Summary of our Industry

The IT & BPM sector has become one of the most significant growth catalysts for the Indian economy, contributing significantly to the country’s GDP and public welfare. The IT industry accounted for 7.4% of India’s GDP in FY22, and it is expected to contribute 10% to India’s GDP by 2025. As innovative digital applications permeate sector after sector, India is now prepared for the next phase of growth in its IT revolution. India is viewed by the rest of the world as having one of the largest Internet user bases and the cheapest Internet rates, with 76 crore citizens now having access to the internet. The current emphasis is on the production of significant economic value and citizen empowerment, thanks to a solid foundation of digital infrastructure and enhanced digital access provided by the Digital India Programme. India is one of the countries with the quickest pace of digital adoption. This was accomplished through a mix of government action, commercial innovation and investment, and new digital

applications that are already improving and permeating a variety of activities and different forms of work, thus having a positive impact on the daily lives of citizens. India's rankings improved four places to the 46th position at the 2021 edition of the Global Innovation Index (GII).

IT Infrastructure Services in India

IT infrastructure in technology refers to a set of physical devices, software, network resources and services required to operate enterprise. It allows an organization to deliver IT solutions and services to its employees, partners, and customers. It's usually internal to an organization and deployed within owned facilities. Besides that, it is also a set of firmwide services including; computing platforms providing computing services, telecommunications services, data management services, application software services, physical facilities management services, and IT management, standards, education, research and development services.

If an IT infrastructure is flexible, reliable and secure, it can help an enterprise meet its goals and provide a competitive edge in the market. Alternatively, if an IT infrastructure isn't properly implemented, businesses can face connectivity, productivity and security issues—like system disruptions and breaches. Overall, having a properly implemented infrastructure can be a factor in whether a business is profitable or not.

India is the topmost offshoring destination for IT companies across the world. Having proven its capabilities in delivering both on-shore and off-shore services to global clients, emerging technologies now offer an entire new gamut of opportunities for top IT firms in India.

The Indian IT & business services industry is expected to grow to US\$ 19.93 billion by 2025. Spending on information technology in India is expected to reach US\$ 144 billion in 2023. By 2026, widespread cloud utilisation can provide employment opportunities to 14 million people and add US\$ 380 billion to India's GDP.

As per a survey by Amazon Web Services (2021), India is expected to have nine times more digitally skilled workers by 2025.

In November 2021, Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, lauded the Indian IT sector for excelling its competitive strength with zero government interference. He further added that service exports from India has the potential to reach US\$ 1 trillion by 2030.

INTERNAL RISKS

- 1. There are certain outstanding legal proceeding involving our Company, Promoters, Directors and Group Companies which may adversely affect our business, financial condition and results of operations.**

There are certain proceedings pending at different levels of adjudication before various authorities, enquiry officers and appellate forums. Such proceedings could divert management time, attention and consume financial resources in their defense. Further, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition and results of operations. - 2. We derive a significant portion of our revenue from our Managed IT Service business. Therefore, factors that adversely affect the demand for such IT solutions or our position and reputation as a provider of such IT solutions may adversely affect our business and results of operations.***

We derive a significant portion of our revenue from our Managed IT Services business and are dependent on the cash flow generated from our Managed IT Services business for the growth. Our Managed IT Services business accounted for 92.74%, 73.59%, 77.58% and 90.88% of our total revenue from operations for 6 months period ending on September 30, 2022, fiscal 2022, fiscal 2021 and fiscal 2020, respectively. Consequently, factors that adversely affect the demand for Managed IT Services or our position or reputation as a provider of such IT solutions may adversely affect our business and profitability. The loss of a major Enterprise Solutions customer could lead to a significant decrease in revenue, harm our reputation and reduce our ability to accurately predict cash flow. The risk of such a loss is increased by the fact that the Enterprise Solutions business is an extremely competitive segment in the IT industry in India. All of these factors could have an adverse effect on our business, financial condition and results of operations.

- 3. Increase in the cost of, or a shortfall in the availability of IT Equipment's could have an adverse effect on our business, results of operations and financial condition.***

The traded goods used by us for sale are IT Equipment's such as switches, routers, wireless devices, wi-fi devices, security devices etc. The price and availability of these products depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials, production and transportation cost, duties and taxes and trade restrictions. We usually do not enter into long term supply contracts with any of our suppliers and typically place orders with them after firm-orders are received. The absence of long term contracts at fixed prices exposes us to volatility in the prices of products that we require. If we are unable to compensate for or pass on our increased costs to end-customer, such price increases could have an adverse impact on our result of operations, financial condition and cash flows. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us. Any inability on our part to procure products from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations.

- 4. If we cannot attract and retain highly-skilled IT professionals, our ability to obtain, manage and staff new projects and to continue to expand existing projects may result in loss of revenue and an inability to expand our business.***

Our ability to execute and expand existing projects and obtain new customers depends largely on our ability to hire, train and retain highly-skilled IT professionals, particularly project managers, IT engineers and other senior technical personnel. Given our recent growth and strong demand for IT professionals from our competitors, we cannot assure you that we will be able to hire or retain the number of technical personnel necessary to satisfy our current and future customer needs. We also may not be able to hire and retain enough skilled and experienced IT professionals to replace those who leave. If we have to replace personnel who have left our employment, we will incur increased costs not only in hiring replacements but also in training such replacements until their productivity is enhanced. We tend to hire IT professionals for particular projects as and when needed and as such there is no assurance that we will be able to find such IT professionals in time, or at all.

Further, due to the growing demand for IT professionals in India, we may have to increase the levels of employee compensation in order to retain our employees and may be unable to pass on this increase to our customers. In addition, we may not be able to redeploy and retrain our IT professionals in anticipation of continuing changes in technology, evolving standards and changing customer preferences. Our inability to attract and retain IT professionals could have a material adverse effect on our business, financial condition and results of operations.

5. *Our inability to manage the growth of our operations in India and in new territories outside of India could disrupt our business and reduce our profitability.*

We have experienced significant growth in recent years. Our total revenue for March 31, 2022, March 31, 2021, March 31, 2020 is Rs. 5097.07 Lakhs, Rs. 3479.91 Lakhs and Rs. 2211.43 Lakhs and for the period ending on September 30, 2022 is 2337.39 Lakhs, representing an annual growth rate of 46.47% from fiscal 2022 to fiscal 2021, 57.36% from fiscal 2021 to fiscal 2020. We expect our operations to continue to grow in the future. Our rapid growth has placed and will continue to place significant demands on our management and our administrative, operational and financial infrastructure. In particular, continued expansion increases the challenges we face in:

- recruiting, training and retaining a sufficient number of skilled technical, sales and management personnel;
- creating and capitalizing upon economies of scale;
- managing a larger number of customers in a greater number of industry sectors;
- managing our billing and collections;
- maintaining effective oversight over personnel and offices;
- coordinating work among off-site and on-site and project teams and maintaining high resource utilization rates;
- integrating new management personnel and expanding operations while preserving our culture and values;
- integration of any acquisitions made by us; and
- developing and improving our internal control systems and infrastructure, particularly our financial, operational and communications control systems.

In addition, we expect to be subject to the risk of setting up business operations in countries in which we do not have any operating history or experience of conducting business and involving difficulties with which we are unfamiliar, particularly any countries outside India where we expand our business, in line with our strategy. Among other things, we will be subject to the risk of hiring experienced personnel to carry out our business in an unfamiliar jurisdiction. Our lack of experience in these markets may, among other things, reduce our ability to monitor changing market dynamics on an ongoing basis and thereby reduce our ability to compete effectively in these markets. Any failure to manage our expansion effectively could lead to inefficiencies, reduce growth prospects and adversely affect our business, financial condition and results of operations.

6. *We have working capital requirements. If we experience insufficient cash flows to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. Our Trade Receivables for the period ended September 31, 2022, March 31, 2022, March 31, 2021, March 31, 2020 were Rs. 1724.88 Lakhs, Rs. 1080.52 Lakhs, Rs. 967.35 Lakhs and Rs. 1346.24 Lakhs respectively and our inventories for the period ended September 31, 2022, March 31, 2022, March 31, 2021, March 31, 2020 were Rs. 580.70 Lakhs, Rs. 584.30 Lakhs, Rs. 209.29 Lakhs and Rs. 151.29 Lakhs respectively.

The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to write-offs bad debts and/ or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our Sales level and thus adversely affecting our financial health.

For further details of working capital requirements, please refer to the chapter titled "*Objects of the Offer*" on page 63 of the Draft Prospectus.

7. *We intend to use a portion of the Net Proceeds to prepay / repay certain loan facilities.*

One of the objects of the Issue is the pre-payment / repayment of certain loan facilities, in full or in part, availed by our Company. Our Company intends to utilise an amount of up to Rs. 500.00 Lakhs from the Net Proceeds, constituting 14.25% of the total Fresh Issue Size, towards the prepayment / repayment of these loan facilities. For details of the outstanding loans proposed for repayment or prepayment, in full or in part from the Net Proceeds, without any obligation to any particular bank or financial institution, see "*Objects of the Issue – Details of the Objects – Repayment of certain borrowings*" on page no. 65 of the Draft Prospectus. The amount utilized to prepay / repay these loans will, therefore, not be available for investment in our business and will not result in any immediate increase in the value of your investment in our Equity Shares.

8. *Substantial portion of our revenues has been dependent upon limited number of customers.*

Revenue from our top 10 customers constituted 87.08% and 82.77% of our revenue from operations for period/ year ending September 30, 2022 and March 31, 2022 respectively. We do not have firm commitment supply agreements with most of our customers and other terms of our services and solutions. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

9. *Our export sale subject us to additional risks that can adversely affect our results of operations.*

We derive our revenues from our business operations from India and outside India. For the period ended September 31, 2022, March 31, 2022, March 31, 2021, March 31, 2020, our Managed IT service business outside India contributed 8.38%, 4.93%, 11.10% and 1.45% of our revenue from operations, respectively. Compliance with international laws and regulations that apply to our international operations may increase our cost of doing business in such foreign jurisdictions. These laws and regulations include local laws which may include stricter data privacy requirements, labour relations laws, tax laws, intellectual property laws, anti-competition regulations, import, foreign currency and trade restrictions. Violations of these laws and regulations could result in fines, criminal sanctions against us, our officers or our employees, prohibitions on the conduct of our business, as well as default under our contracts with customers.

Compliance with these laws requires a significant amount of management attention and effort, which may divert management's attention from managing our business operations and growth strategy, and increase our expenses as we engage specialised or other additional resources to assist us with our compliance efforts. Our success depends, in part, on our ability to anticipate these risks and manage these difficulties, as well as our information systems, any of which could impact our competitive position and reduce our revenue and profitability. There can be no assurance that we will be able to effectively manage our expansion into new international markets.

10. *Our Company has not made provision for Gratuity Payment as required under The Payment of Gratuity Act 1972. The company has not complied with AS-15- Employee Benefits as issued by ICAI.*

The Accounting Policy followed by us is not in conformity with the Accounting Standard prescribed by the Institute of Chartered Accountants of India, regarding disclosure of Present Value of Obligations with respect to the retirement benefits to be paid to the employees. The Accounting Standard stipulates that these liabilities should be accounted in the Books on Accrual Basis. However, our Company has made the suitable adjustments for the above in the Restated Financial Statements.

11. *Our Company had negative cash flow from operating activity in recent fiscals, details of which are given below.*

Sustained negative cash flow could adversely impact our business, financial condition and results of operations. The detailed break up of cash flows is summarized in below table and our Company has reported negative cash flow from operating activity in the financial years is as mentioned below, which could affect our business and growth:

(Rs. in Lakhs)				
Particulars	As at 30-Sept-2022	FY 2022-21	FY 2020-21	FY 2019-20
Net cash generated from / (used in) operating activities	(108.24)	823.88	274.40	143.45
Net cash generated from / (used in) Investing Activities	(91.43)	(547.19)	(280.57)	(240.27)
Net cash generated from / (used in) from financing activities	317.41	(189.48)	(204.43)	220.28

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. For further, details please refer to the section titled “Financial Statements” and chapter titled “Management's Discussion and Analysis of Financial Conditions and Results of Operations” beginning on page no. 145 and page no. 190 respectively, of this Draft Prospectus.

12. Our Company has several Contingent Liability and Commitments which if materialize could affect our financial position.

As on September 30, 2022, we had Contingent Liability of Rs. 179.86 Lakhs for which no provision had been made. In the event that any of these contingent liabilities materialize, our results of operation and financial condition may be adversely affected. 13. Our Company has unsecured loans that may be recalled by the lenders at any time.

Our Company has currently availed unsecured loans from certain lenders. These loans may be recalled by the lenders at any time. In the event that, any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company's liquidity. If we are unable to procure such financing, we may not have adequate working capital to maintain the desired inventory level. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, see “**Financial Indebtedness**” on page 199 of this Draft Prospectus.

14. Our Promoters and CFO have provided personal guarantees for a portion of borrowings taken by Company to secure such loans.

Our Individual Promoters and CFO has provided personal guarantees as collateral for a portion of borrowings made by our Company. For details on the financial Indebtedness of the Our Company, please refer to page no. 199 of this Draft Prospectus. If our Company default in their repayment obligations, the guarantees extended by our Individual Promoters and CFO may be invoked and such lenders may require our Individual Promoters and CFO to discharge the balance liability of our Company, if any, and the lenders may recover the dues from personal assets of our Individual Promoters, including shares held by such Individual Promoters in our

Company. In the eventuality of a default in the repayment of loans by our Company, it may divert the attention of our management and Individual Promoters towards any legal proceedings or recovery proceedings initiated in respect of such defaults by our Company. Under such circumstances, there could be an adverse impact on our business, financial conditions, and results of operations of our Company.

15. Our financing agreements contain covenants that limit our flexibility in operating our business. Our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business, results of operations and financial condition.

As of September 30, 2022, our total outstanding indebtedness was Rs. 1924.50 Lakhs (including both secured and unsecured borrowings). For details on our borrowings, please refer to chapter titles “**Financial Indebtedness**” beginning from page no. 199 of the Draft Prospectus. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our businesses. Further, our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions, any of which could adversely affect our business and financial condition. We are required to obtain prior approval from our lenders for, among other things, but not limited to effecting any change in the management/Board of the Company, declaration of dividend, capital structure of the Company; undertake any new project, implement any scheme of expansion or acquire fixed assets, enter into borrowing arrangement either secured or unsecured with any other bank/financial institution/Company or otherwise, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc. We have applied to our lenders for No Objection Certificate (NOC) for our proposed Initial Public offer, for which their NOC is awaited. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In an event, Lenders delay in granting their NOC, it will delay our proposed Initial public offering which may delay our Schedule of Implementations and consequently impact our functioning to that extent.

Additionally, our financing agreements are secured by our movable, immovable or intangible assets (whether existing or future), goods and work-in-progress (whether existing or future) and by personal guarantees of our Promoter. Such financing agreements enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, ownership interest of the existing shareholders in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost. If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

16. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

We have entered into related party transactions with our Promoters, Group Companies, Promoter group members. For details on related party transactions, please refer to the “**Annexure 31-Related Party Transaction**” under chapter titled “**Restated Financial Information**” on page 179 of this Draft Prospectus.

We cannot assure you that we will be able to maintain the terms of such transactions or in the event that we enter future transactions with related parties, that the terms of the transactions will be favourable to us. Additionally, while it is our belief that all our related party transactions have been conducted on an arm’s-length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. We may also enter related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

17. Our Group Entities have objects similar to our Company. There are no non- compete agreements between our Company and such Group Entities. We cannot assure that our Promoter will not favor the interests of such entity over our interest or that the said entities will not expand which may increase our competition and may

adversely affect business operations and financial condition of our Company.

Our Group Entities namely, Synoptics Communication Services Private Limited, Multiview Technologies Private Limited and Smit Infra and Hospitality LLP (Partnership Firm) have objects similar to our Company. For detail on our Group Companies, please refer to “***Our Group Companies/ Entities***” beginning on page no. 138 of the Draft Prospectus. We have not entered into any non-compete agreement with the said entities. We cannot assure that our Promoter/ Promoter Group who has common interest in said entities will not favour the interest of the said entity. As a result, conflicts of interests can arise on account of common suppliers/ customers and in allocating business opportunities amongst our Company and our Promoter Group entity in circumstances where our respective interests diverge. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

18. A failure to obtain, retain and renew approvals, permits and licenses or changes in applicable regulations or their implementation could have an adverse effect on our business.

We are subject to governmental regulation and therefore require a number of approvals, licenses, permits, registrations and permissions under several state and local governmental rules in India generally for carrying out our business and specifically for each of our IT facilities. For further details regarding pending approval please refer section “***Government and Other Statutory approvals***” on page no. 205 of this Draft Prospectus.

Except as stated above, we believe that we have obtained all the requisite permits and licenses which are adequate to run our business. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Also, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

19. Our registered office and branch offices are on leased/ rented premises and lease & license agreement have been executed for the same. Any termination or dispute in relation to these lease/ rental agreement may have an adverse effect on our business operations and results thereof.

Our registered office situated at 3rd Floors, B wing, Interface Bldg No. 16, Mindspace, Link Road, Malad (West), Mumbai 400064 is a leased premise and our Company has entered into an agreement with Lessor for leasing the same premises for a period of 33 months w.e.f. 15-06-2022. For details, please refer to “***Our Business Overview- our properties***” page no. 104 of this Draft Prospectus. Our business operations are also conducted from the said premises. As per the lease agreement if there are any non-compliance by us in relation to any term of lease, lease fee and any other terms and conditions, the lease may result in the termination of the lease agreement and consequently we have to vacate the said premises. We also cannot assure you that lessor will not terminate the lease agreement, which would require us to locate to another premise and may have an adverse effect on our conducting our business operations.

Further, our branch offices are situated in Andhra Pradesh, Bihar, Chennai, Delhi, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Odisha, Punjab, Rajasthan, Telangana, Uttar Pradesh, Uttarakhand and West Bengal which are leased premises. For details, please refer to “***Our Business Overview- our properties***” page no. 104 of this Draft Prospectus. Our local business operations for the regions mentioned above are also conducted from the said premises. As per the lease agreements, if there are any non-compliance by us in relation to any term of lease, lease fee and any other terms and conditions; it may result in the termination of the lease agreement and consequently we may have to vacate the said premises. We also cannot assure you that lessor will not terminate the lease agreement, which would require us to locate to another premise and may have an adverse effect on our conducting our business operations. In case, we may have to re-locate to another premise and/or agree to pay the extra amount for using the same prices. Increase in lease structure will lead to increase of our expenditure which in turn may affect our revenue and increase of operational cost. Also, searching for the suitable location, setting the branch from the scratch and relocating the inventory from location to another, may lead to loss of clients, reduction in sales thereby affecting our profitability.

20. Any inability to protect our intellectual property or any claims that we infringe on the intellectual property rights of others could have a material adverse effect on us.

As on the date of filing this Draft Prospectus, we have 3 trademarks Registered under the provisions of the Trade Marks Act, 1999. For details, please refer “***Government and Other Approvals- Intellectual Property Rights***” on page no. 205 of the Draft Prospectus. We cannot assure that third parties will not infringe on our intellectual property, thereby causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and any third party claim on any of our unprotected brands may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly, and a favourable outcome cannot be guaranteed. We may not be able to detect any unauthorised use or take appropriate and timely steps to enforce or protect our intellectual property.

21. Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.

Our operations may be subject to risks such as fire, accidents and natural disasters. We maintain customary insurance policies for our Company. Whilst we believe that we maintain adequate insurance coverage amounts for our business and operations, our insurance policies are subject to exclusions and deductibles, and may not provide adequate coverage or cover all risks. If any or all of our equipment is damaged in whole or in part, or if there is a loss of life of our employees, our operations may get interrupted, totally or partially, for a temporary period. We do not maintain key-man insurance for any of our key personnel and loss of the services of such key personnel may have an adverse effect on our business, financial condition and results of operations.

There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that our insurance policies will be adequate to cover the losses incurred. Notwithstanding the insurance coverage that we carry, we may not be fully insured against certain business risks such as the occurrence of an event that causes losses in excess of limits specified under the relevant policy or losses arising from events not covered by the insurance policies and insurance policies that we procure may not be adequate to cover all the risks associated with our business. Additionally, there may be various other risks and losses for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms.

Our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at an acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

22. Our Company’s business operations are done PAN India and any downturn and/ or any economic, regulatory, social and political change in any of the Indian states in which we operate or seek to operate may affect our market share and/ or may adversely affect our business, financial condition and results of operations.

We provide solutions and services through branch offices including our registered office. For details, please refer to “***Our Business Overview- Brief on our Audited Financials***”, on page no. 100 of the Draft Prospectus. Thus, the sales of our Company are widely dispersed throughout India and any failure to maintain such dispersion may impact sales, revenues, and consequently, the financial performance of the Company. Further, any failure in expanding our geographical presence within India may lead to loss of opportunity in earning higher revenue thereby effect our growth and profit in the Company.

Further, our business is also subject to diverse and constantly changing economic, regulatory, social and political conditions in the jurisdictions in which we operate and seek to operate. Operating in the different Indian states exposes us to a number of risks, including, but not limited to, compliance with local laws and regulations, which can be onerous and costly as the magnitude and complexity of, and continual amendments

to, those laws and regulations are difficult to keep abreast with and the liabilities, penalties, costs, obligations and requirements associated with these laws and regulations can be substantial. Our failure to comply with and adapt to changing state regulations and/or trends may result in us failing to maintain and/or expand our international sales operations, which could adversely affect our business, financial condition and results of operations.

In case of any contingencies in the future, due to which we are unable to operate effectively in these markets, our results of operations, revenues and profitability may be adversely affected. Due to this, we may not be able to expand our business effectively within Indian markets, thereby affecting our business, results of operations and financial condition.

23. Any IT system failures or lapses on part of any of our employees may lead to operational interruption, liabilities or reputational harm.

The success of our businesses depends in part upon our ability to effectively deploy, implement and use information technology systems and advanced technology initiatives in a cost effective and timely basis. Our information technology systems include multiple applications and other systems that allocate resources and facilitate internal and external communications, enabling us to coordinate and make quick decisions across our business.

In our customer engagements, we collect, process, store, use, transmit and have access to confidential information. Our computer networks may be vulnerable to unauthorised access, computer hackers, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by our employees, subcontractors or third-party vendors.

Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

24. Interruptions or delays in service from our third-party providers could impair our service delivery model, which could result in customer dissatisfaction and a reduction of our revenue.

We are typically responsible for the integrated delivery of IT solutions we develop for our customers and may incur liability for payment of liquidated damages upon our failure to provide our services effectively and on a timely basis. For example, we depend upon internet service providers to deliver connectivity and uptime availability. Consequently, the occurrence of a natural disaster or other unanticipated problems with the equipment at our off-site service delivery locations or at our customers' facilities or the facilities of these third-party providers could result in unanticipated interruptions in the delivery of our IT solutions. Any significant loss or impairment in our ability to provide IT solutions to our customers as a result of acts of third party providers could disrupt our business, which could hinder our performance or our ability to complete customer projects in a timely manner. Even if covered by insurance, any failure or breach of security of our systems could damage our reputation and cause us to lose customers. All of these factors could result in substantial liability to our customers or cause customer dissatisfaction, which could have a material adverse effect on our business, financial condition and results of operations.

25. We may not be able to keep pace with the rapid changes in information technology, industry standards and customer preference, which may adversely impact our competitiveness.

The IT solutions market is characterised by rapid technological changes, evolving industry standards, changing customer preferences and new product and service introductions. Our future success will depend on our ability to anticipate these advances and develop new service offerings to meet customer needs. We may fail to anticipate or respond to advances in technology or changes in industry standards in a timely or cost-effective manner or, if we do respond, the solutions or technologies we develop may fail in the marketplace.

Furthermore, our some of our competitors such as Dynacons Systems & Solutions Ltd, Ishan Infotech Ltd, Syndrome Technologies Pvt Ltd, NTT India Pvt Ltd, Kyndryl Solutions Pvt Ltd etc. may respond faster than we

do to changes in technology, industry standards and customer preferences. Moreover, solutions or technologies that are developed by our competitors may render our IT solutions less competitive or obsolete. For example, new data centre technologies could make our existing data centres obsolete.

In addition, new technologies may be developed that allow our customers to perform the IT solutions that we provide more cost-effectively than we can, thereby reducing demand for our outsourced technology services. Any one or a combination of these circumstances could have a material adverse effect on our ability to obtain and successfully complete customer engagements and thereby have a material adverse effect on our competitiveness and adversely affect our business, financial condition and results of operations.

26. We may face liability if we inappropriately disclose confidential customer information or are subject to security breaches in our IT systems, which could adversely affect our financial condition and results of operations.

We and our employees are frequently provided with access to our customers' proprietary intellectual property and confidential information, including source codes, software products, business policies and plans, trade secrets and personal data. We use network security technologies and other methods to prevent employees from making unauthorised copies or engaging in unauthorised use of such intellectual property and confidential information. While we have ISO 27001:2005 accreditation for our information security management system, and there have been no instances of security breaches in the past, we cannot assure you that our customers' intellectual property and confidential information is adequately safeguarded.

We cannot assure you that we will adequately address the risks created by any contractual or legal obligations that we are bound by. In the event of any breach or alleged breach of our confidentiality agreements with our customers, these customers may terminate their engagements with us or sue us for breach of contract, resulting in the associated loss of revenue and increased costs. Moreover, most of our customer contracts do not include any limitation on our liability to them with respect to breaches of our obligation to keep the information we receive from them confidential. As a result, if our customers' proprietary rights are misappropriated by us or our employees, our customers may consider us liable for that act and seek damages and compensation from us in addition to seeking termination of the contract. Assertions of misappropriation of confidential information or the intellectual property of our customers against us, if successful, could have a material adverse effect on our business, financial condition and results of operations. Even if such assertions against us are unsuccessful, they may cause us to incur reputational harm and substantial legal fees. We may also be subject to civil or criminal liability if we are deemed to have violated applicable regulations. Any such acts could also cause us to lose existing and future business and damage our reputation in the IT industry in India.

27. Certain of our customer contracts are subject to bank guarantees, which, if invoked, could adversely impact our revenue and profitability.

We maintain bank guarantees in favour of certain of our customers. Typically, these customers are entitled to invoke such bank guarantees upon termination of our contract with them due to contractual requirements not being met. If our contracts were terminated early or materially delayed, our business, financial condition and results of operations could be materially adversely affected. Unexpected terminations, cancellation or delays in our customer engagements could also result in increased operating expenses due to costs related to the transition of employees to other engagements.

28. We face risks associated with currency exchange rate fluctuations.

We export our services and receive sale proceeds in foreign currency. Foreign currency fluctuations may affect our Company's profitability and additionally may also affect our ability to service our debt obligations. Given the complex global political and economic dynamics that affect exchange rate fluctuations, it is not viable to predict future fluctuations / devaluations and their effects. These fluctuations may have adverse effect on our reported results or our overall financial condition.

29. Our Company may not have complied with certain statutory provisions under Companies Act 1956 or Companies Act, 2013. Such non-compliances may attract penalties.

Our Company was incorporated on October 15, 2008 under the Companies Act, 1956. Our Company may have

delayed in filing and/ or made incorrect filing of certain forms under the Companies Act, 1956 and Companies Act, 2013 in the past. No show cause notice in respect of such filings has been received by the Company till date. However, any penalty imposed for non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Such delay/non-compliance may in the future render us liable to statutory provisions concerned.

However, our Company has now appointed Ms. Srushthi Nalin Trivedi as Company Secretary & Compliance officer in terms of Companies Act 2013 & SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015, as amended from time to time who shall ensure that all compliances are made within necessary timelines.

30. We have relied on declarations and provisional documentary evidence for certain details in relation to our Promoters, Directors and Key Managerial Personnel as mentioned in “Our Management” chapter in this Draft Prospectus.

We have relied on declaration and provisional documentary evidence in relation to certain documents pertaining to educational qualifications and experience of our Promoters- Mr. Jatin Jagmohan Shah, Directors, i.e. Mr. Amitabh Kanhaiyalal Kundan, Mr. Narendra Mairpady and Mr. Nirbhay Singh Sohal and KMP-Mrs. Janvi Jatin Shah and Ms. Srushthi Nalin Trivedi, as they are unable to trace copies the documents. Accordingly, reliance has been placed on the details provided by them to disclose such details in this Draft Prospectus and neither we, nor the Lead Manager have been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that they will be able to obtain the relevant documentary evidence pertaining to their educational qualifications in future, or at all. Therefore, we cannot assure you that all or any of the information relating to the educational qualifications and experience of our Promoters and Directors in "Our Management" and "Our Promoters and Promoter Group" on page 132 and 138 respectively of this Draft Prospectus is complete, true and accurate.

31. We are dependent on a number of Key Management Personnel, including our Promoters, Directors, senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.

We are dependent upon the collective services of all the members of our Company's senior management team, including, among others, our Promoters and Directors, who oversee our day-to-day operations, strategy and growth of our business, managers and onboard officers. The loss of or inability to attract or retain, the services of any of these persons or several of these persons could have an adverse effect on our business. In particular, the expertise, experience and services of our Promoter and other members of our senior management team, including our Key Management Personnel helps us to execute our growth strategy and have been integral to our business. For further details, see “**Our Management**” on page no. 118 of this Draft Prospectus. If one or more of these Key Management Personnel are unwilling or unable to continue in their present positions, we may not be able to replace them with persons of comparable skill and expertise promptly or at all, which could have a material adverse effect on our business, financial results and prospects. We may take a long time to hire and train replacement personnel when skilled personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. We do not maintain a key man insurance policy to cover us for the loss we would incur if we are unable to retain any of our Key Management Personnel. Moreover, we may be required to substantially increase the number of our senior management team in connection with any future growth plans, and we may face difficulties in doing so due to the competition and paucity in the industry for such personnel. Our failure to hire or retain qualified personnel could materially impair our ability to implement any plan for growth and expansion.

32. Our Company will not receive any proceeds from the Offer for Sale portion.

This Issue comprises of an offer for sale of 8,00,000 Equity Shares at the Offer Price of Rs. 237 each aggregating Rs. 1896.00 Lakhs by our Promoter Selling Shareholders- Mr. Jatin Jagmohan Shah and Jagmohan Manilal Shah. The proceeds from the Offer pertaining to the above sale shares will be paid to the Promoter Selling Shareholders and our Company will not receive any proceeds from the Offer for sale portion. For further details, please refer the chapter titled “Objects of the Offer” on page no. 63 of this Draft Prospectus.

33. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the

Offer.

Further we have not identified any alternate source of financing the 'Objects of the Offer'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations, and financial performance. As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Offer. We meet our capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "Objects of the Offer" beginning on page no. 63 of the Draft Prospectus.

34. The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled "Objects of the Issue". Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings.

We propose to utilize the Net Proceeds for purposes identified in the section titled "***Objects of the Issue***" beginning on page no. 63 of this Draft Prospectus. Our funding requirements and the deployment of the proceeds of the Issue are purely based on our management's estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time on account of various factors such as our financial and market condition, business and strategy, competition, negotiation with suppliers, variation in cost estimates on account of factors, including changes in design or configuration of the equipment and other external factors including changes in the price of the equipment due to variation in commodity prices which may not be within the control of our management. Our estimates may exceed the value and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the Objects of the Issue is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the SEBI ICDR and Companies Act. However, the Board and Audit Committee will monitor the utilization of the Net Proceeds and ensure the same is disclosed under separate head in our balance sheet along with relevant details for all sum amounts that have not been utilized. Our Company will issue a disclosure to the Stock Exchanges, on a quarterly basis, deviations, if any, in the Use of Proceeds of the Issue from the Objects stated in the Draft Prospectus or by way of an explanatory statement to the notice for a general meeting.

35. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed expansion, as detailed in the section titled "Objects of the Issue" is to be mainly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun, or cost overrun may adversely affect our growth plans and profitability.

36. Our Board of Directors and management may change our operating policies and strategies without prior notice or shareholder approval.

Our Board of Directors and management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder approval. We cannot predict the effect that any changes to our current operating policies or strategies would have on our business, operating results and the price of our Equity Shares.

37. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Promoters and/ or Directors and/ or Key Managerial Personnel's are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company.

Our Promoters and/ or Directors and/ or Key Managerial Personnel's are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal of

remuneration paid to them for services rendered and reimbursement of expenses payable to them. For further information, see “*Capital Structure*” and “*Our Management*” on page nos. 52 and 118, respectively, of this Draft Prospectus.

38. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakhs. Since this Issue Size is less than Rs. 10,000 Lakhs, our Company has not appointed any monitoring agency for this Issue. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

39. The Company has not appointed any independent agency for the appraisal of the proposed Project.

The Project, for which we intend to use our Issue proceeds as mentioned in the objects of the Issue, has not been appraised by any bank or financial institution. The total cost of Project is our own estimates based on current conditions and are subject to changes in external circumstances or costs. Our estimates for total cost of Project has been based on various quotations received by us from different suppliers and our internal estimates and which may exceed which may require us to reschedule our Project.

40. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval.

Our Company intends to deploy and utilize Net Proceeds raised pursuant to the Initial Public Offer in the manner set out in the section titled “*Objects of the Issue*” on page no. 63 in the Draft Prospectus. In accordance with SEBI LODR Regulations and other applicable provisions, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations and it may also lead to delay in deployment of funds as per the schedule of implementation as disclosed in objects section titled “*Objects of the Issue*” on page no. 63 in the Draft Prospectus. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by redeploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

41. We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

42. Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 82.55% of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "*Capital Structure*" and "*Our Promoter, Promoter Group and Group Companies*", beginning on page no. 52, 132 and 138 respectively, of this Draft Prospectus.

43. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

44. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

45. Our Company has not paid any dividends in the past and we may not be able to pay dividends in the future.

We have not paid any dividends on our Equity Shares since inception and there can be no assurance that dividends will be paid in future. The declaration of dividends in the future will be recommended by our Board, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividend in the future. Further, we may be restricted by the terms of our debt financing from making dividend payments, in the event we default in any of the debt repayment installments.

46. Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity

shares held for a period of 12 months or less will be subject to applicable short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to "Statement of Tax Benefits" on page no. 76 of this Draft Prospectus.

47. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. [●] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled "***General Information – Details of the Market Making Arrangement for this Issue***" on page no. 44 of this Draft Prospectus.

48. Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.

There has been no public market for our Equity Shares prior to the Offer. The price may not necessarily be indicative of the market price of our Equity Shares after the Offer is completed. You may not be able to re-sell your Equity Shares at or above the Offer price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on Emerge Platform of NSE after the Offer, but there can be no assurance that active trading in our Equity Shares will develop after the Offer, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Offer will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- The history of and prospects for our business;
- An assessment of our management, our past and present operations, and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;

- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;
- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

EXTERNAL RISK FACTORS

49. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

The company is subject to various regulations and policies. For details see section titled “**Key Industry Regulations**” beginning on page no. 107 of this Draft Prospectus. The company’s current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse effect on the business, financial condition and results of operations.

50. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors’ assessments of our Company’s financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see “**Presentation of Financial, Industry and Market Data**” on page no. 13 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Draft Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

51. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

52. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

53. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

54. Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations, cash flows and financial condition.

India is our key market. For Fiscal 2022, entire of our Company's revenue from operations was from India. In addition, an increase in India's trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations, cash flows and financial condition.

55. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

IT Infrastructure Services in India

IT infrastructure in technology refers to a set of physical devices, software, network resources and services required to operate enterprise. It allows an organization to deliver IT solutions and services to its employees, partners, and customers. It's usually internal to an organization and deployed within owned facilities. Besides that, it is also a set of firmwide services including; computing platforms providing computing services, telecommunications services, data management services, application software services, physical facilities management services, and IT management, standards, education, research and development services.

If an IT infrastructure is flexible, reliable and secure, it can help an enterprise meet its goals and provide a competitive edge in the market. Alternatively, if an IT infrastructure isn't properly implemented, businesses can face connectivity, productivity and security issues—like system disruptions and breaches. Overall, having a properly implemented infrastructure can be a factor in whether a business is profitable or not.

Segments in IT Industry

Managed IT Services

Managed services offer various benefits that are proven to positively impact the development of the organization that adopts such services as they can focus on their core expertise. It is estimated that successfully deploying managed services will help reduce IT cost by 25-45% and increase operational efficiency by 45-65%. In addition, according to Intelligent Technical Solutions, 25% of organizations said downtime costs averaged between USD 301,000 and USD 400,000 per hour.

Moreover, 2022 was expected to be all about application deployments matched to the development speed. The application maintenance and support services will be pivotal to the managed services in IT. Application performance monitoring (APM) will imbibe a quick feedback mechanism for developers. Front-end monitoring (for studying user behavior), ADTD (for application discovery, tracing, and diagnostics), and AIOps analytics (for detecting application lifecycle patterns and anomalies) will all be parts of APM. These solutions will help the DevOps team to analyze business problems better. It will cut down on their mean time to repair (MTTR).

With industry requirements, standards, and consumer needs changing daily, businesses are seeking result-based outcomes. They require possession of pre-defined or expected criteria documented clearly, and in real time. The MSP will now be seen using advanced analytics and reporting to state the implemented technologies' impact and present factual data.

Further, the Blockchain and IoT technologies are set to create better opportunities for managed services providers, as these organizations require expertise to implement these technologies. To get a hold of these opportunities, stay relevant, and keep up with the competition, managed services providers increasingly acquire essential skill sets for these, among other innovative technologies, like AR, VR, and AI.

Market Trends

- In the current technology-driven business environment, Big Data is one of the manufacturers' primary drivers of productivity and efficiency. With the high rate of adoption of sensors and connected devices and the enabling of M2M communication, there has been a massive increase in the data points that are generated in the manufacturing industry.
- Industries are pitching hard and fast to switch to a smart industry, where data generation and visualization can become real-time. From descriptive to predictive, the evolution of analytics has made the industry aware of the benefits it can reap from this volume of data. The motto of the manufacturing industry is moving toward a metrics-based sector, which can improve decision-making based on the data-driven use of statistics.
- With the concept of Industry 4.0 influencing production establishments in the manufacturing industry, the amount of data produced from the manufacturing industry has snowballed, as they have been able to create data from each process point, varying from temperature, pressure, humidity, stress, strain, and quality, among numerous others.
- There are several applications in the semiconductors, consumer electronics, and the automotive industry, where manufacturers have to monitor numerous variables to ensure the quality of end products. Big Data analytics has emerged as an effective solution to traditional methods.
- As most small and medium manufacturing industries are more concentrated on hardware equipment and lack expertise in software solutions, they are outsourcing these Big Data analytic solutions. Outsourcing software services are further reducing their expenditure. Outsourcing other software services, such as field service management and ERP, is expected to boost managed services during the forecast period.

Managed Security Services

The Managed Security Services Market size was estimated to be worth USD 27.7 billion in 2022 and is anticipated to rise to USD 49.6 billion by 2027, exhibits a CAGR of 12.3% in between 2022 to 2027. Some factors driving the managed security services market growth include the growing adoption of MSS due to stringent government regulations and rising security breaches, and sophisticated cyber attacks across enterprises. However, increased cyber attacks on MSSP infrastructure and a lack of security professionals are expected to hinder market growth.

Market Dynamics

Driver: Growing adoption of MSS due to multilayered expertise, cost-effective approach, and 24*7 service

Organizations across industries are adopting managed security service because they offer several benefits, such as round-the-clock monitoring and management of intrusion detection systems and firewalls, overseeing patch management and upgrades, performing security assessments and security audits, and responding to emergencies

MSSPs have experience, expertise, and an extensive set of tools and technology that monitor security threats, update systems, and mitigate vulnerabilities at an affordable cost. It helps in maintaining the right security layers, which include software patching, DNS security, firewalls, anti-malware, anti-phishing software, credential managers, IAM tools, and more to protect the organization's confidential information. MSSPS monitor the assets and network 24*7 using many dedicated tools such as AI to identify anomalies and avoid unplanned disruptions.

Restraint: Limited capabilities to provide threat-hunting and incident response services

Many MSSPS only provide security log monitoring services, which do not allow MSSPs to provide a deeper level of security incident investigations. MSSPS need to integrate into client processes such as change management and access management and have access to security tools such as Microsoft Cloud App Security and endpoint protection to eliminate false positives and provide meaningful alerts to clients. MSSP services are built on specific security solutions and sometimes do not integrate well with existing client tools. Since these tools do not have visibility into all security logs or environments, it can lead to a large number of unnecessary false positives and threat alerts. Lack of interoperability and integration among security tools can hamper the security posture of the organization.

Opportunity: Growing demand for robust and cost-effective security services to monitor security events

With the evolution of the overall information technology landscape with factors such as increased digitalization, cyberattacks are also taking place at an increasing rate, with an increasing level of sophistication. Information and data security entail the protection of both, private and public sectors from professional cybercriminals and sophisticated cyber threats. Cybercriminals use multilayered cyberattacks to monitor the intelligence and commercial aspects of individuals, enterprises, and even nations. Hence, organizations are looking for robust security services that enable them to both reduce costs and improve the safety of their facilities.

Challenge: Increased cyber attacks on MSSP infrastructure

Large enterprises regularly have structural difficulties that other smaller businesses typically do not experience; for instance, a broadly diverse customer base, numerous products and services offered across the globe, discrete internal divisions or hierarchical units, and essentially more outsourced business information. Considering large players in the MSS market, it is difficult to maintain and secure the data for providing security services. MSSPs are aware of threats and are allocating resources toward information security, faster response times, and recovery after threat detection. To protect the security services of a provider's IT infrastructure from viruses, malware, and other cyber-security threats, most MSS vendors use a unified approach to manage security, which is a viable solution for growth-orientated companies.

Recent Developments

In August 2021, IBM introduced new SASE services capable of delivering cloud security at the edge, closer to the users and devices that access corporate resources. Cyber security Market in India

The cyber security market in India is expected to grow from \$1.97 billion in 2019 to \$3.05 billion by 2022, at a compound annual growth rate (CAGR) of 15.3%, according to a joint study by PwC India and DSCI. The study also stated that banking, financial services and insurance (BFSI), IT, and government are the top three sectors with the

largest market share in cyber security expenditure in the country. This pre-COVID assessment may actually underestimate the growth of the cybersecurity market, if the digital economy booms in the post-COVID-19 era.

Demand for cyber security solutions is being driven by India's dynamic digital economy. Prime Minister Modi has made expanding the digital economy a priority under his Digital India initiative. Highlights of growth in India's digital economy include:

- India's IT-BPM (Business Process Management) sector was over \$180 billion in 2019, growing at over 8% per year.
- Digital payments transactions are expected to reach \$135 billion by 2023, up from \$64.8 billion in 2019, growing at a CAGR of 20%.
- The e-Commerce market is expected to surpass \$100 billion by 2022, with online financial services the fastest growing segment.
- India's mobile telecom sector has driven adoption of the internet (96% is wireless – 606 million subscribers) and telephone service (98% is wireless – 1.17 billion subscribers).

The Indian government has made cyber security a national policy priority, creating task forces and engaging with the United States government (USG) to discuss cooperation, sharing information, and improving their cyber defense capability. Bilateral cooperation between India and the United States in the cyber security field is on a positive trajectory. The United States and India have held several official government to government bilateral joint Cyber Dialogues, with the most recent in October 2019. The Cyber Dialogue is a forum for implementing the Framework for the India–U.S. Cyber relationship, including exchanging and discussing international cyber policies, comparing national cyber strategies, enhancing efforts to combat cybercrime, and fostering capacity and R&D, thus promoting building cyber security and the digital economy.

Cloud Computing

India cloud computing market is expected to grow at a CAGR of 28.1% during the forecast period. The high concentration and increasing number of small and medium-sized businesses in India that are rapidly shifting towards cloud computing is emerging as the major driving factor for the market. Furthermore, growing investment towards the construction of cloud data centers is expected to boost the India cloud computing market in the forecast period.

Based on services, the India cloud computing market is segmented into infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS). The software as a service (SaaS) holds the largest market share because of the presence of a large number of SaaS apps in the Indian market, such as Amazon Web Services (AWS), G-Suite, CloudCherry, Talview, Whatfix, Freshdesk, Zoho, etc. Furthermore, SaaS apps are expected to witness the biggest jump in their growth in the post-COVID-19 period as the demand for remote access to data is growing substantially.

Growth Driver - The increasing number of small and medium-sized enterprises (SMEs) in India is emerging as the major driving factor for the growth of the India cloud computing market. According to an estimate, there are more than 63 million SMEs in India. Small and medium-sized businesses are increasingly investing in cloud computing to benefit from various benefits such as flexibility, data recovery, reduction in IT maintenance costs, remote access to data, etc. These benefits are driving the growth of the India cloud data market.

Threat - Due to the increasing dependency on cloud computing by the Indian population, specifically in the wake of COVID-19, the risks of cyberattacks and cloud hacks have also multiplied severalfold. After the US, India now has the second most security threats on the cloud, and malware was the second most frequent technique reported in incidents. While the government and big companies are taking necessary measures to minimize casualties, the increasing number of cyberattacks is becoming a cause for concern for the growth of the India cloud computing market.

Recent Developments

In October 2021, Amazon Web Services announced the launch of the AWS re/Start program in India which is free skill development and job training program to skill people in cloud computing. In September 2021, Trend Micro Incorporated, a Cloud security company, announced the launch of its 'Cloud One' regional data center in India to strengthen data sovereignty and data privacy in the country.

Application Modernization

The application modernization services market size is expected to grow from USD 15.2 billion in 2022 to USD 32.8 billion by 2027 at a Compound Annual Growth Rate (CAGR) of 16.7% during the forecast period. Application modernization services are the process of moving legacy programs or platforms to new ones and integrating new functionality to give the organization the newest features. In order to regularly deploy application code and insulate apps from the underlying host environment, which makes them more efficient than virtual machines, modernization might also entail switching to a containerized or serverless architecture. Companies must accelerate innovation and cost-effectiveness while maintaining, or even enhancing performance and reliability. Many of these businesses continue to use out-of-date hardware and software, which raises Operation costs and puts their operations in danger. IT leaders are aware of the need to upgrade their old programs, citing decreased time to market, lower technical debt, and lower running expenses as the main motivators.

Market Dynamics

Driver: Shift toward modernization by cloud-native technologies

There is a sudden shift in the market during 2021 and 2022 for application modernization and migration services towards modernization that are enabled by advanced cloud-native technologies with a correspondingly lower emphasis on infrastructure-led lift-and-shift migration. At the same time, the hyper-scale cloud providers have become an integral part of customers' migration and modernization journeys, not only by becoming important strategic partners for large enterprise customers but also by participating in dedicated go-to-market units that the large systems integrators (SIs) are forming. The market is also characterized by higher degrees of automation, including the growing importance of service delivery accelerators, quality enablers, and vertical-industry-specific assets. Modern cloud-native development techniques can often be used for the modernization of discrete portions of legacy applications; however, for many businesses, successfully collocating a legacy application on a modern platform is considered a win.

Restraint: High costs and complexities in application modernization services

Although new application features can aid companies in streamlining their operations and boosting income, organizations must first examine their return on investment (ROI) before making any decisions about their investments in application modernization. Application modernization costs are largely influenced by the features and functions of the organizations pursuing it. Organizations must make sure that the difficulties of compatibility with other legacy programs do not outweigh the advantages offered by updated applications while upgrading a few

applications. It is crucial for enterprises to begin the process with an application evaluation and select the best method for application modernization based on business goals in order to take into account the costs and complexities associated with the modernization procedures. The global market for application modernization services is therefore being constrained by the rising costs and complexity of application modernization.

Opportunity: Proliferation of Kubernetes and containerization

Kubernetes adoption is increasing rapidly, making it more important to address ongoing operations and management at scale. Huge numbers of stateful applications mean that the management burden for applications is expected to grow along with the capacity needed to support them. Organizations need tools to help mitigate Kubernetes-based workloads' complexity to prepare for ongoing operations and scalability. Several companies are implementing containerization to enhance their application's portability and data from across computing environments. The containers help virtualize storage and other computing resources at the OS level and help developers in the logical isolation of applications. Application modernization service providers, including IBM, AWS, Alibaba Cloud, Microsoft, HPE, Dell, and Google, have added container technology in their cloud storage and cloud-native storage solutions to enable persistent storage, with which running applications can easily consume the data on demand. Thus, containers combined with DevOps and cloud storage to completely modernize application development, which is expected to create opportunities in the application modernization services market

Challenge: Lack of IT skills among employees

The addition of additional features and functionality to apps is a component of application modernization. Although it eventually improves/simplifies the entire process, staff must learn new functionalities and adjust to new UIs in order to use all functionalities. The amount of work required to embrace modernized software can vary depending on modifications to UIs and functionality. UIs modifications may be resisted by people who are accustomed to utilizing outdated UIs and software, which is a substantial obstacle to application modernization. Many businesses struggle to modernize and incorporate new technologies within established organizational cultures. The recent pandemic has caused many firms to reevaluate how they conduct business and the idea of operating remotely as a significant business continuity option. These two factors are connected, thus businesses work to maintain a balance between them. Unless top management is convinced of the benefits of the modernization process, the traditional organizational culture may not choose to engage in it. To meet this challenge, businesses should think about organizational change management (OCM).

Recent Developments

Business Continuity Services

The business continuity management market is estimated to generate \$536 million in 2022, and it is expected to advance at a compound annual growth rate of 15.30% during 2022-2030, to reach \$1,673 million by 2030.

The growth is primarily ascribed to the surging dependence on digitization, integration of cutting-edge technology, increasing IT spending, growing adoption of business continuity solutions in SMEs, and rising operational risks in organizations.

Business continuity management involves an organization's strategy and preparedness to maintain optimum operations or quickly resume functioning after a disaster. It also entails the identification of threats. The advantages of a robust BCM strategy, such as the capability to withstand natural disasters and cyberattacks. Furthermore, maintaining a strong financial reputation and providing excellent customer service during mishaps can be difficult. Here, continuity planning ensures that the product or service quality is upheld. This becomes especially important for companies' food products or healthcare-related goods.

Market Trends

Increasing Adoption from SMES

The increasing demand for BCM from SMES is driving the market across the globe. In recent years, the escalating number of SMES has been noted to adopt BCM solutions and services, to streamline their business structure and expand their organizations. The key players in the BCM market are focusing on providing more flexible solutions and services for SMEs. This can be ascribed to the new consumer base's massive volume and growing awareness of the importance of protecting their assets. The mushrooming demand has been specifically notable for enterprises that are operating in under-regulated industries.

Additionally, SMEs generally rely on limited resources for both, safeguarding their operations and solutions that generate revenue for the enterprise; this factor creates a high demand for SMEs to adopt BCM. Also, there has been increasing pressure from larger organizations (such as Microsoft Corporation and Hewlett Packard Company) to secure the continuity of supply chains, new government laws, and adoption of BCM solutions. This is increasingly compelling SMEs to add BCM as a part of mainstream business operations.

Increasing Operational Risks in Organizations

Organizations with complex business operations are witnessing increasing operational risks, driven by growing economic uncertainties, stiff regulatory fines, and compliances, along with emerging risks, such as conduct risk, model risk, vendor risk, and cybersecurity risk. Moreover, such organizations are demanding robust risk mitigation, real-time risk assessment, and greater risk accountability from management and business lines. Additionally, with financial service institutions increasingly expanding their businesses, the requirement to process accountability and transparency, coupled with ensuring proactive risk mitigation is surging the demand for BCM solutions, across the globe.

For instance, cybersecurity risks are increasing with the growing digitization and reliance of small and large organizations on the internet. The current cyber threat landscape has made businesses more aware of the risks of cyberattacks, and of the importance of being able to respond to and recover from such attacks

Market Drivers

- The fast-changing corporate environment across the world
- Increasing operational risks in organizations
- An increasing number of organizations are utilizing business impact analysis
- Increasing technological integration and greater emphasis on digitization

Market Restraints

- Concerns and apprehensions about security
- Lack of knowledge and spending restraints for SMEs

Market Opportunities

- Technological advancements in organization and enterprise asset management (EAM)
- Increasing consumption from SMEs

Recent Developments

One of the key developments in the global business continuity management market has been the rapid acceptance of business impact analysis (BIA) between many small and medium enterprises (SMEs) and big corporations. Traders and investors provide end-users with customizable effect evaluation and risk recognition via BIA. A growing number of organizations are turning to BIA because it helps them identify critical activities and processes such as external and internal dependency chain systems and Return on investment. Furthermore, the continued growth of the robust dependency modeling and analysis phase that allows organizations to evaluate recovery time objectives goals relative to achievable items is encouraging the use of BIA around the world.

Rising operational risks in organizations are primarily driving the global expansion of the business continuity management market. Companies are currently confronted with a variety of operational risks as a result of rising economic uncertainty and strong government forfeitures and compliances. Organizations consider robust mitigating risk, real-time risk evaluation, and increased risk accountability from business and management lines. Furthermore, as financial companies develop their businesses, the need for process transparency and accountability as well as proactive risk mitigation, is driving up demand for business continuity management markets trend around the world.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognized in the consolidated financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the period in which the change occurs.

Phased implementation of Unified Payments Interface

SEBI has issued a ***UPI Circulars*** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application

amount is up to ₹ 500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers. BASIS OF ALLOTMENT

Allotment will be made in consultation with the Emerge Platform of NSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth

hereunder:

- 1) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of Applicants in the category x number of Shares applied for).
- 2) The number of Shares to be allocated to the successful Applicants will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).
- 3) For applications where the proportionate allotment works out to less than 1,600 equity shares the allotment will be made as follows:
 - i. Each successful Applicant shall be allotted 1,600 equity shares; and
 - ii. The successful Applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- 4) If the proportionate allotment to an Applicant works out to a number that is not a multiple of 1,600 equity shares, the Applicant would be allotted Shares by rounding off to the nearest multiple of 1,600 equity shares subject to a minimum allotment of 1,600 equity shares.
- 5) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Applicants in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 3000 Equity shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Draft Prospectus.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which is effect from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non- Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non- Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
