the sector.

Slow Down in Global Growth: Global slowdown could have an impact on the industry segment, as exports contribute substantially to the segment. Any slowdown in global growth impacting the end user industry growth will have as adverse impact on the overall growth for the sector.

Pollution Control Norms in the company: All companies have invested heavily on pollution control equipment meeting the pollution control norms. Any further tightening of norms by either Government or State Pollution Control Bodies will call for further investments, which may have a negative impact on the industry.

Introduction

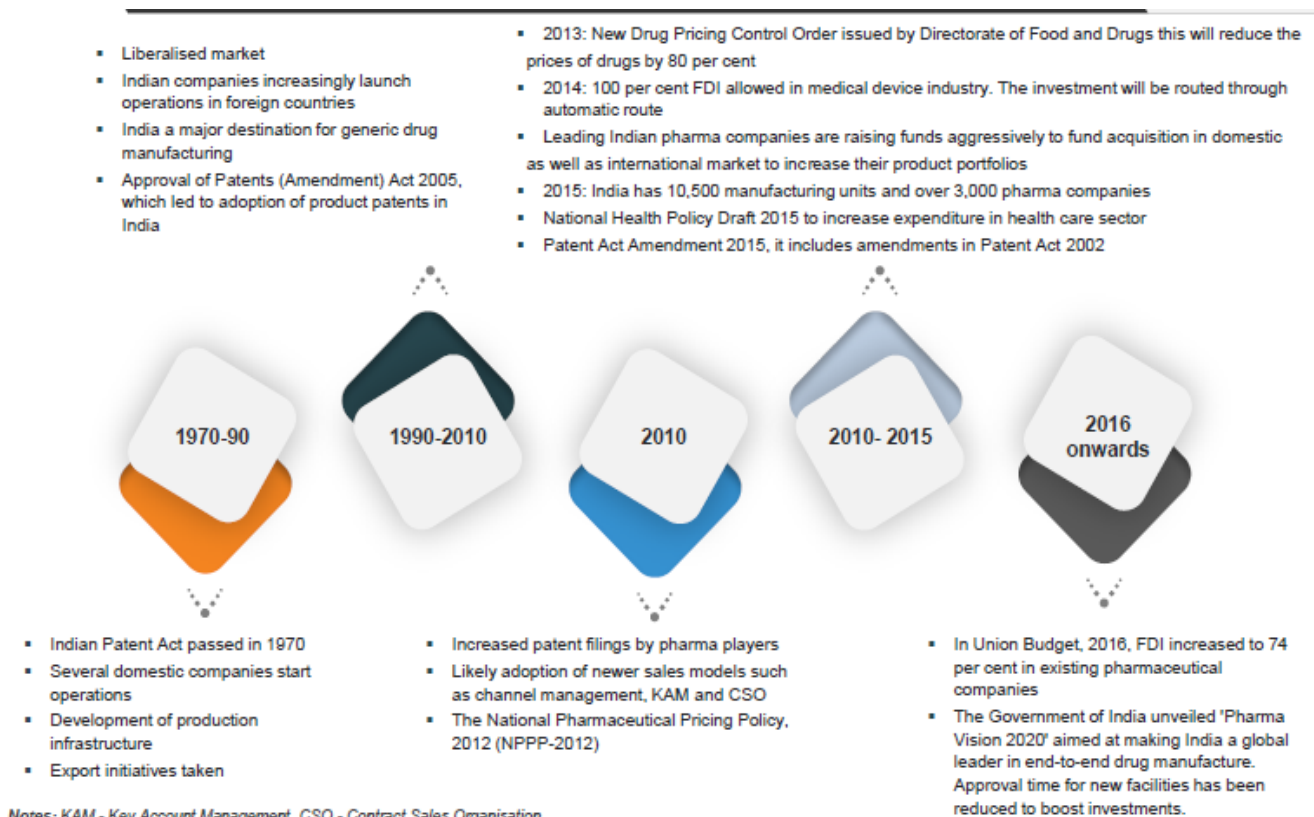

India is the largest provider of generic drugs globally. Indian pharmaceutical sector industry supplies over 50 per cent of global demand for various vaccines, 40 per cent of generic demand in the US and 25 per cent of all medicine in UK.

India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers who have the potential to steer the industry ahead to an even higher level. Presently over 80 per cent of the antiretroviral drugs used globally to combat AIDS (Acquired Immuno Deficiency Syndrome) are supplied by Indian pharmaceutical firms.

The Indian Pharma Industry

The Indian pharma industry has been consistently growing at a CAGR of more than 15% over the last five years. The healthy growth reflects the inherent strengths of the industry and improving healthcare standards in the country. If this trend continues, the Indian pharma industry is likely to be one of the top 10 global markets by value by 2020.

Composition of Indian Pharma Market

With 70 per cent of market share (in terms of revenues), generic drugs form the largest segment of the Indian pharmaceutical sector. Over the Counter (OTC) medicines and patented drugs constitute 21 per cent and 9 per cent, respectively. The share of generic drugs is expected to continue increasing; domestic generic drug market is expected to reach US\$ 27.9 billion in 2020. Due to their competence in generic drugs, growth in this market offers a great opportunity for Indian firms. Based on moving annual turnover, Anti-infectives, Cardiac, Gastro Intestinal had the biggest market share in the Indian pharma market in 2017.

Pharma Export to Continue Witnessing Positive Growth

India is the world’s largest provider of generic medicines; the country’s generic drugs account for 20 per cent of global generic drug exports (in terms of volumes). Indian drugs are exported to more than 200 countries in the world, with the US as the key market. Indian pharma companies are capitalising on export opportunities in regulated and semi-regulated markets. Pharmaceutical exports from India reached US\$ 17.27 billion in FY18. The biggest export destination for Indian pharma product is the US. In 2017, 38 per cent of India’s formulated product exports were to the US, followed by 20 per cent to sub-Saharan Africa. In FY18, 31 per cent of total pharma exports from India went to the US.

Government Expenditure in the Pharma Sector on an Uptrend

Government expenditure on health increased from Rs 1.26 lakh crore (US\$ 19.55 billion) in FY12 to Rs 2.25 lakh crore (US\$ 34.91 billion) in FY18, implying a CAGR of 12.3 per cent. Medical technology park in Vishakhapatnam, Andhra Pradesh has already been set up with an investment of US\$ 183.31 million. States like Himachal Pradesh, Gujarat, Telangana and Maharashtra are showing interest for making investments in these parks. German technical services provider TUV Rheinland’s Indian subsidiary has partnered with Andhra Pradesh MedTech Zone (AMTZ) to create an infrastructure for Electro-Magnetic Interference (EMI/EMC) at an investment of US\$ 12.64 million over a course of four to five years.

Growth in the market will be driven by the following factors:

Notes: BPL - Below Poverty Line, USFDA - United States Food and Drug Administration, NPPP-2012-The National Pharmaceutical Pricing Policy, 2012
Source: Pharmaceutical Export Promotion Council

Changing disease profile and favourable demographics: In India, socio-economic changes and urbanisation along with sedentary lifestyle are leading to rapid epidemiological transition. As a result, the Indian population is becoming affluent, living longer and increasingly suffering from lifestyle-related ailments such as obesity, heart disease, stroke, cancer and diabetes. The number of Indian people suffering from these diseases is set to double by 2020. This change in patient demographics will fuel the demand for quality and affordable treatment in the domestic market.

Active participation by foreign pharma companies: Over the years, foreign pharma companies have tapped the Indian pharma market through a series of major acquisitions, launches of new products (especially in the branded segment with India-centric pricing) and expansion of field force. Further, MNCs have adopted India centric strategies such as differential pricing strategy to strengthen their presence in India and address the issue of affordability. MNCs are launching patent-protected drugs in India at lower price points than those in developed markets. Drugs such as Diovan (Novartis), Januvia (Merck, Sharp & Dohme), and Galvus (Novartis) are being sold at 20% of global prices.

Exports to regulated and semi regulated markets: Exports have made significant contribution to Indian pharma industry's growth story, with the critical market of US generics driving the growth. 148 billion USD worth of patent expiries are expected between 2012 and 2018. In addition, the healthcare reforms initiated by the US government, aimed at reducing healthcare spending and covering a larger proportion of population under public healthcare, are also likely to provide impetus to growth in the generics market.

Apart from the developed markets, the Indian pharma companies have strengthened considerable presence in some of the other fast-growing semi-regulated markets of Russia, South Africa and some in Latin American countries (Brazil, Mexico, etc.) and South-East Asia. These emerging markets offer strong growth prospects for Indian players given that some of these are branded generics markets, with high out-of pocket expenditure on healthcare (unlike developed markets). Some markets have relatively easier regulatory pathway.

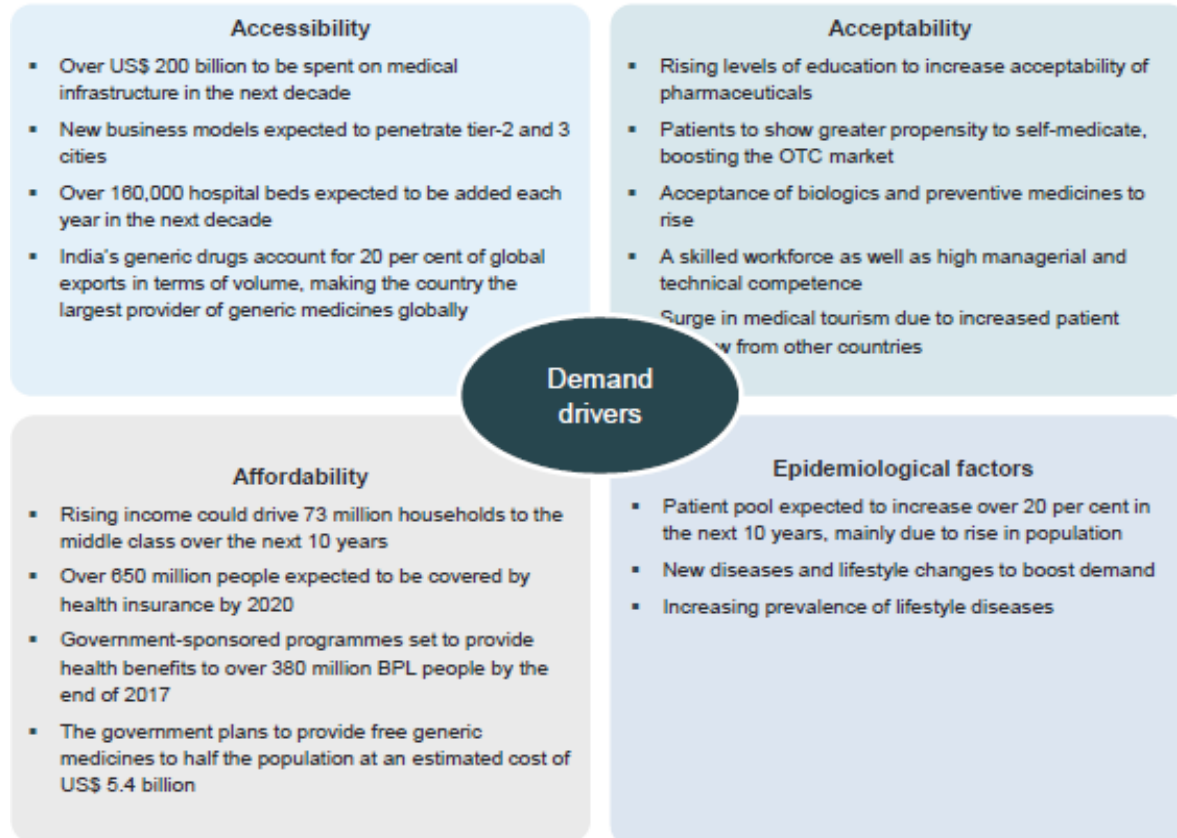

Growing alliances in emerging markets: Indian companies have also been partnering with MNCs in emerging markets. Such alliances benefit from the R&D (formulation development) and manufacturing capabilities of the Indian partners and the extensive marketing and distribution footprint of the MNCs in those markets. There is also an increasing trend among MNCs for partnering in the domestic market, where marketing and distribution footprint of Indian companies and the product portfolio of MNCs is being leveraged upon. Hence, going forward, India

should leverage its strengths in the supply of low-cost, quality medicines across the world and partner with foreign companies to drive growth and play a larger role in global pharma market.

Supply-Side Drivers of Indian Pharma Sector

Launch of patented drugs	<ul style="list-style-type: none"> Following the introduction of product patents, several multinational companies are expected to launch patented drugs in India Growth in the number of lifestyle diseases in India could boost the sale of drugs in this segment High Court allowing to export patent drugs, to foreign players in the Indian market.
Medical infrastructure	<ul style="list-style-type: none"> Pharma companies have increased spending to tap rural markets and develop better medical infrastructure Hospitals' market size is expected to increase by US\$ 200 billion by 2024 Medical devices industry in India has been growing 17 per cent annually and was valued at US\$ 4.9 billion in 2017.
Scope in generics market	<ul style="list-style-type: none"> India's generic drugs account for 20 per cent of global exports in terms of volume, making it country the largest provider of generic medicines globally. The generics drug market accounts for around 70 per cent of the India pharmaceutical industry and it is expected to reach US\$ 27.9 billion by 2020
Over-The-Counter (OTC) drugs	<ul style="list-style-type: none"> India's OTC drugs market is estimated to have grown at a CAGR of 16.3 per cent to US\$ 6.6 billion over 2008–16 and is further expected to grow on the account of increased penetration of chemists, especially in rural regions. Indian OTC market is expected to grow at a CAGR of 9 per cent from 2016-26 to cross Rs 44,115 crore (US\$ 6.81 billion).
Patent Expiry	<ul style="list-style-type: none"> About 120 drugs are expected to go off-patent over the next 10 years; with expected worldwide revenue between US\$ 80 to 250 billion

Industry continues to face the classic problems:

- **The 'patent cliff'**: Between 2012 and 2018, generic erosion will wipe an estimated 148 billion USD off the pharma industry's revenues.
- **Rising drug discovery cost** : Developing new medicines is becoming an increasingly expensive business Annual output of the pharma industry has effectively flatlined over the past years.
- **Increasing government pressure with harsher price controls and taxes**: The rules governing the development and manufacturing of medicines are getting tighter. Both the European Medicines Agency (EMA) and the US Food and Drug Administration (FDA) now focus more heavily on risk management. The FDA is building an active surveillance system to monitor the safety of all medicines in the US market.
- **Greater collaboration of the regulators across the world**: Regulators around the globe are working closely with each other, which means that a product rejected in one region is more likely to be rejected in others.
- **Changing marketing and sales model**: The traditional marketing and sales model is becoming completely inadequate in large parts of the world.
- **Spiralling healthcare cost**: Healthcare expenditure as a percentage of gross domestic product (GDP) is rising. The steepest rise is seen in the mature markets, where the industry has historically earned most of its revenue.

Road Ahead

Over the years, pharma companies have grown inorganically through acquisitions, but due to higher valuations seen in the sector over the last two years, they have been exploring newer methods of partnerships such as joint ventures and licensing of innovator products and technologies.

Companies are focusing on improving operational efficiencies and have also used the traditional growth levers to drive growth (see the side chart). These initiatives have yielded results but some have also brought in new set of challenges, which companies will have to address for achieving profitable and sustainable growth.

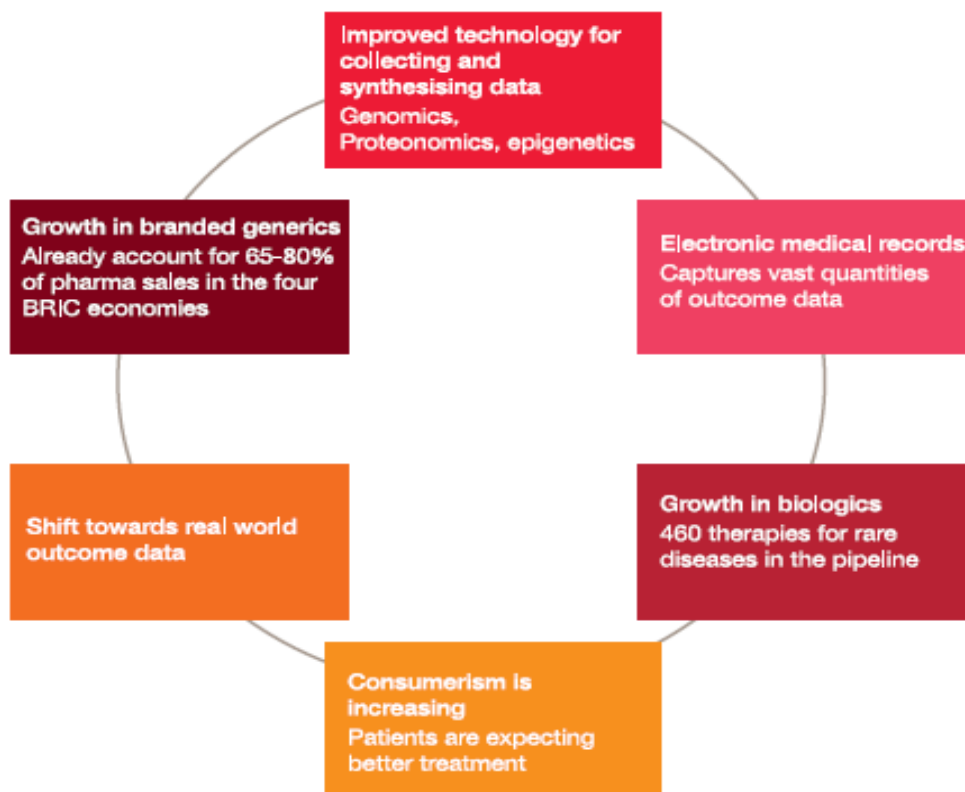

For instance, companies have traditionally increased the field force to penetrate newer markets. This has helped companies to expand but sometimes below expectations. As increase in field force has not yielded expected productivity, it is becoming difficult for the companies to derive a fair return on investment (ROI) due to reduced profitability and higher cost. For example, from 2008 to 2011, the sales of top pharma companies grew by approximately 16 % and the number of sales representatives increased by almost 11 % but the productivity per representative grew only by 4.5 %.

In another such instance, companies have looked at portfolio expansion for gaining a larger share in the Indian market. However, this has not only led to a wider portfolio, but also one with a portfolio with a large tail with more than 80 to 90% of brands not even crossing the INR 1 crore (0.2 million USD) mark. As a result, companies are now worried about future growth and have started planning strategies that would provide the required growth in this competitive market.

Growth levers

Newer trends benefiting the pharma industry

To register robust growth in the future companies need to think through the following:

Higher volumes through lower prices: As we have seen that chronic diseases are setting in early, a large majority of the population will be still working, and this is going to increase the burden on the patients. Pharma companies will have to work around a pricing strategy that will try and reduce the prices appropriately, so that they can rely more on volumes, with larger population suffering from chronic diseases. The chances of ‘penetration strategy’ working successfully would be determined by ‘higher volumes through lower prices. Some MNCS have looked at differential pricing while launching their global drugs in India.

Collaboration with new stakeholders in the super-speciality and speciality segments: Companies will have to work closely with key stakeholders like the payers and providers to improve patient compliance especially in speciality and super-speciality segments. In a country like India, the diagnosis rate is low and a compliance rate is lower in the treatment of almost all chronic diseases. Creating awareness about the disease and its implications will improve the diagnosis rate and improved efforts from companies through key stakeholders will improve compliance drastically. Improved compliance will dramatically increase sales of some drugs and, in turn, will drive growth for the companies.

Customising for Indian market: Indian market is different from the developed markets in terms of epidemiology, awareness, treatment protocols, and compliance and, above all, pricing. The innovator companies when launching new products will have to customise their strategies for the Indian market in order to make the product accessible and affordable to the masses.

Shifting towards prevention: The market will change from treatment to prevention, like other evolved markets. Indian companies will have to look into the healthcare management, work with various stakeholders, and use advanced technology to reach out to more patients. These include use of information and communication technologies such as mobile phones.

Launching patient programmes: In India the awareness and literacy rates are on the rise. The patient is more informed, aware and well read than before. As a result, the treatment modality is changing from doctors to self care. So when the treatment is shifting from hospital to primary care or from doctor to self care, there is a tremendous need to connect directly with the patient and pass more information to them. Patients will require new services such as home delivery, etc. Companies will have to come up with innovative ideas to service these patients which, in turn, will increase the patient base and boost sales and growth.

Realigning field force strategy: In order to improve sales force productivity, companies will have to revisit the field force strategy, make changes if required and build in new skill-sets. For instance, they will need to provide employees skill sets such as serving patients as customers, look for penetration into newer geographies by piggy-riding on the experience of other industries like FMCG, etc. Thus, in this changing market scenario, the companies will have to change their strategies, adopt newer business models, modify or re-visit the old models and look for incremental growth from areas, wherever possible.

Medicine spending in India is expected to increase at 9-12 per cent CAGR between 2018-22 to US\$ 26-30 billion, driven by increasing consumer spending, rapid urbanisation, and raising healthcare insurance among others. Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers that are on the rise.

The Indian government has taken many steps to reduce costs and bring down healthcare expenses. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programmes, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

Opportunities abound in Clinical Trials and High-End Drugs

Clinical trials market	High-end drugs	Penetration in rural market	CRAMS
<ul style="list-style-type: none"> India is among the leaders in the clinical trial market Due to a genetically diverse population and availability of skilled doctors, India has the potential to attract huge investments to its clinical trial market From 2009 to 2015, 3043 clinical trial has been carried out in India. As of June 2017, the Clinical Trials Registry – India had 8,950 trials registered. 	<ul style="list-style-type: none"> Due to increasing population and income levels, demand for high-end drugs is expected to rise Growing demand could open up the market for production of high-end drugs in India 	<ul style="list-style-type: none"> With 70 per cent of India's population residing in rural areas, pharma companies have immense opportunities to tap this market Demand for generic medicines in rural markets has seen a sharp growth. The primary competitive factors consist of quality, technology, prompt delivery, price, size of product portfolio and customer service. Our competitors also may obtain other regulatory approvals for their products more rapidly than we may obtain approval for our products, which could result in our competitors establishing a stronger market position before we are able to enter the market. Many of the companies against which we are competing, or against which we may compete in the future, have significantly greater financial resources and expertise in research and development, manufacturing, obtaining regulatory approvals and marketing approved products than we do. Moreover, as we seek to diversify into new geographical areas globally, we may face competition from local companies, multinational corporations and companies from other emerging markets operating in such markets. We compete with our competitors on the basis of product quality, brand image, price and reliability. We continuously strive to increase our distribution channel to increase our domestic presence and increase our global reach. We intend to continue competing vigorously to capture more market share and manage our growth in an optimal way by improving our brand image, increasing our product offerings, satisfying customer demands, achieving operating efficiencies, and more.

CORPORATE SOCIAL RESPONSIBILITY

We demonstrate our commitment towards our communities by committing our resources and energies to social development through our Trust. Key Industry and Business Related Regulations

The Drugs and Cosmetics Act, 1940 (“DCA”)

The DCA regulates the import, manufacture, distribution and sale of drugs and cosmetics in India as well as aspects relating to labelling, packing and testing. The DCA also provides the procedure for testing and licensing of new drugs. The DCA also prohibits the import of certain categories of drugs and cosmetics. It further mandates that every person holding a license must keep and maintain such records, registers and other documents as may be prescribed which may be subject to inspection by the relevant authorities. Under the DCA, the Government may, by notification in the official gazette, regulate or prohibit the manufacture, sale or distribution of a drug, if it is satisfied that in the public interest, it is necessary or expedient to do so or that the use of such drug is likely to involve any risk to human beings or animals or that it does not have the therapeutic value claimed or purported to be claimed for it or contains ingredients and in such quantity for which there is no therapeutic justification. Penalties in terms of fine and imprisonment are prescribed under the DCA for contravention of its provisions.

The Drugs and Cosmetics Rules, 1945

The Drugs and Cosmetics Rules, 1945 (the “DCA Rules”) have been enacted to give effect to the provisions of the DCA Act to regulate the, manufacture, distribution and sale of drugs and cosmetics in India. The DCA Rules prescribe the procedure for submission of report to the Central Drugs Laboratory, of samples of drugs for analysis or test, the forms of Central Drugs Laboratory’s reports thereon and the fees payable in respect of such reports. The DCA Rules also prescribe the drugs or classes of drugs or cosmetics or classes of cosmetics for the import of which a licence is required, and prescribe the form and conditions of such licence. Further, the DCA Rules provide for the cancellation or suspension of such licence in any case where any provisions or rule applicable to the import of drugs and cosmetic is contravened or any of the conditions subject to which the licence is issued is not complied with. The DCA Rules further prescribe the manner of labelling and packaging of drugs.

The Drugs (Control) Act, 1950 (“DC Act”)

The DC Act was enacted to provide for the control of sale, supply and distribution of drugs. The DC Act empowers the Central Government to inter alia declare any drug to be a drug to which this act shall apply and to fix maximum prices and maximum quantities thereof, which may be held or sold, by a dealer or producer. The DC Act also provides for penalties arising due to contraventions of any of the provisions of this Act or of any direction made under authority conferred by this Act, which shall be punishable with imprisonment for a term which may extend to three years, or with fine, or with both.

National Pharmaceutical Pricing Policy 2012

In December 2012, the Government issued the National Pharmaceutical Pricing Policy, 2012 (“NPPP 2012”) has replaced the Drug Policy of 1994. The objective of the NPPP 2012 is to put in place a regulatory framework for pricing of drugs so as to ensure availability of essential medicines at reasonable prices while providing sufficient

opportunity for innovation and competition to support the growth of industry. The regulation of prices of drugs under the NPPP 2012 is on the basis of regulating the prices of formulations and is different from the earlier principle of regulating the prices of specified bulk drugs and their formulations under the Drug Policy 1994. The National Pharmaceuticals Pricing Authority (“NPPA”) will be the implementation authority for the NPPP 2012. The NPPP 2012 provides for certain principles for drug price control and determination, which, inter-alia, include the following:

- a. Price regulation is on the basis of ‘essentiality’ of the drug as laid down in the National List of Essential Medicines – 2015 (“NLEM 2015”), declared by the Ministry of Health and Family Welfare, in public interest;
- b. Price regulation is applied only to formulations;
- c. The Span of Price Control is as per the dosages and strengths as listed in NLEM 2011;
- d. The methodology of fixing a ceiling price of essential medicines, is done by adopting the simple average price of all the brands having market share (on the basis of moving annual turnover) more than and equal to one percent of the total market turnover of that medicine.
- e. The formulations are to be priced only by fixing a ceiling price. Manufacturers would be free to fix any price for their products equal to or below the ceiling price. The ceiling price would be fixed on the dosage basis, such as per tablet, capsule, standard injection volume, as listed in NLEM 2011;
- f. The ceiling price will be fixed on the basis of readily monitorable market based data which would be available with IMS Health (IMS). Since the IMS data gives price figures for stockist level prices, in order to arrive at ceiling price (being the maximum retail price), the price derived from IMS data would be further increased by 16% as margin to the retailer so as to arrive at a reasonable ceiling price chargeable from the consumers. For drugs not in the IMS data, NPPA would collect data by commissioning the same.
- g. The prices of such essential medicines will be allowed an annual increase as per the ‘Wholesale Price Index’ as notified by the Department of Industrial Policy & Promotion;
- h. The prices of non-essential drugs are to be monitored by the Government on a regular basis and where the price of such drugs increases at a rate of above 10% per annum, the Government is empowered to have the price of these drugs reduced below the limit, for the next 12 months; and
- i. The ceiling prices determined for drugs under the NPPP 2012 are also be applicable to imported drugs.

The NPPP 2012 further, in order to promote innovation and R&D, provides for certain exemptions, to which price control does not apply, such as:

- a. A product or process patented under the Indian Patent Act, 1970, if developed through indigenous R&D, is eligible for exemption from price control for a period of five years from the date of commencement of its commercial production; and
- b. A formulation involving a new delivery system developed through indigenous R&D is also eligible for exemption from price control for a period of 5 (five) years from the date of its market approval in India. The certification of innovation and R&D may be provided by the office of DCGI.

The National List of Essential Medicines, 2015 (“NLEM”)

The National List of Essential Medicines, 2015 has been introduced to replace the National List of Essential Medicines, 2011. Essential medicines are those that satisfy the priority healthcare needs of majority of the population. The medicines mentioned under the list should be available at affordable cost and with assured quality. The Government of India, Ministry of Health & Family Welfare (MOHFW) is mandated to ensure the quality healthcare system by assuring availability of safe and efficacious medicines for its population. The primary purpose of NLEM is to promote rational use of medicines considering the three important aspects i.e. cost, safety and efficacy. Furthermore it promotes prescription by generic names. Healthcare delivery institutions, health insurance bodies, standards setting institutions for medicines, medicine price control bodies, health economists and other healthcare stakeholders will be immensely benefitted in framing their policies. The first NLEM was prepared in the year 1996 and was subsequently revised in 2003. The lists of medicines are divided into 29 sections therapeutic area wise. This new list has added a total number of 160 medicines and has deleted 70 medicines, which now contains a total of 376 medicines. The essentiality of a medicine has been considered in terms of its dosage form and strength.

The Essential Commodities Act, 1955 (“ECA”)

The ECA provides for the control of the production, supply and distribution of, and trade and commerce in certain commodities. The ECA gives powers to the Government amongst others, to control production, supply and distribution of essential commodities for maintaining or increasing supplies and for securing their equitable

distribution and availability at fair prices. Using the powers under it, various ministries/departments of the Government have issued control orders for regulating production, distribution, quality aspects, movement and prices pertaining to the commodities which are essential and administered by them. The State Governments have issued various control orders to regulate various aspects of trading in essential commodities such as food grains, edible oils, pulses kerosene, sugar and drugs. The Collector of the District or the concerned authority has the power to confiscate the commodity if it contravenes the order.

The Drugs (Prices Control) Order, 2013 (“DPCO, 2013”)

In May 2013, the Central Government in exercise of its powers under the Essential Commodities Act, 1955 issued the Drugs Prices (Control) Order, 2013 which will replace the Drugs Prices (Control) Order, 1995. The NPPA will be the implementation authority for the new Drug Prices (Control) Order, 2013. The DPCO is passed under section 3 of the ECA and is to be read with the DCA. The DPCO, inter alia, provides the list of price controlled drugs, procedures for fixing the prices of drugs, method of implementation of prices fixed by Government and penalties for contravention of provisions and formulations which fall within the purview of the legislation. The DPCO provides for the formulae for calculation of ceiling prices and retail prices of drug formulation and there are penal provisions for violation of any rules and regulations under the ECA. As per section 7 of the ECA, the penalty for contravention of the DPCO is minimum imprisonment of 3 (three) months, which may extend to seven years and the violator is also liable to pay a fine. The DPCO provides that the Government may, in extraordinary circumstances, if it considers necessary to do so in the light of public interest, fix the ceiling price or retail price of any drug for such period as it may consider fit, and where the ceiling price or retail price is already fixed and notified, it may allow an increase or decrease in the ceiling price or the retail price as the case may be, irrespective of the annual wholesale price index for that year. Under the provisions of the DPCO, every manufacturer of a schedule formulation intended for sale shall display in indelible print mark, on the label of container of the formulation and the minimum pack thereof offered for retail sale, the maximum retail price of that formulation based on the ceiling price notified in the Official Gazette or ordered by the Government in this behalf with the words "Maximum Retail Price" preceding it and the words 'inclusive of all taxes' succeeding it. The provisions of this order do not apply to a manufacturer producing a new drug patented under the Indian Patent Act, 1970 (product patent) and not produced elsewhere, if developed through indigenous Research and Development, for a period of five years from the date of commencement of its commercial production in the country or a manufacturer producing a new drug in the country by a new process developed through indigenous Research and Development and patented under the Indian Patent Act, 1970 for a period of five years from the date of the commencement of its commercial production in the country or a manufacturer producing a new drug involving a new delivery system developed through indigenous Research and Development for a period of five years from the date of its market approval in India.

Under the approval route, prior approval of the Government of India through FIPB is required. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the FIPB, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where FIPB approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2000 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. The Consolidated FDI Circular dated September 7, 2016 issued by the DIPP does not prescribe any cap on the foreign investments in the sector in which the Company operates. Therefore, foreign investment up to 100% is permitted in the Company under the automatic route. No approvals of the FIPB or the RBI are required for such allotment of equity Shares under this Issue. The Company will be required to make certain filings with the RBI after the completion of the Issue. RBI has also issued Master Circular on Foreign Investment in India dated July 01, 2015. Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. As mentioned above, the Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

FEMA Regulations

As laid down by the FEMA Regulations, no prior consents and approvals are required from the Reserve Bank of India, for Foreign Direct Investment under the automatic route within the specified sectoral caps. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the FIPB and/or the RBI. The RBI, in exercise of its power under the FEMA, has notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000 ("FEMA Regulations") to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. Foreign investment in India is governed primarily by the provisions of the FEMA which relates to regulation primarily by the RBI and the rules, regulations and notifications there under, and the policy prescribed by the Department of Industrial Policy and Promotion, Ministry of Commerce & Industry, Government of India.

Goods and Services Tax Act, 2017 (the “GST Act”)

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realize the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer. Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India - Arun Jaitley. This Act has been made applicable with effect from 1st July 2017.

With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus there will be a comprehensive and continuous mechanism of tax credits.

The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services.

India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax, therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

Value Added Tax (“VAT”) Act and Rules, 2008

The levy of Sales Tax within the state is governed by the Value Added Tax Act and Rules 2008 (—the VAT Act) of the respective states. The VAT Act has addressed the problem of Cascading effect (double taxation) that were being levied under the hitherto system of sales tax. Under the current regime of VAT the trader of goods has to pay the tax (VAT) only on the Value added on the goods sold. Hence, VAT is a multi-point levy on each of the entities in the supply chain with the facility of set-off of input tax—that is the tax paid at the stage of purchase of goods by a trader

and on purchase of raw materials by a manufacturer. Only the value addition in the hands of each of the entities is subject to tax. Periodical returns are required to be filed with the VAT Department of the respective States by the company.

Central Sales Tax Act, 1956

The Central Excise Act, 1944

Excisable goods under the Act means goods specified in the Schedule to the Central Excise Tariff Act, 1985 as being subject to duty of excise. Factory means any premises, including the precincts thereof, wherein or in any part of which excisable goods are manufactured, or wherein or in any part of which any manufacturing process connected with the production of these goods being carried on or is ordinarily carried out. Under the Act a duty of excise is levied on all excisable goods, which are produced or manufactured in India as and at the rates, set forth in the First Schedule to the Central Excise Tariff Act, 1985.

Customs Act, 1962

The provisions of the Customs Act, 1962 and rules made there under are applicable at the time of import of goods i.e. bringing into India from a place outside India or at the time of export of goods i.e. taken out of India to a place outside India. Any Company requiring to import or export any goods is first required to get itself registered and obtain an IEC (Importer Exporter Code).

Service Tax (Finance Act, 1994)

In accordance with Rule 6 of Service tax Rules the assessee is required to pay Service tax in TR 6 challan by fifth of the month immediately following the month to which it relates. Further under Rule 7 (1) of Service Tax Rules, the company is required to file a half yearly return in Form ST 3 by twenty fifth of the month immediately following the half year to which the return relates.

INTELLECTUAL PROPERTY RIGHTS LEGISLATIONS

The laws relating to intellectual property will also apply to the Company.

The Trade Marks Act, 1999

The Trade Marks Act, 1999 (“Trademark Act”) governs the statutory protection of trademarks in India. In India, trademarks enjoy protection under both statutory and common law. Indian trademarks law permits the registration of trademarks for goods and services. Certification trademarks and collective marks are also registrable under the Trade Mark Act. An application for trademark registration may be made by any person claiming to be the proprietor of a trademark and can be made on the basis of either current use or intention to use a trademark in the future. The registration of certain types of trademarks is absolutely prohibited, including trademarks that are not distinctive and which indicate the kind or quality of the goods.

Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for 10 years unless cancelled. If not renewed after 10 years, the mark lapses and the registration for such mark has to be obtained afresh.

While both registered and unregistered trademarks are protected under Indian law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. Registered trademarks may be protected by means of an action for infringement, whereas unregistered trademarks may only be protected by means of the common law remedy of passing off. In case of the latter, the plaintiff must, prior to proving passing off, first prove that he is the owner of the trademark concerned. In contrast, the owner of a registered trademark is prima facie regarded as the owner of the mark by virtue of the registration obtained.

The Patents Act, 1970

The Patents Act, 1970 ('Patents Act') is the primary legislation governing patent protection in India. In addition to broadly requiring that an invention satisfy the requirements of novelty, utility and non obviousness in order for it to avail patent protection, the Patents Act further provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. The term of a patent granted under the Patents Act is for a period of twenty years from the date of filing of application for the patent. The Patents Act deems that computer programs per se are not 'inventions' and are therefore, not entitled to patent protection. This position was diluted by The Patents Amendment Ordinance, 2004, which included as patentable subject matter:

1. Technical applications of computer programs to industry; and
2. Combinations of computer programs with the hardware.

However, the Patents Amendment Act, 2005, does not include this specific amendment and consequently, the Patents Act, as it currently stands, disentitles computer programs per se from patent, may disentitle the said invention to patent protection on grounds of lack of novelty. Under the Patents Act, an invention will be regarded as having ceased to be novel (and hence not patentable), inter alia, by the existence of:

1. Any earlier patent on such invention in any country;
2. Prior publication of information relating to such invention;
3. An earlier product showing the same invention; or
4. A prior disclosure or use of the invention that is sought to be patented.

Following its amendment by the Patents Amendment Act, 2005, the Patents Act permits opposition to grant of a patent to be made, both pre-grant and post-grant. The grounds for such patent opposition proceedings, inter alia, include lack of novelty, inventiveness and industrial applicability, non-disclosure or incorrect mention of source and geographical origin of biological material used in the invention and anticipation of invention by knowledge (oral or otherwise) available within any local or indigenous community in India or elsewhere. The Patents Act also prohibits any person resident in India from applying for patent for an invention outside India without making an application for the invention in India. Following a patent application in India, a resident must wait for six weeks prior to making a foreign application or may obtain the written permission of the Controller of Patents to make foreign applications prior to this six week period. The Controller of Patents is required to obtain the prior consent of the Central Government before granting any such permission in respect of inventions relevant for defense purpose or atomic energy. This prohibition on foreign applications does not apply, however, to an invention for which a patent application has first been filed in a country outside India by a person resident outside India.

The Designs Act, 2000

Designs are protected in India under the Designs Act, 2000 ("**Design Act**") read with the Design Rules, 2011, as amended from time to time. A design means the features of shape, configuration, pattern, ornament or composition of lines or colours applied to any article whether two dimensional or three dimensional or in both forms, by any industrial process or means, whether manual, mechanical or chemical, separate or combined, provided that the design is new or original, distinguishable from known designs, must be applicable on an article such as paper and be appealing to the eye, not containing any scandalous or obscene matter, is not merely a mechanical contrivance and is not contrary to public order or morality. India has adopted the Locarno Classification of industrial designs. Any design that is registered is valid for a period of ten years which is extendable for another five years from the date of expiration of the original registration.

Copyright Act, 1957

The Copyright Act, 1957 ("Copyright Act") protects original literary, dramatic, musical and artistic works, Cinematographic films and sound recordings from unauthorized use of such works. Unlike the case with patents, copyright protects the expressions and not the ideas. There is no copyright in an idea. The object of copyright law is to encourage authors, artists and composers to create original works by rewarding them with exclusive right for a fixed period to reproduce the works for commercial exploitation. Copyrights subsist in following class of works:

- a) Original literary, musical, dramatic and artistic works
- b) Cinematograph films
- c) Sound recordings

Under the copyright law the creator of the original expression in a work is its author who is vested with a set of exclusive rights with respect to the use and exploitation of the work. The author is also the owner of the copyright, unless there is a written agreement by which the author assigns the copyright to another person or entity, such as a publisher, where work is done under a 'work for hire' agreement, the copyright vests with the hirer, i.e., the person providing the work. The owner of copyright in a work can assign or license his copyright to any person, such as publisher, under a written agreement. Copyright subsists in a work since the time it comes into being. Therefore, registration of copyright neither creates any rights nor precludes enforcement of the existing ones. However, owing to its evidentiary value, a registered copyright is easier to establish in the court of law. The term of copyright varies across different types of works. In the case of broadcasts, the Act grants "broadcast reproduction rights" to broadcasting organizations which subsist for 25 years.

SECTION XI - RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy Circular of 2018, which with effect from January 04, 2018 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on January 04, 2018. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act or any state securities laws in the United States and, unless so registered, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and in accordance with any applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications made by them does not exceed the applicable limits or in any way lead to violation of laws or regulations applicable to them.
